Such electricity service offers will be based upon the following terms:

The electricity distribution service provider will evaluate the cost associated with service extension through the undeveloped area to determine if Aid-in-Construction is required. The electricity distribution service provider is responsible for installation of all primary-voltage electrical cables, transformers, switchgear, streetlight poles and LED streetlight fixtures, streetlight cables, single-family residential services, and other necessary electric distribution and transmission system equipment in compliance with Electric Service Standards and Line Extension Policies currently in place at the time of development, whether onsite or offsite as necessary to provide adequate and reliable electric service to the Property.

Easements will be conveyed through the platting process unless the electricity distribution service provider requests an easement be transferred by separate instrument. The provider agrees to joint trench installation of other franchised utilities such as telephone, cable tv, fiber optic cables, or other non-gas utilities within the designated public utility easements as long as those utilities are on an edge shelf of the trench and not placed directly above the electric facilities.
3. Existing overhead electric distribution lines, which are located in the public rights-of-way, will be relocated by the electricity distribution service provider at no cost to the Owner when development adjacent to the existing electric line requires the line to be relocated in order to accommodate the adjacent development as long as the relocation is also to an overhead position. If Owner requests the relocation be placed underground, then Owner shall be responsible for the difference in cost between the overhead relocation and the underground relocation as reasonably determined and demonstrated by the electricity distribution service provider. Existing overhead electric distribution lines not owned by the electricity distribution service provider will be relocated underground by the owner of the lines if so required to comply with the Denton Development Code.
4. Owner will comply with those City approved policies within the DME Electric Service Standards (ESS), as amended, that are available on the City website and uniformly applied within the City, including the specifications for street lighting.

- 5. AUTHORITY**
City and Owner represent that they have full power, authority and legal right to execute, deliver and perform their obligations pursuant to this Agreement.
