

MILO INSULATON™
Natures Finest Insulation

REGRADING MILO INSULATION OF TEXAS LLC, APPLICATION FOR A SPECIAL USE PERMIT:

Milo Insulation of Texas LLC currently located at 3631 Shelby Lane, Denton is moving from that location to 2401 Worthington, Denton, TX Suite 100.

This move does not require any construction nor require any alteration to the existing structure.

Milo operates a Maddox 750 Baked Type Extruder to convert a dry grain-based material into expanded shapes used in household insulation. This process does not involve any materials of hazardous nature nor produce any harmful smell, nor any excess material that would in any way affect the existing environment or adjacent occupants.

The only manufacturing involved in this process is one machine doing extrusion. **This machine makes limited noise and will not disturb any surrounding area. Milo uses no semi trucks and does not require any outside trucks idling.**

Due to the fact that the current location is zoned differently to the new location a special use permit is needed.
