STRATEGIC ALIGNMENT

This action supports Key Focus Area: Enhance Infrastructure and Mobility.

INFORMATION/BACKGROUND

DME is currently using ArcFM Suite of products, including but not limited to ArcFM Editor, ArcFM Fiber, Responder OMS, ArcFM Viewer, and we have migrated to the latest version of ArcFM XI suite.

The ArcFM Electric GIS software allows DME the capability to run database queries on the transmission and distribution electric systems infrastructure and fiber communications infrastructure, and create engineering and operations maps. The electric GIS has become a core product for DME and is now used to provide GIS data that assists with financial fixed asset accounting, budget preparations, and presentations requiring governing board approvals, distribution engineering analysis, and outage management tracking and reporting. Over time, there have been other software programs that have had integrations to the Schneider suite of software that require continued maintenance and support.
