Re: Video – Denton Energy Center

---

Last month, Denton Municipal Electric's Executive Manager of Energy Delivery, Brent Heath, completed a fly-over of the new Denton Energy Center site. This video shows the progress that has been made thus-far in construction of the Center. The site has been cleared which makes it possible to see the edges of the property, the access drive is visible winding its way through the parcel, and the recessed area where the engines will be located can be easily identified.
