In-person Tree Survey

INTRO SCRIPT: Hi, I represent the City of Denton Development Services Department. Will you take a moment to answer a few short questions about our trees? This will only take a couple of minutes.

We are proposing to amend the Tree Preservation and Landscape Requirements of the Denton Development Code. Our goal is to streamline the requirements and modify tree preservation and mitigation standards. As part of the process, we are requesting citizens' feedback about the integration of trees, landscaping, and screening elements.
