

## ACM Update

Clear Creek Natural Heritage Center has planned a project with UNT for Make a Difference Day, October 22, 2016. We will be converting one of the parking medians at the Center to a Texas Monarch and Pollinator Garden. Students will assist in planting an approximately 1500sf area with Texas natives procured in partnership with Painted Flower Farm. Our projects with UNT volunteers are always a huge benefit to Clear Creek and typically tackle projects that may be beyond the scope of our regular volunteers. Establishing a Monarch and Pollinator Garden has been a goal of the Elm Fork Chapter Master Naturalists and the UNT volunteers will help us more quickly reach that goal.
