Meeting Agenda

Planning and Zoning Commission

Wednesday, February 12, 2025

4:00 PM

Council Work Session Room

Capital Improvement Advisory Committee

REGULAR SESSION BEGINS AT 4:00 P.M. IN THE COUNCIL WORK SESSION ROOM

After determining that a quorum is present, the Capital Improvement Advisory Committee of the City of Denton, Texas will convene in a Regular Session on Wednesday, February 12, 2025, at 4:00 p.m. in the Council Work Session Room at City Hall, 215 E. McKinney Street, Denton, Texas at which the following items will be considered:

REGULAR SESSION

1. INDIVIDUAL CONSIDERATION ITEM

- A. [PZ25-055](#) Receive a report, hold a discussion, and make a recommendation regarding the Water and Wastewater Impact Fee Update.

Attachments: [Exhibit 1 - Agenda Information Sheet](#)
 [Exhibit 2 - Presentation](#)
 [Exhibit 3 - Draft Water/Wastewater Impact Fee Study](#)

2. CONCLUDING ITEMS

- A. Under Section 551.042 of the Texas Open Meetings Act, respond to inquiries from the Capital Improvement Advisory Committee or the public with specific factual information or recitation of policy, or accept a proposal to place the matter on the agenda for an upcoming meeting AND Under Section 551.0415 of the Texas Open Meetings Act, provide reports about items of community interest regarding which no action will be taken, to include: expressions of thanks, congratulations, or condolence; information regarding holiday schedules; an honorary or salutary recognition of a public official, public employee, or other citizen; a reminder about an upcoming event organized or sponsored by the governing body; information regarding a social, ceremonial, or community event organized or sponsored by an entity other than the governing body that was attended or is scheduled to be attended by a member of the governing body or an official or employee of the municipality; or an announcement involving an imminent threat to the public health and safety of people in the municipality that has arisen after the posting of the agenda.

NOTE: The Capital Improvement Advisory Committee reserves the right to adjourn into a Closed Meeting on any item on its Work Session or Regular Session agenda consistent with Chapter 551 of the Texas Government Code, as amended, including without limitation, Sections 551.071-551.086 of the Texas Open Meetings Act.

CERTIFICATE

I certify that the above notice of meeting was posted on the official website (<https://tx-denton.civicplus.com/242/Public-Meetings-Agendas>) and bulletin board at City Hall, 215 E. McKinney Street, Denton, Texas, on February 7, 2025, in advance of the 72-hour posting deadline, as applicable, and in accordance with Chapter 551 of the Texas Government Code.

OFFICE OF THE CITY SECRETARY

NOTE: THE CITY OF DENTON'S DESIGNATED PUBLIC MEETING FACILITIES ARE ACCESSIBLE IN ACCORDANCE WITH THE AMERICANS WITH DISABILITIES ACT. THE CITY WILL PROVIDE ACCOMMODATION, SUCH AS SIGN LANGUAGE INTERPRETERS FOR THE HEARING IMPAIRED, IF REQUESTED AT LEAST 48 HOURS IN ADVANCE OF THE SCHEDULED MEETING. PLEASE CALL THE CITY SECRETARY'S OFFICE AT 940-349-8309 OR USE TELECOMMUNICATIONS DEVICES FOR THE DEAF (TDD) BY CALLING 1-800-RELAY-TX SO THAT REASONABLE ACCOMMODATION CAN BE ARRANGED.

AGENDA CAPTION

Receive a report, hold a discussion, and make a recommendation regarding the Water and Wastewater Impact Fee Update.

City of Denton

City Hall
215 E. McKinney Street
Denton, Texas
www.cityofdenton.com

AGENDA INFORMATION SHEET

DEPARTMENT: Water Utilities
ACM: Cassandra Ogden
DATE: February 12, 2025

SUBJECT

Receive a report, hold a discussion, and give staff direction regarding the Water and Wastewater Impact Fee Update.

STRATEGIC ALIGNMENT

This action supports Key Focus Area: Support Healthy and Safe Communities.

INFORMATION/BACKGROUND

The City of Denton is updating the Water and Wastewater Impact Fees in accordance with Chapter 395 of the Texas Local Government Code (TLGC). Impact fees provide the means for recovering the cost of adding capacity to the water/wastewater system to provide service to any new growth that creates a new demand/impact on the water and wastewater system. In September 1998, the City of Denton first adopted impact fees for the Water and Wastewater Utilities. The legislation requires the fees to be updated at 5-year intervals, and the current impact fees were updated in 2018. The update began in August of 2022.

The presentation and discussion will include:

- Land Use and Growth Assumptions
- Explanation of Service Units
- Overview of the Impact Fee Capital Improvement Plans
- Comparison of Service Areas
- Impact Fee Calculation

Water Utilities met individually with Council Members in December of 2023 and January of 2024 to review the study methodology and give a preliminary update on the impact fee calculations.

PRIOR ACTION/REVIEW (Council, Boards, Commissions)

Public Utilities Board – October 24, 2022 – Received Direction
One-on-One Meetings with Councilmembers – December 2023 and January 2024 – Received Direction
Developer Meeting – July 8, 2024 – Provided Update and Received Feedback
City Council – July 16, 2024 – Received Direction
Developer Meeting – September 10, 2024 – Provided Update and Received Feedback
Developer Meeting – February 10, 2025 - Provided Update and Received Feedback

EXECUTIVE SUMMARY

INTRODUCTION

Impact Fees are a mechanism for funding the public infrastructure necessitated by new development. Across the country, they are used to fund police and fire facilities, parks, schools, roads, and utilities. In Texas, the legislature has allowed their use for roadway, drainage, water, and wastewater facilities. In 2023, the City of Denton began an update to the Water and Wastewater Impact Fees last updated in 2019.

In the most basic terms, Impact Fees are meant to recover the incremental cost of the impact of each new unit of development towards new infrastructure needs. Impact Fees are a mathematical calculation that determine a maximum fee that would be equivalent to growth paying for growth. This study's purpose is to calculate the maximum impact fee per service unit of new growth.

The Maximum Impact Fee is considered an appropriate measure of the impacts generated by a new unit of development on a City's infrastructure system. An impact fee program is anticipated to be designed so that it is **predictable** for both the development community and City. An impact fee program is **transparent**. This report describes in detail how the fee is calculated and how the Capital Improvements Advisory Committee (CIAC) monitors the Impact Fee program. An impact fee program is **flexible** in that funds can be used on priority projects and not just on projects adjacent to a specific development. An impact fee program is both **equitable** and **proportional** in that every new development pays an equal fee that is directly related to its systemwide impact.

IMPACT FEE BASICS

Service Areas

A Service Area is a geographic area within which a unique maximum impact fee is determined. All fees collected within the Service Area must be spent on eligible improvements within the same Service Area. For Water and Wastewater Impact Fees, a Service Area can be defined for both water and wastewater facilities that consists of the City Limits and extends throughout the Extraterritorial Jurisdiction (ETJ). Denton's water Impact Fees are distributed across three (3) services areas. Denton's current wastewater Impact Fees are distributed across a single service area. Due to the need for two additional wastewater treatment plants the City will move to three (3) wastewater services areas.

Land Use Assumptions

The Impact Fee determination is required to be based on the projected growth and corresponding capacity needs in a 10-year window. This study considers the years 2024-2034 for the projected 10-year growth. Population growth during that period is projected to increase by approximately 114,000. This projection along with associated non-residential development set the basis for determining water demands and wastewater flows to serve new growth.

Service Units

The “service unit” is a measure of consumption or use of the capital facilities by new development. In other words, it is the unit of measure used to quantify the supply and demand for utilities in the City. Service units are attributable to an individual unit of development and utilized to calculate the maximum impact fee of a development.

The service unit for water and wastewater Impact Fees is based on the size of the individual water meters used to serve growth related development. The base water service unit is the water demand associated with the smallest water meter issued for a new residential unit. The base wastewater service unit is the wastewater flow associated with the smallest water meter issued for a new residential unit. The smallest water meter issued for a new residential unit in the City of Denton is a 5/8-inch x 3/4-inch meter.

Capital Improvement Plans

The City has identified the water and wastewater projects needed to accommodate the projected growth over the next ten (10) years. These projects include existing, proposed, and recently completed projects that were determined based on their current or anticipated impact on each defined service area.

Water Impact Fee Capital Improvements Plan

The Water Impact Fee Capital Improvements Plan was developed based on recommended capital improvements outlined in the 2024 Water Master Plan, input from City Staff, and the population growth projections shown in the Land Use Assumptions. The recommended improvements will provide the required capacity and reliability to meet projected water demand through 2034. Elements of the water system, including treatment facilities, storage facilities, pumping facilities, transmission and distribution network were evaluated against industry standards as outlined in the Design Criteria sections of Water Impact Fee Chapter.

A total of nineteen (19) existing projects, thirty-one (31) proposed projects, and the Water Impact Fee Study were identified to develop the Water Impact Fee Capital Improvements Plan. The total project cost (not impact fee eligible cost) to be evaluated is \$1,003,063,455.

Wastewater Impact Fee Capital Improvements Plan

Similar to the Water Impact Fee Capital Improvements Plan, the Wastewater Impact Fee Capital Improvements Plan was developed to address system improvements driven by growth. Elements of the wastewater system, including treatment, gravity pipes, force mains, and lift stations were evaluated against industry standards as outlined in the Design Criteria section of the Wastewater Impact Fee Chapter of this Report.

Seventeen (17) existing, forty-seven (47) proposed projects, and the Wastewater Impact Fee Study were identified to develop the Wastewater Impact Fee Capital Improvements Plan. The total project cost (*not* impact fee eligible cost) to be evaluated is \$1,222,435,449.

Recoverable Project Costs

Impact Fees are a one-time fee meant to recover the incremental cost of the impact of each new unit of development creating new infrastructure needs within a ten-year window. With this consideration, the maximum assessable impact fee does not specifically cover the entire cost of a water or wastewater project. The calculations that determine the percentage of a project's cost that is impact fee eligible are defined as the project's recoverable cost.

Water Recoverable Project Costs

The recoverable costs for water projects are calculated by determining the increase in water demand due to growth over the 10-year window. The City's current and future water demand were utilized to calculate the percent utilization of each identified impact fee eligible project. The change in utilization of each project is multiplied by the total project cost to determine total recoverable project cost. The total recoverable costs for the water distribution system are \$535,273,791 (pre-finance).

Wastewater Recoverable Project Costs

The recoverable costs for wastewater projects are calculated by determining the increase in wastewater flows due to growth over the 10-year window. The City's current and future flow projections were utilized to calculate the percent utilization of each identified impact fee eligible project. The change in utilization of each project is multiplied by the total project cost to determine total recoverable project cost. The total recoverable costs for the wastewater collection system are \$686,981,671 (pre-finance).

Maximum Assessable Impact Fee Calculation

In simplest terms, the maximum impact fee allowable by law is calculated by dividing the recoverable cost of the Capital Improvement Plans by the number of new service units of development. In accordance with state law, both the cost of the Capital Improvement Plan and the number of new service units of development

used in the equation are based on the growth and corresponding capacity needs projected to occur within a 10-year window.

In practice, there are many factors that complicate this calculation. The 2025 maximum impact fee allowable by law for each service area is shown in the following table:

Water Maximum Impact Fee by Service Areas		
Service Area 1A	Service Area 1B	Service Area 2
\$1,820	\$10,745	\$12,139

Wastewater Maximum Impact Fee by Service Areas		
Pecan Creek Service Area	Hickory Creek Service Area	Clear Creek Service Area
\$11,615	\$14,324	\$17,837

Adoption Process

Chapter 395 of the Texas Local Government Code stipulates a specific process for the adoption of Impact Fees. A Capital Improvements Advisory Committee (CIAC) is required to review the Land Use Assumptions and the Impact Fee Capital Improvements Plan used in calculating the maximum fee, and to provide the Committee’s findings for consideration by the City Council. This CIAC also reviews the calculation and resulting maximum fees and provides its findings to the City Council. The composition of the CIAC is required to have adequate representation of the building and development communities. In Denton, the CIAC members include real estate, development, and building industry professionals including an ETJ representative. The City Council then conducts a public hearing on the Land Use Assumptions, Impact Fee Capital Improvements Plan, and Impact Fee Ordinance.

Following policy adoption, the CIAC is tasked with advising the City Council of the need to update the Land Use Assumptions or the Impact Fee Capital Improvements Plan at any time within five years of adoption. Finally, the CIAC oversees the proper administration of the Impact Fee, once in place, and advises the Council as necessary.

Chapter 395 of the Texas Local Government Code requires a minimum of one (1) public hearing before Council to amend an existing impact fee program.

CHAPTER

1 LAND USE ASSUMPTIONS

1.1 INTRODUCTION

Chapter 395 of the Texas Local Government Code describes the procedure Texas cities must follow in order to create and implement Impact Fees. Senate Bill 243 (SB 243) amended Chapter 395 to define an Impact Fee as “a charge or assessment imposed by a political subdivision against new development in order to generate revenue for funding or recouping the costs of capital improvements or facility expansions necessitated by and attributable to the new development.”

Chapter 395 mandates that Impact Fees be reviewed and updated at least every five (5) years. The City of Denton’s Water and Wastewater Impact Fee Program was last updated in 2019. The City of Denton has initiated a review of its Land Use Assumptions, Impact Fee Capital Improvements Plan, and Impact Fees. The City has retained Kimley-Horn and Associates, Inc. to provide professional services for the update to the adopted 2025 Water and Wastewater Impact Fee Study. The Land Use Assumptions, which include population and service unit projections, form the basis for the development of the Impact Fee Capital Improvements Plans for water and wastewater facilities.

In order to assess an impact fee, Land Use Assumptions must be developed to provide the basis for population and associated service unit growth projections within a political subdivision. As defined by Chapter 395 of the Texas Local Government Code, these assumptions include a description of changes in land uses, densities, and service units in the service areas. In addition, these assumptions are useful in assisting the City of Denton in determining the need and timing of capital improvements to serve future development.

In accordance with Chapter 395, information from the following sources was compiled to complete the Land Use Assumptions:

- City of Denton’s 2040 Comprehensive Plan;
- 2023 Wastewater Master Plan;
- 2024 Water Master Plan;
- City of Denton Planning and Development Services.

1.2 COMPONENTS OF THE LAND USE ASSUMPTIONS CHAPTER

The Land Use Assumptions include the following components

METHODOLOGY AND 10-YEAR GROWTH ASSUMPTIONS

An overview of the general methodology used to generate the land use assumptions and walk through of the growth projections for 2024-2034.

IMPACT FEE STUDY AREAS

Explanation of the distribution of service areas within Denton for water and wastewater facilities.

LAND USE ASSUMPTIONS SUMMARY

A synopsis of the land use assumptions.

DRAFT

1.3 METHODOLOGY AND 10-YEAR GROWTH ASSUMPTIONS

The population growth projections formulated in this report were done using reasonable and generally accepted planning principles. The following documents and factors were considered in developing these projections:

- Character, type, density, location and quantity of existing development.
- Probable future developments.
- Availability of land for future expansion.
- The Future Land Use Plan illustrated in the 2040 Comprehensive Plan.
- Population Projections (from the 2023 Wastewater Master Plan and 2024 Water Master Plan).

The City provided land use type, density, and phasing (if available) for incoming developments, including large multi-phase developments. Developers provided land use type, density, and phasing for any incoming Municipal Utility Districts (MUDs) identified with the Extra Territorial Jurisdiction (ETJ). Known developments are shown on **Exhibit 1.1**. The phasing information of the larger multi-phase developments and MUDs is listed in **Table 1.1**.

Table 1.1 Probable Future Developments

	Development	Residential Units	
		5-Year	10-Year
Multi-Phase Development	Hunter-Cole	3,899	7,400
	Legends	1,820	1,836
	Hickory Creek	0	1,500
MUD	Rosebrook ^{1,2}	1,621	0
	Churchill	525	1,400
	Meadows	1,330	1,830
	Ponder Farms	525	592
	Sanctuary	1,000	2,500
	Rockwood ³	0	0
	Stonehill	0	0
	Tabor Ranch	2,220	2,820
	Webster Meadows	405	405
	Young Tracts	0	0

¹Phasing updated from 2023 Wastewater Master Plan (WWMP) based on most recent data provided by developer

²The 2023 WWMP refers to Rosebrook as Astra

³The 2023 WWMP refers to Rockwood as Sherwood

Growth projections detailed in Denton’s Water and Wastewater Master Plans established growth trendlines based on the information from Table 1.1 and the results are illustrated on **Figure 1.1**. Average annual growth projections of 8.1% and 3.5% are shown for the next 5 and 10-year planning periods.

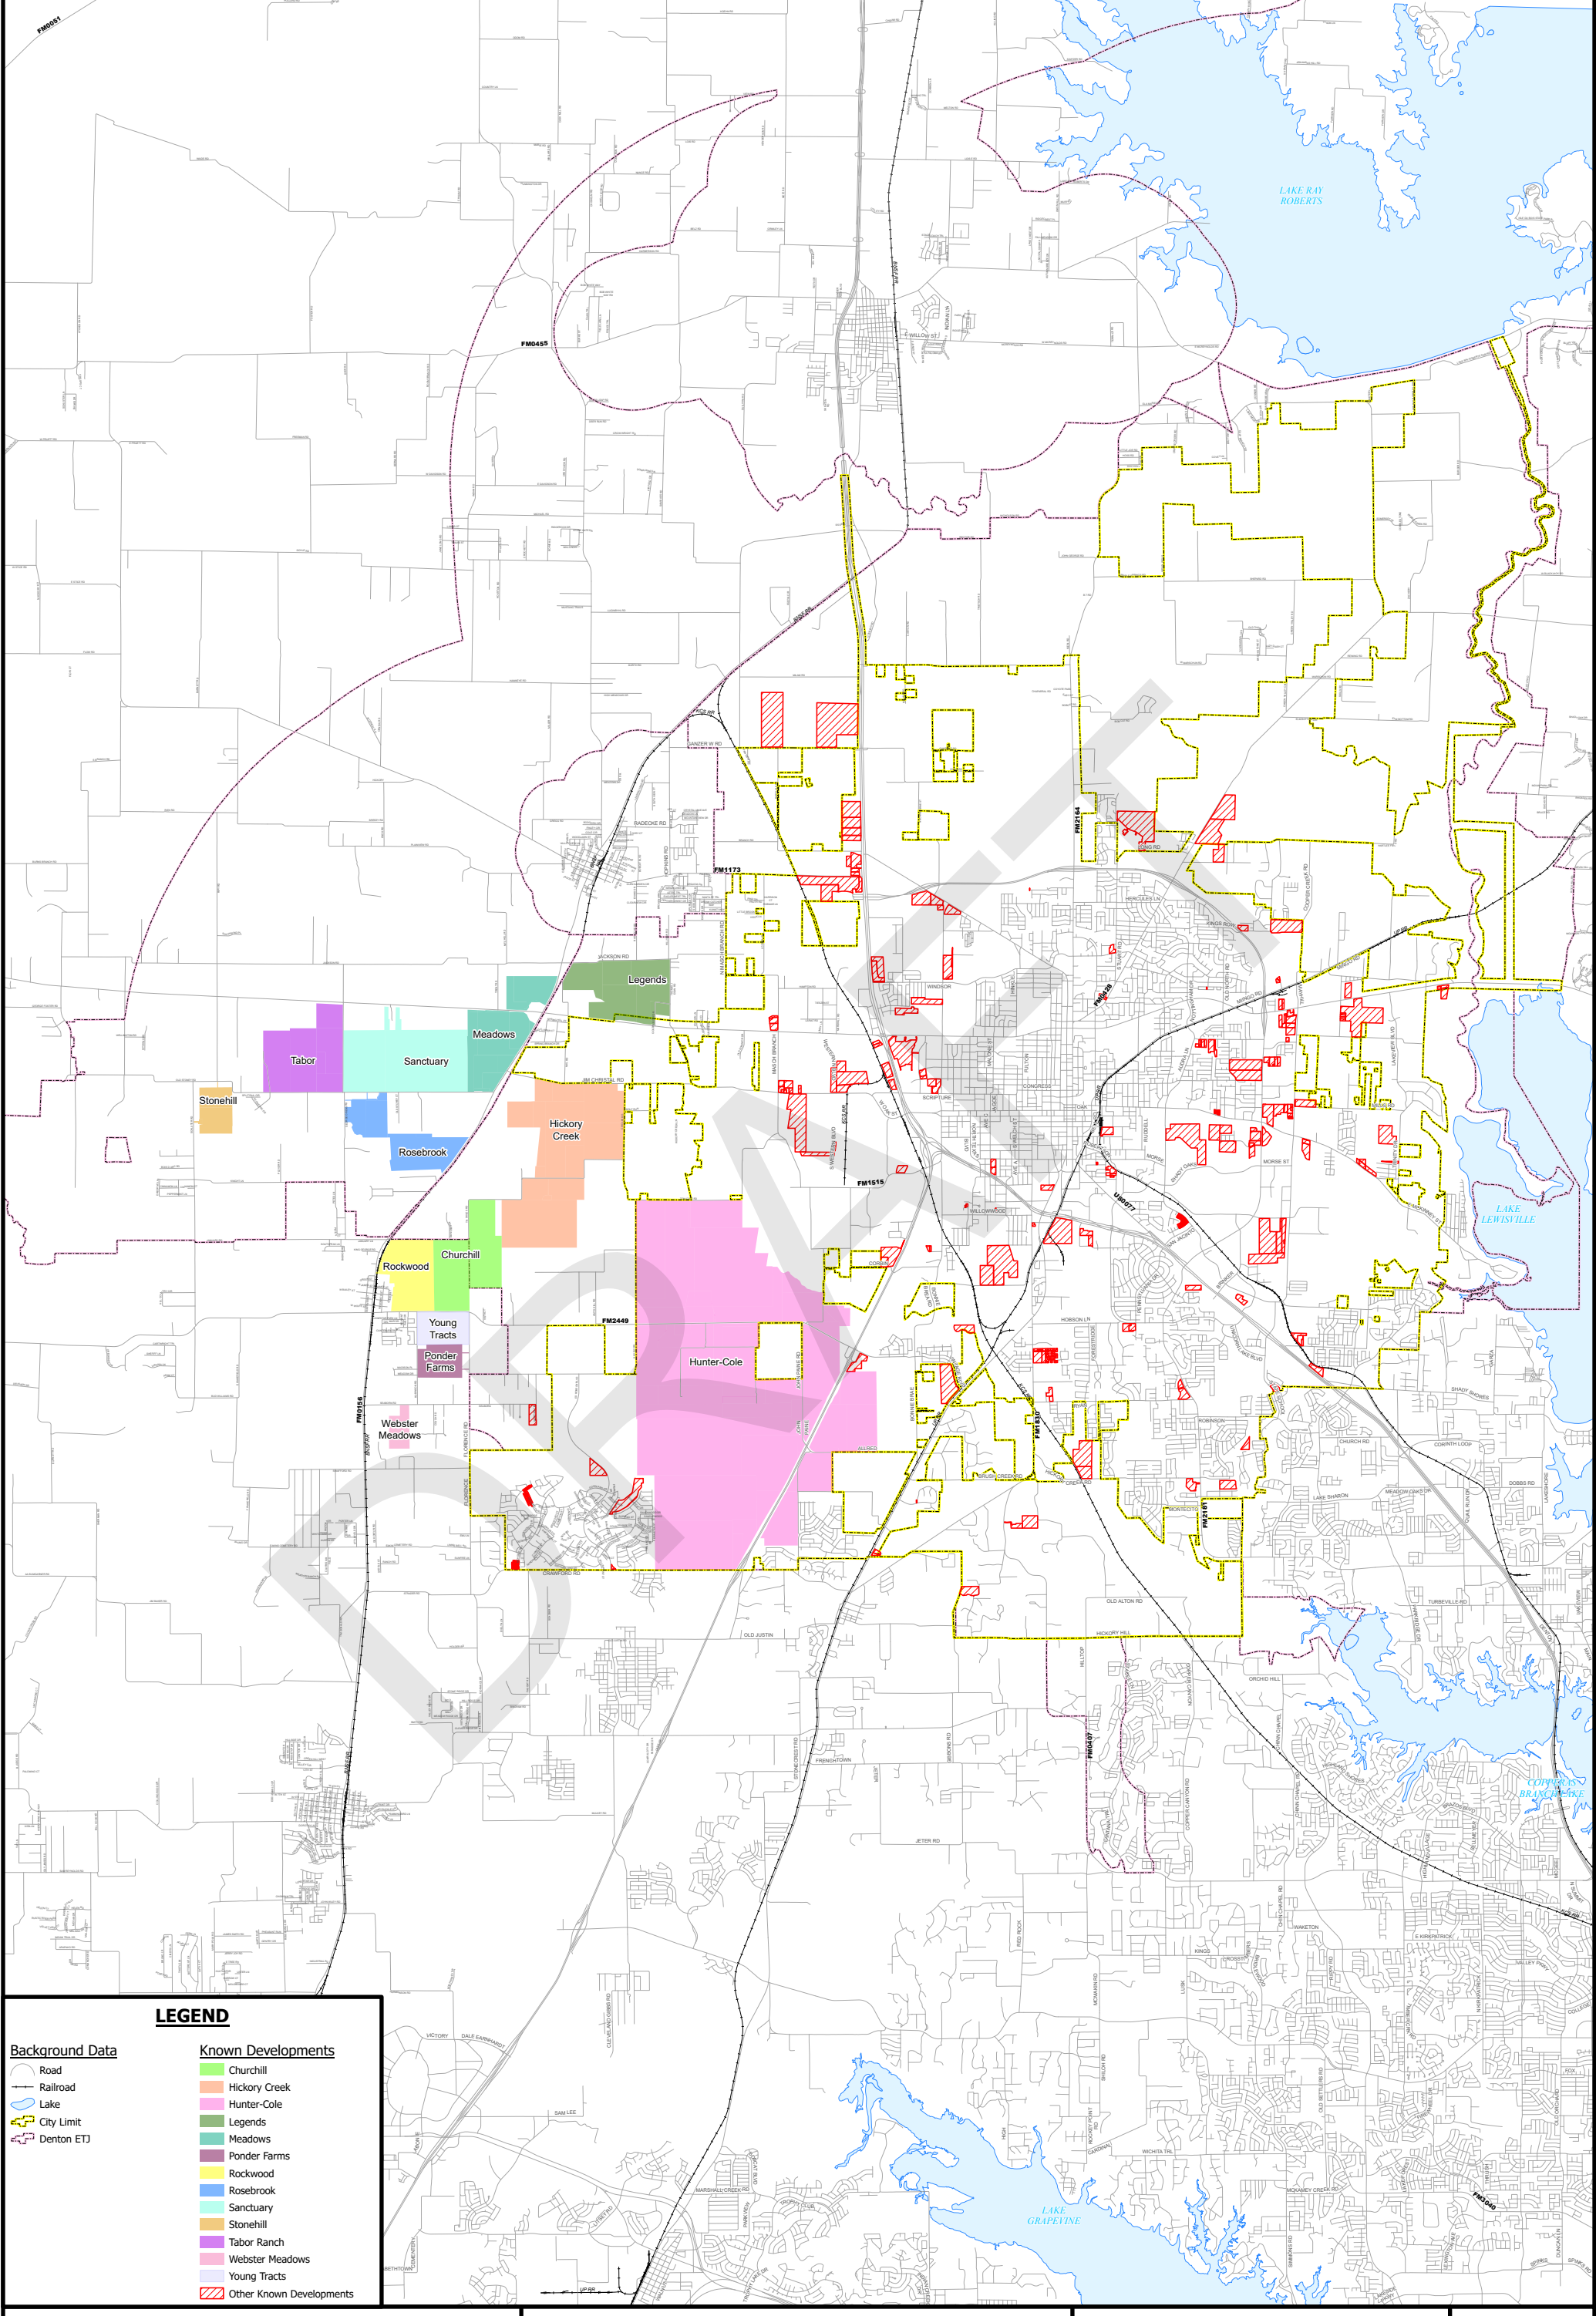

Figure 1.1 City of Denton Growth Assumptions

Based on the 10-year growth projections, summarizing population and service units from 2023 to 2033, are projected to be:

- Population Growth = 114,000
- Water Service Unit Growth = 52,774
- Wastewater Service Unit Growth = 52,276

Future growth by land use type is based on the Future Land Use Plan (See Exhibit 1.2) shown in the 2040 Comprehensive Plan.

1.4 IMPACT FEE SERVICE AREAS

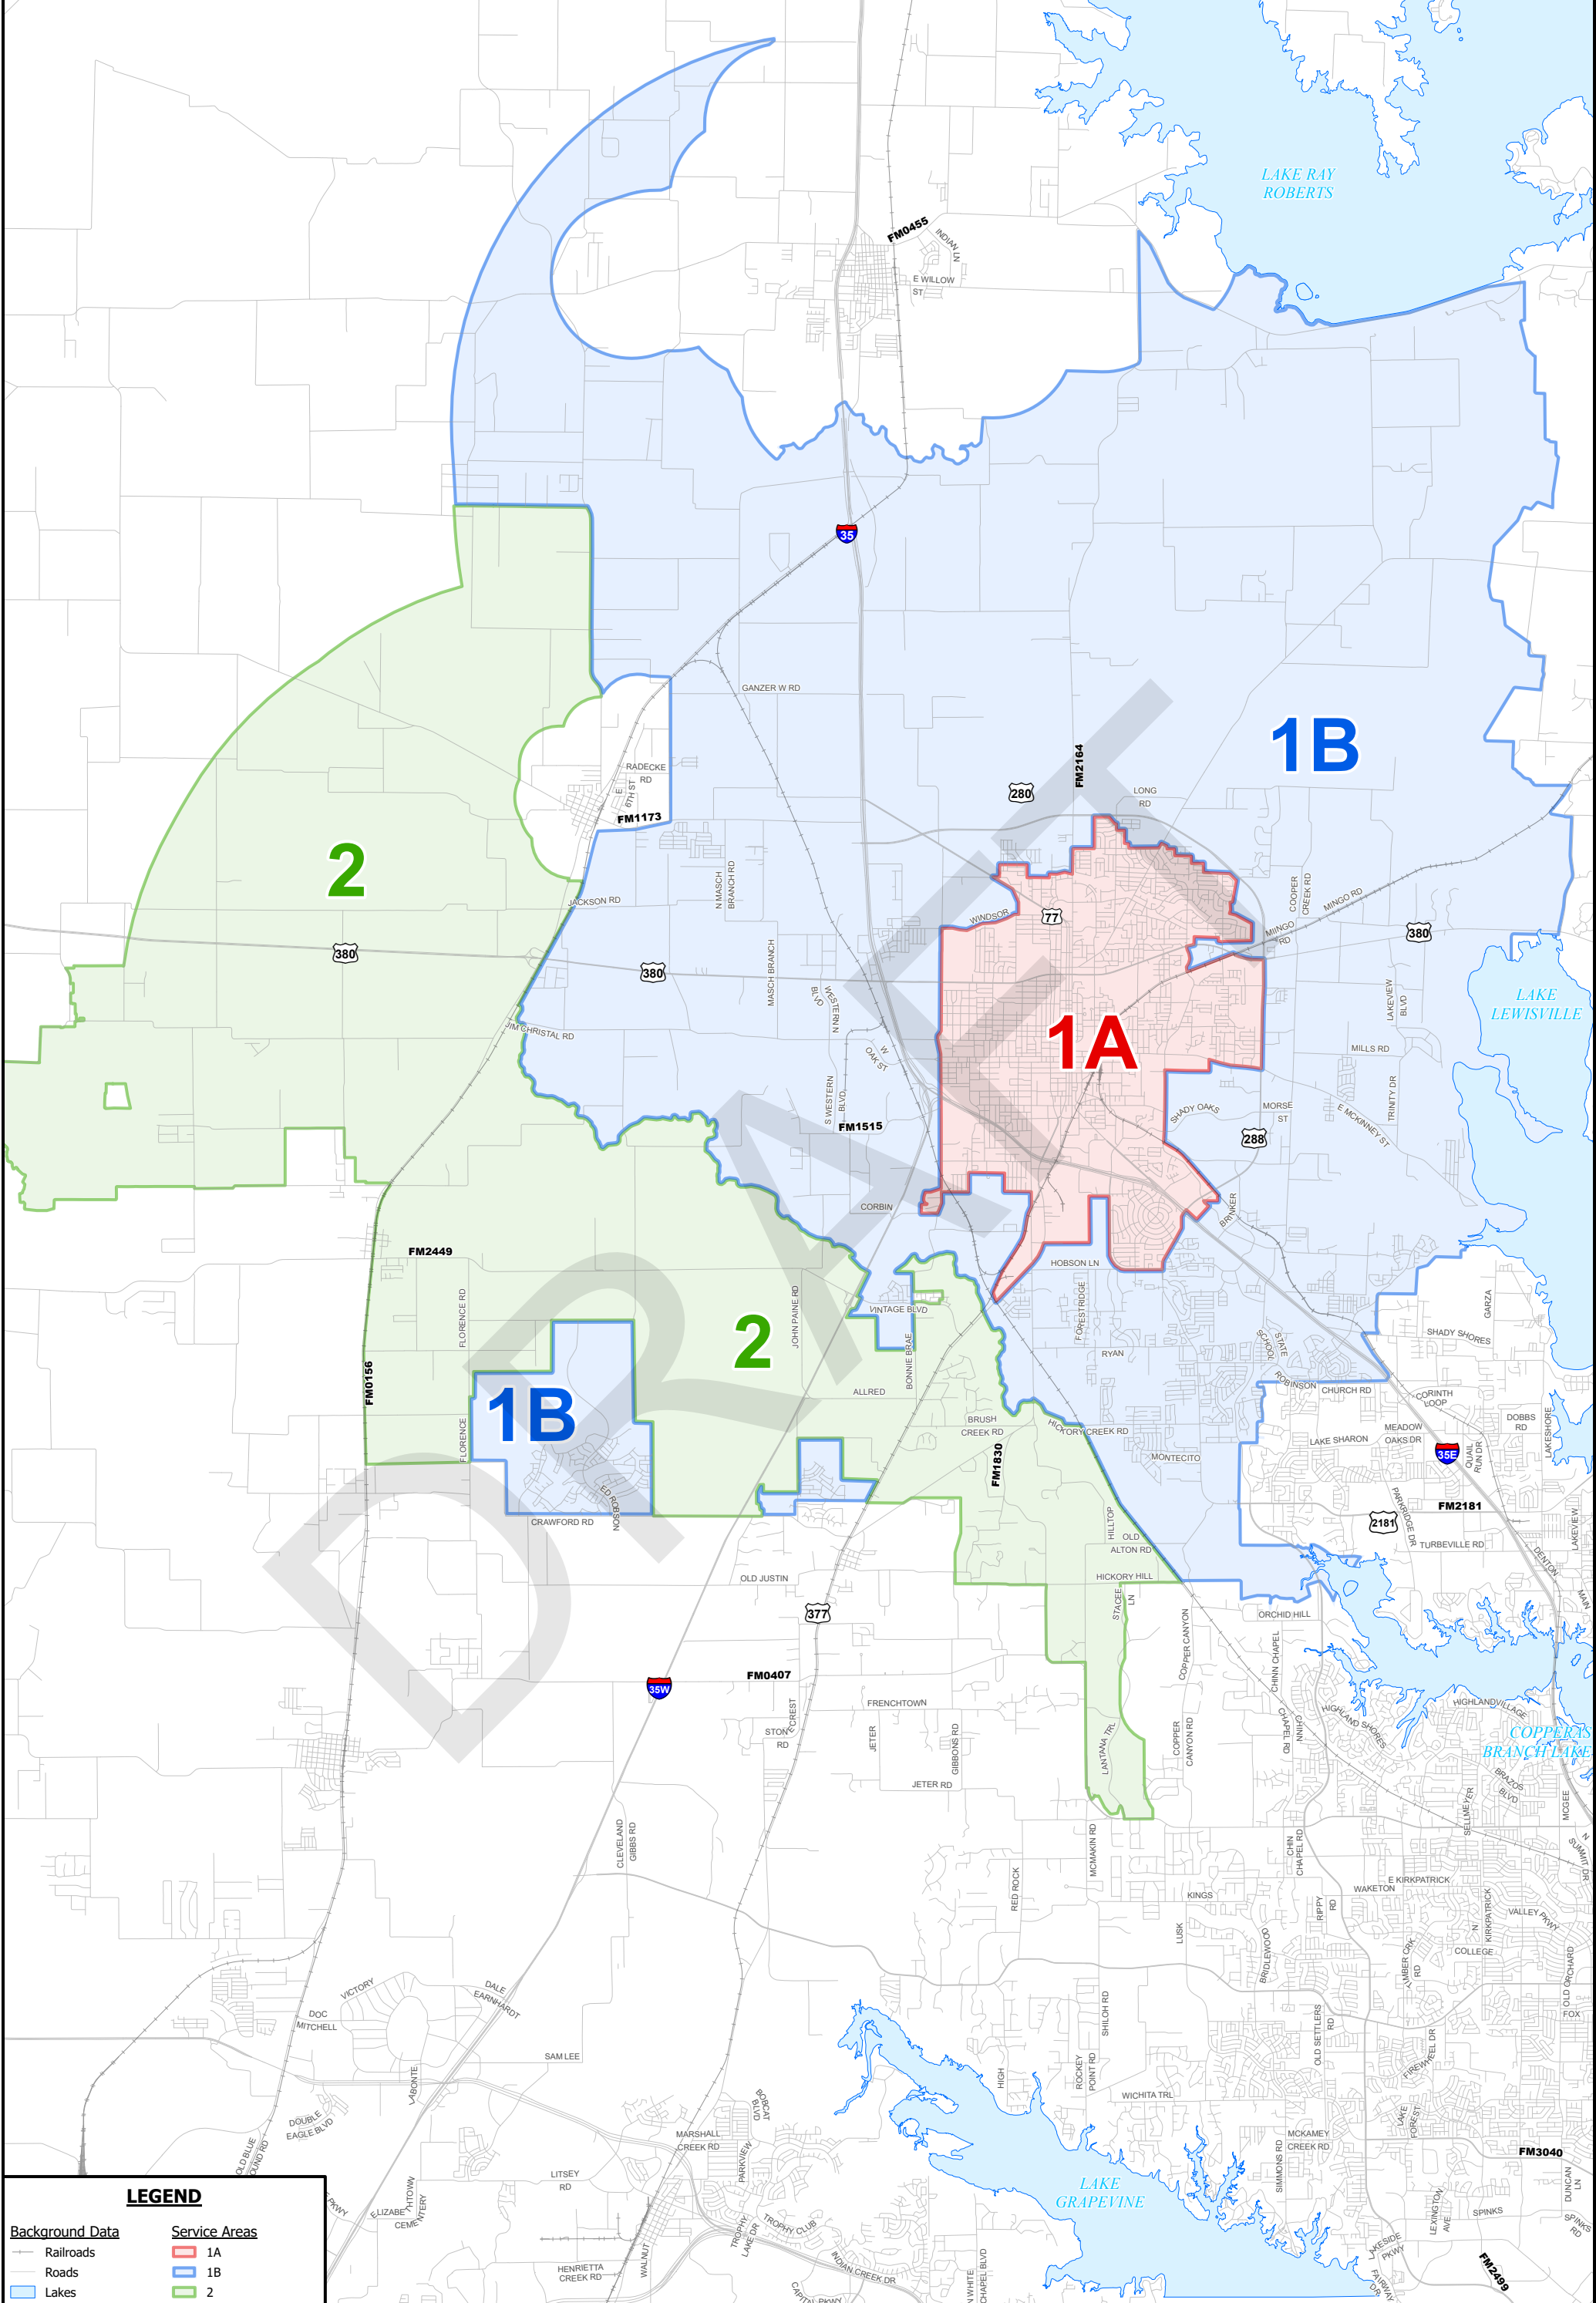

SERVICE AREA DEFINITION

According to Chapter 395 of the Local Government Code, a Service Area refers to the area within the corporate boundaries or extraterritorial jurisdiction of the political subdivision to be served by the capital improvement or facilities specified in the Capital Improvement Plan. Funds collected in the specific service areas must be spent in the service area collected.

WATER AND WASTEWATER IMPACT FEE SERVICE AREAS

The geographic boundary of the proposed water and wastewater impact fee service areas for water and wastewater facilities is shown in **Exhibit 1.3** and **Exhibit 1.4**, respectively. The water and wastewater impact fee service areas include the City Limits and extends throughout the ETJ.

1.5 DATA FORMAT

The population and service unit estimates were all compiled in accordance with the following categories and format:

IMPACT FEE SERVICE AREAS:

Large zones, which correspond to the water and wastewater facilities service area (as described in the previous section).

SERVICE UNITS:

Number of water and wastewater connections based on existing and proposed in the next 10-years.

DRAFT

1.6 SUMMARY

The following is the land use assumptions summary for the City of Denton utilized in the impact fee development. Base growth projections for the City of Denton, summarizing connections from 2023 to 2033, are projected to be:

- Water Service Area 1A = 1,616 Connections
- Water Service Area 1B = 29,427 Connections
- Water Service Area 2 = 21,731 Connections
- Water Wastewater Service Area Pecan Creek = 7,616 Connections
- Water Wastewater Service Hickory Creek = 35,412 Connections
- Wastewater Service Area Clear Creek = 9,248 Connections

CHAPTER

2

WATER IMPACT FEE STUDY

2.1 INTRODUCTION

The City of Denton retained the services of Kimley-Horn and Associates, Inc., for the purpose of updating the Impact Fees for water system improvements required to serve new development.

The purpose of this report is to satisfy the requirements of the law and provide the City with an impact fee capital improvements plan and associated Impact Fees.

For convenience and reference, the following is excerpted from Chapter 395 of the code:

- (a) *The political subdivision shall use qualified professionals to prepare the capital improvements plan and to calculate the impact fee. The capital improvements plan must contain specific enumeration of the following items:*
- (1) *a description of the existing capital improvements within the service area and the costs to upgrade, update, improve, expand, or replace the improvements to meet existing needs and usage and stricter safety, efficiency, environmental, or regulatory standards, which shall be prepared by a qualified professional engineer licensed to perform such professional engineering services in this state;*
 - (2) *an analysis of the total capacity, the level of current usage, and commitments for usage of capacity of the existing capital improvements, which shall be prepared by a qualified professional engineer licensed to perform such professional engineering services in this state;*
 - (3) *a description of all or the parts of the capital improvements or facility expansions and their costs necessitated by and attributable to new development in the service area based on the approved land use assumptions, which shall be prepared by a qualified professional engineer licensed to perform such professional engineering services in this state;*
 - (4) *a definitive table establishing the specific level or quantity of use, consumption, generation, or discharge of a service unit for each category of capital improvements or facility expansions and an equivalency or conversion table establishing the ratio of a service unit to various types of land uses, including but not limited to residential, commercial, and industrial;*
 - (5) *the total number of projected service units necessitated by and attributable to new development within the service area based on the approved land use assumptions and calculated in accordance with generally accepted engineering or planning criteria;*
 - (6) *the projected demand for capital improvements or facility expansions required by new service units projected over a reasonable period of time, not to exceed 10 years; and*
 - (7) *plan for awarding:*

- (A) a credit for the portion of ad valorem tax and utility service revenues generated by new service units during the program period that is used for the payment of improvements, including the payment of debt, that are included in the capital improvements plan; or
- (B) in the alternative, a credit equal to 50 percent of the total project cost of implementing the capital improvements plan.

The impact fee study includes information from the 2024 Water System Master Plan being completed at this time. The Impact Fees are based on recommended capital improvements outlined in the Draft Water System Master Plan, input from City Staff, and the growth projections shown in the Land Use Assumptions Chapter of this report.

The study process was comprised of four tasks:

LAND USE ASSUMPTIONS

The land use assumptions used for this report were created by Kimley-Horn with input provided by the City of Denton and the Denton 2040 Comprehensive Plan. The development of land use assumptions included the following:

- Establishing impact fee service areas;
- Collection/determination of service units service area; and
- Projection of the ten-year service units by service area.

A detailed discussion is outlined in the Land Use Assumptions Chapter of this report.

EVALUATION OF WATER SYSTEM MASTER PLAN

This task involved reviewing the 2024 Water System Master Plan and its growth projection compatibility with the Land Use Assumptions. The water demand projections were then used to determine the additional service units.

IMPACT FEE CAPITAL IMPROVEMENTS PLAN

This task involved reviewing the impact fee water capital improvements plan outlined in 2019 Impact Fee Study and the 2024 Water Master Plan. Discussions were also held with City Utility staff to identify projects that will be constructed in the 10-year planning window and meet the design criteria.

IMPACT FEE ANALYSIS AND REPORT

This task included calculating the additional service units, and credit reduction. These values were then used to determine the impact fee per service unit and the maximum assessable water impact fee by meter size.

2.2 DESIGN CRITERIA

In accordance with Chapter 290 of the Texas Administrative Code (Public Drinking Water) and the design criteria in the 2024 Water Master Plan, the following design criteria is followed when planning for future water infrastructure.

WATER LINES

Water distribution and transmission lines shall be sized to maintain a minimum of 35 pounds per square inch (psi) throughout the system during peak hour demands conditions. In addition to this, the transmission lines shall be designed for a maximum 3.0 feet per second.

STORAGE TANKS

(a) *Elevated Storage Tanks*

Elevated storage serves three purposes:

- Functionally, elevated storage equalizes the pumping rate to compensate for daily variations in demand and to maintain a fairly constant pumping rate (usually referred to as operational storage), or a pumping rate that conforms to the requirements of the electrical rate structure.
- Provides pressure maintenance and protection against surges created by instantaneous demand, such as fire flow and main breaks, and instantaneous change in supply, such as pumps turning on and off.
- Maintains a reserve capacity for fire protection and pressure maintenance in case of power failure to one or more pump stations. Sufficient storage should be maintained to provide four hours of fire flow demand during a loss of power to the pump station.

City criterion for elevated storage is provide sufficient capacity to satisfy ISO Fire Rating plus city wide maximum day demand.

Suggested storage capacity established by the TCEQ is adequate operational storage established by determining the required volume to equalize the daily fluctuations in flow during the maximum day demand, plus the reserve volume required for fire protection.

The minimum requirements for storage, according to Chapter 290 of the Texas Administrative Code, are as follows:

- Total Storage - Equal to 200 gallons per connection.
- Elevated Storage - Equal to 100 gallons per connection; or
- Elevated Storage – Equal to 200 gallons per connection for a firm pumping capacity reduction from 2.0 gallons per connection to 0.6 gallons per connection.

(b) Ground Storage Tanks

Ground storage serves two functions:

- Equalization for differing feed rates between the water supply and pumping to the system; and
- Emergency capacity in the event of temporary loss of water supply.

Generally, ground storage facilities are located at water supply points or at each pump station within the water distribution system. The design criteria recommended to size ground storage tank capacity within each pressure plane is to provide adequate storage volume to meet 8 hours of maximum day demand. In addition to these criteria for elevated and ground storage, the City must also meet TCEQ total storage capacity requirements of 200 gallons per connection.

PUMP STATIONS

Pumping capacities must provide the maximum demand, or the peak hour demand required by the water system or the suggested capacities established by the TCEQ. Pumping capacity should supply the maximum demand with sufficient redundancy to allow for the largest pump at the pump station to be out of service. This is known as firm pumping capacity.

Each pump station or pressure plane must have two or more pumps that have a total capacity of 2.0 gallons per minute per connection, or have a total capacity of at least 1,000 gallons per minute and the ability to meet peak hour demand with the largest pump out of service, whichever is less. If the system provides elevated storage capacity of 200 gallons per connection, two service pumps with a minimum combined capacity of 0.6 gpm per connection are required.

2.3 IMPACT FEE CAPITAL IMPROVEMENTS PLAN

The purpose of the Water Master Plan is to provide the City with a logical strategy for upgrading and expanding its water distribution system to accommodate future growth and for addressing existing system deficiencies. The Water Master Plan and the recommended system improvements are developed to accommodate growth through the 25-year planning period. The Impact Fee Capital Improvements Plan is developed using projects identified during the master planning process and through discussions with utility staff. State law only allows cost recovery associated with eligible projects in a ten (10) year planning window from the time of the impact fee study. The following details the projects and the eligible recoverable cost.

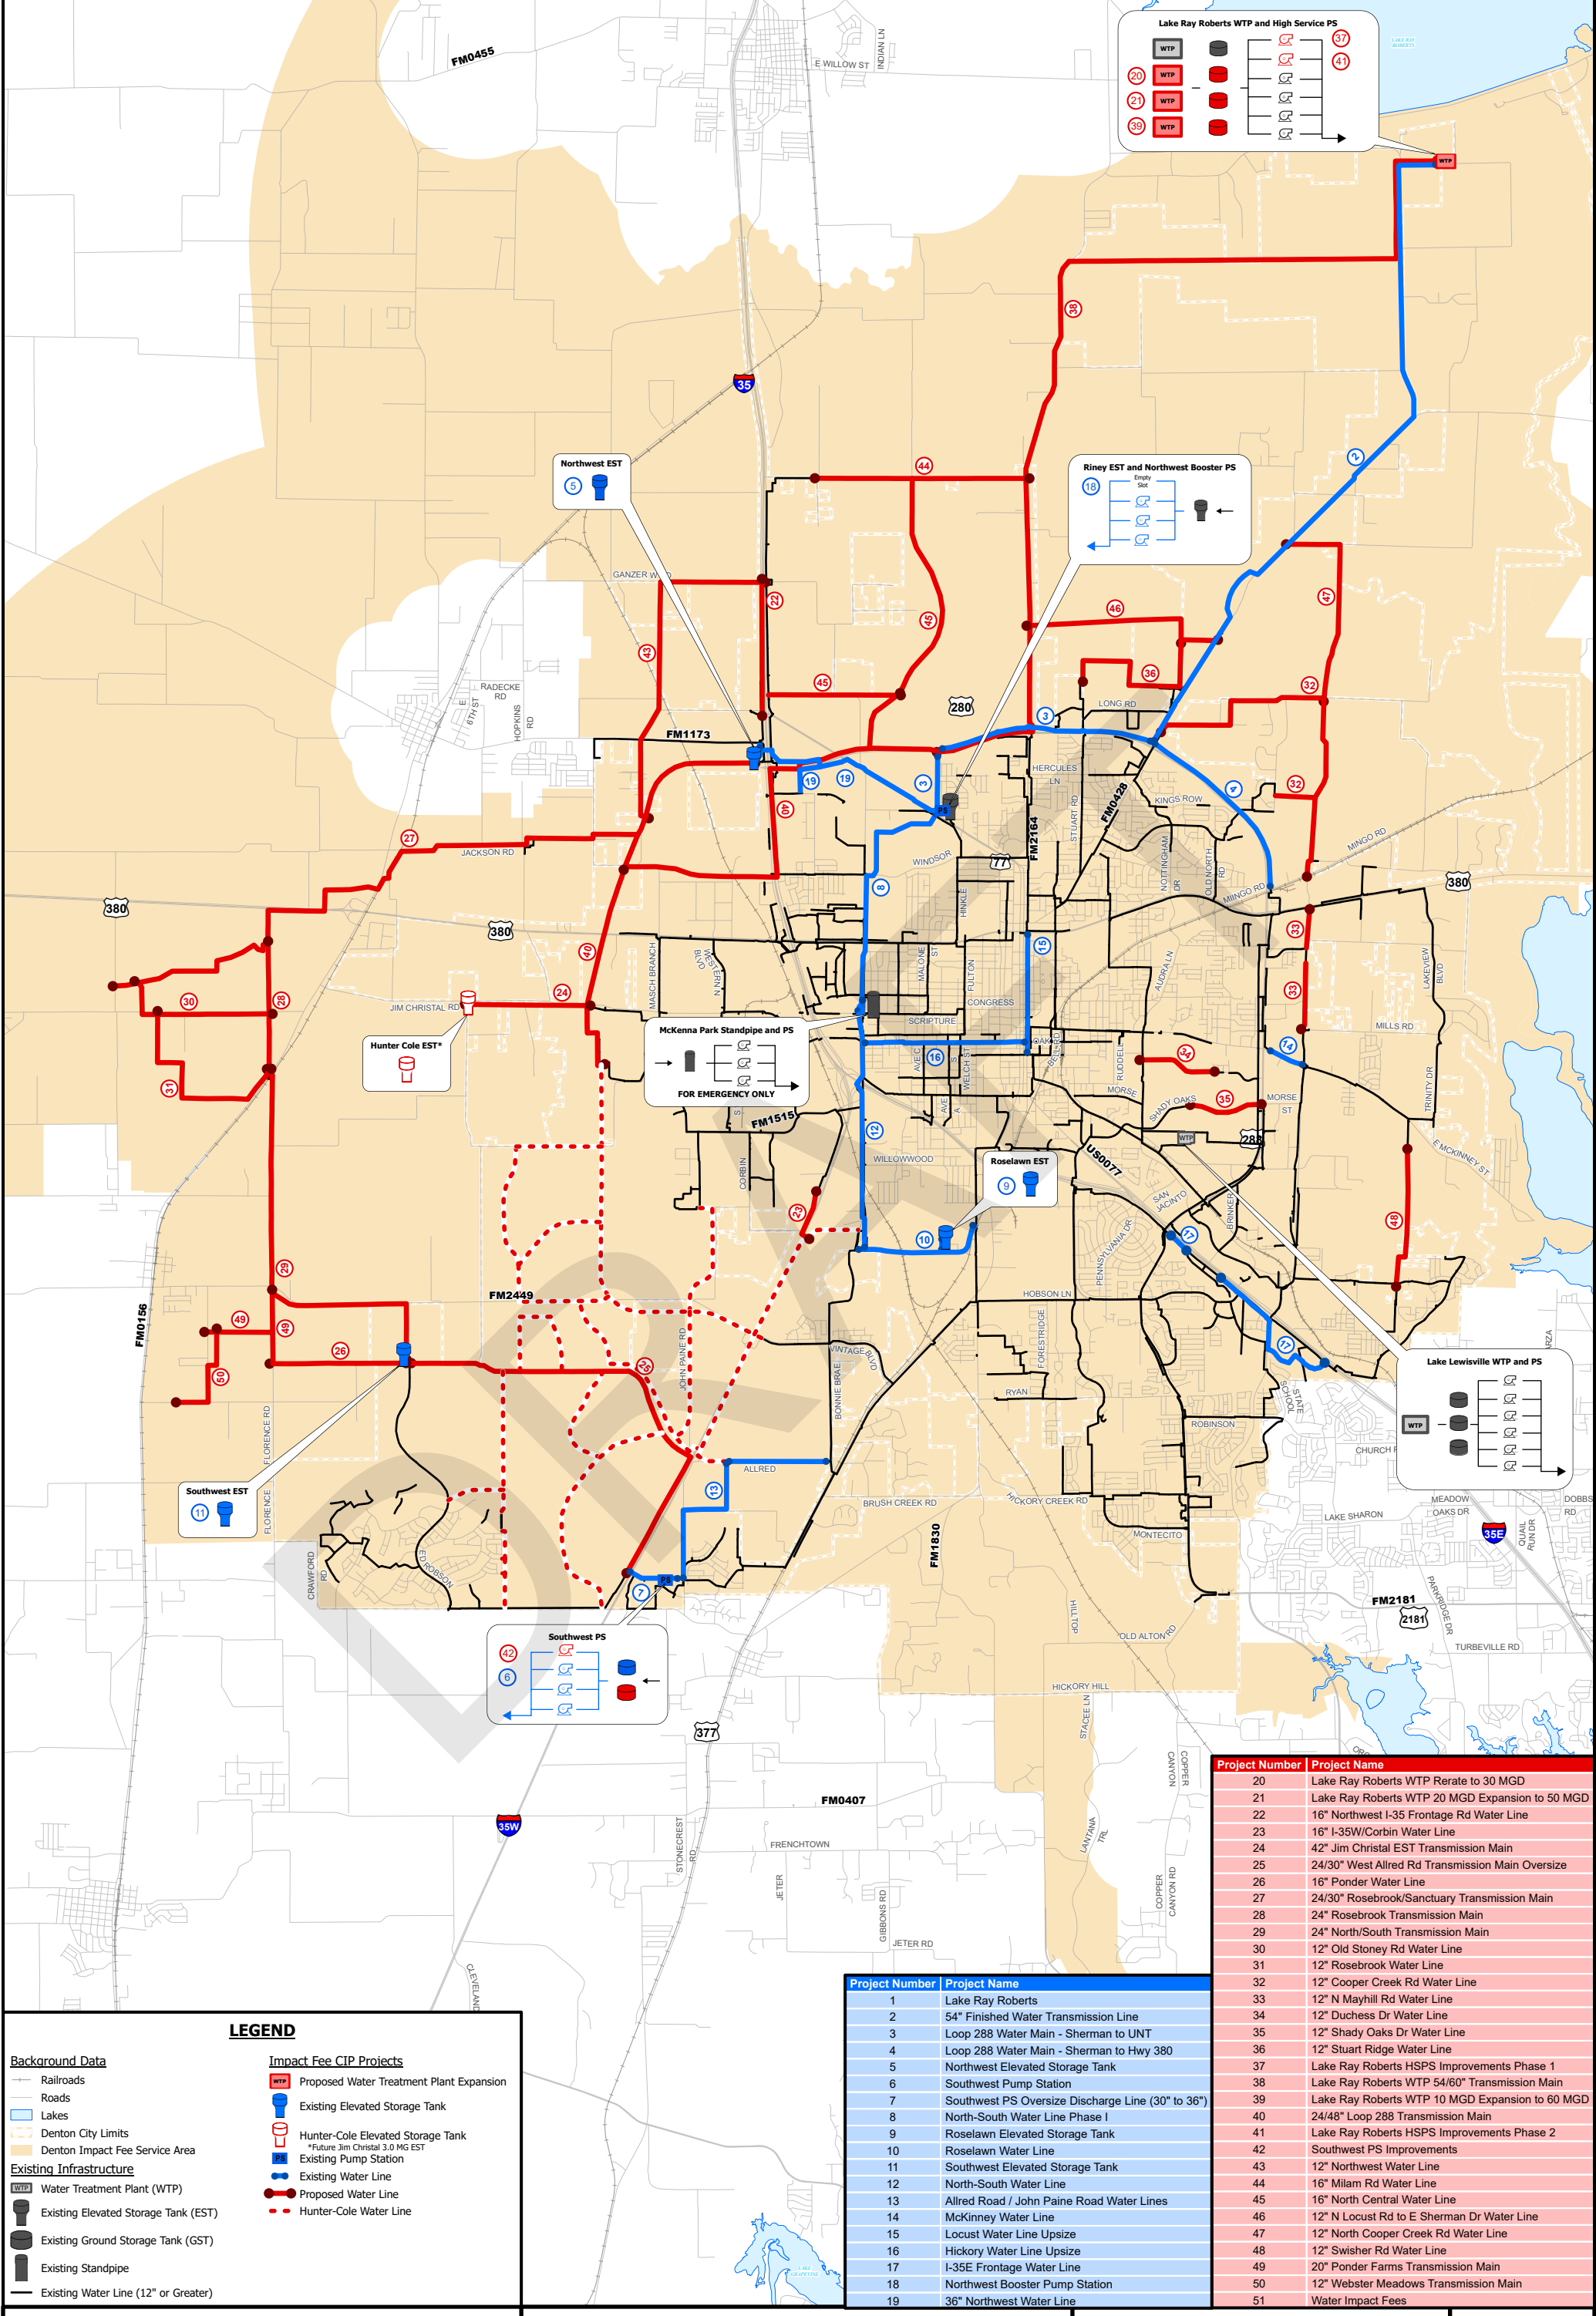

Nineteen (19) existing projects, thirty-one (31) proposed projects, and the Water Impact Fee Study are determined eligible for recoverable cost through impact fees over the next 10 years. The total cost of these projects is **\$1,003,063,455**. The projected total recoverable through impact fees is **\$535,273,791**. After debt service costs are added and the credit reduction calculation is complete, **\$582,923,277** is

recoverable through Impact Fees serving the 10-year system needs. These impact fee capital improvements are shown in **Table 2.1** and illustrated in **Exhibit 2.1**.

2.4 WATER IMPACT FEE CALCULATION

SERVICE UNITS

Chapter 395 of the Local Government Code defines a service unit as follows, “Service Unit means a standardized measure of consumption attributable to an individual unit of development calculated in accordance with generally accepted engineering or planning standards and based on historical data and trends applicable to the political subdivision in which the individual unit of development is located during the previous 10 years.”

SERVICE UNIT CALCULATION

A single service unit for Denton’s water Impact Fees is the 5/8-inch x 3/4-inch meter. A service unit is the water demand of flow associated with the 5/8-inch x 3/4-inch meter, which is typically used by a single-family residence. All meters greater than 5/8-inch x 3/4-inch have a service unit multiplier determined by the ratio of each larger meter’s capacity to the capacity of the 5/8-inch x 3/4-inch meter. The current service unit multipliers (service units/meter) are shown in **Table 2.2**.

Table 2.2 Meter Capacity Ratios

Meter Size	Service Units/ Meter ¹
5/8"x3/4"	1
1"	2.5
1-1/2"	5
2"	8
3"	22.5
4"	50
6"	100
8"	200
10"	325

Multiplying the number of existing connections for each meter size by the number of service units per meter yields the total service units for that meter size. Summing all meter sizes yields the total number of water service units connected to the City’s water system as shown in **Table 2.3**. The current population in the water service area is divided by the total number of service units yielding a Persons per Service Unit number.

Table 2.3 Persons per Water Service Unit

Meter Size	Existing Connections ¹	Service Units/Meter	Service Units
5/8"	40,662	1	40,662
1"	1,761	2.5	4,403
1-1/2"	922	5	4,610
2"	1,532	8	12,256
3"	99	22.5	2,228
4"	26	50	1,300
6"	11	100	1,100
8"	32	200	6,400
10"	2	325	650
Total Existing Connections:		45,047	Total Service Units: 73,609
Total Served Population:			152,350
Persons per Service Unit:			2.07

(1) Data Sources: City of Denton

In accordance with Chapter 395 of the Texas Local Government Code, the City of Denton defines a service unit based on historical and projected water demands. The service unit is the development type that predominately uses a 5/8-inch x 3/4-inch meter. The measure of consumption per service unit is based on a 5/8-inch meter x 3/4-inch meter and the data shown in **Table 2.4**.

Table 2.4 Water Service Unit Consumption Calculation

Year	Population	Service Units (2.07 person/unit)	Water Average Day Demand (MGD) ¹	Demand per Service Unit (GPD)
2014	123,200	59,517	17.28	290

2034	270,865	130,852	40.87	312
Average Flow per Service Unit				303

(1) Data Source: City of Denton

Based on the City’s 10-year growth projections and the resulting water demand projections, water service will be required for an additional **52,774** Service Units by the year 2034 as shown in **Table 2.5**. The calculation is as follows:

- A service unit, which is a unit of development that consumes approximately **303** gallons per day (GPD), is a typical residential connection that uses a 5/8-inch x 3/4-inch meter.

Table 2.5 10-year Additional Service Unit Calculation

Year	Average Day Demand (MGD)	Service Unit Demand (GPD)	Projected Service Units
2024	24.875	303	82,096
2034	40.8657	303	134,870
10-year Additional Service Units			52,774

The City’s existing water system is divided into three service areas (Service Area 1A, 1B and 2 as indicated in the Land Use Assumptions chapter). The calculated 10-year additional services units has been distributed across the three services areas based on projected growth and its associated water demand projections as shown in **Table 2.6**.

Table 2.6 10-year Additional Service Units by Service Area

Year	Service Area 1A	Service Area 1B	Service Area 2	Total
2024 Service Units	32,060	48,694	1,342	82,096
2034 Service Units	33,676	78,121	23,073	134,870
10-Year Service Units	1,616	29,427	21,731	52,774

2.5 PLAN FOR AWARDED IMPACT FEE CREDIT

Impact fee law allows for a credit calculation to credit back the utility revenues or ad valorem taxes that are allocated for paying a portion of future capital improvements. The intent of this credit is to prevent the City from double charging development for future capital improvements via Impact Fees and utility rates. If the City chooses not to do a financial analysis to determine the credit value, they are required by law to reduce the recoverable cost by fifty (50) percent. The City chose to perform a financial analysis.

MAXIMUM ASSESSABLE IMPACT FEE DETERMINATION

The impact fee determination method employed by NewGen Strategies and Solutions, LLC is developed through a financial based model that recognizes the requirements of Chapter 395, including the recognition of cash and/or debt financing, interest earnings, fund balances, and applicable credits associated with the use of utility revenues. In developing the components of the financial model, assumptions must be made that include the following:

- Financing
 - Method of financing (i.e. cash or debt financing)
 - The level of financing (e.g. 100% debt)
 - Cost of financing
 - Debt repayment structure
- Timing and Level of Expenditures and Revenues
- Interest Earnings
- Annual Service Unit Growth
- Portion of Utility Revenue Used to Fund Impact Fee Water Improvements

While the assumptions employed in determining the maximum assessable impact fee are a reasonable basis for forecasting, these assumptions may not reflect actual future conditions. To address this, Chapter 395 requires the monitoring of Impact Fees through the Capital Improvement Advisory Committee (CIAC) who can then update or revise Impact Fees to reflect the actual implementation of the impact fee program.

FINANCING

Once the cost of capacity added that is attributable to growth is determined, a City must decide how the cost will be financed: cash and/or debt. Actual costs of capital for any previously funded projects, whether partially or fully funded, are also included.

Based on discussions with City staff, it is assumed that the City will debt finance the future project costs. For debt financing, the cost of financing is based on the City’s Financial Advisor’s estimates of future debt costs for bonds issued with 30-year terms as shown in the Water Financial Analysis Appendix of this report. Debt service payments for each future debt issue are assumed to remain constant over the issue’s term.

TIMING AND LEVEL OF EXPENDITURES AND REVENUES

The exact timing and annual level of cash capital expenditures over the forecast period is currently indeterminate, therefore it is assumed that capital expenditures will occur in amounts over the 10-year program period. It is also assumed that the City will expand debt proceeds over a 2-year timeframe for debt-financed capital projects. For the calculation of the maximum assessable impact fee, debt is assumed to be issued in equal amounts for each year. In order to recognize the full amount of debt to be issued for the cost of capacity added that is attributable to growth during the 10-year period, a portion of years eight, nine, and ten are assumed to be spend in the final three years.

INTEREST EARNINGS

While debt is issued over 30-year terms and Impact Fees developed are to be charged over a 10-year period, a sufficient fund balance must be generated to meet the future debt service obligations. Fund balances were identified for each service area as a potential source for the current Impact Fee CIP.

Because of the generation of the fund balance, excess monies will be available for interest earnings.

Chapter 395 states that interest earnings are funds of the impact fee account and are to be held to the same restrictions as impact fee revenues. In order to recognize that interest earnings are used to fund only impact fee eligible improvements, interest earnings are credited against the costs recoverable through Impact Fees. Chapter 395 does not require the upfront recognition of interest earnings in the impact fee determination. To acknowledge the time value of the impact fee payer's monies, interest earnings have been credited. For this analysis, interest is assumed to be earned at an annual rate of 1.89% per 10-year historical average.

ANNUAL SERVICE UNIT GROWTH

The timing and annual level of service unit growth over the 10-year program period is currently indeterminate, therefore it is assumed that service unit growth will be consistent over the 10-year forecast.

PORTION OF UTILITY REVENUE USED TO FUND IMPACT FEE WATER IMPROVEMENTS

Credit for the portion of ad valorem tax and/or utility service revenues generated by new service units during the program period are used for payment of the improvements included in the Water Impact Fee CIP. The credit is not a determination to recognize the total utility revenue generated by new service units, but is a credit for the portion of utility revenue that is used for payment of the improvements included in the Water Impact Fee CIP. Theoretically, the credit determination could be zero (\$0) if the City does not utilize any of the new service unit utility revenue to fund improvements that are included in the Water Impact Fee CIP.

To be conservative and recognize potential cash flow issues that can occur with the funding of major capital improvement projects, it is assumed that the debt-funded projects (100% of the improvement costs included in the Water Impact Fee CIP but not otherwise funded) could potentially be funded by utility revenue.

When an impact fee program is in place, payments made through utility revenue will consist of revenue generated by new service units in the defined service area and existing service units throughout the City; therefore, the portion attributable to the new service units in the defined service area must be isolated. The credit calculation illustrating how the credit is isolated is shown in the Water Financial Analysis Appendix of this report.

2.6 MAXIMUM ASSESSABLE IMPACT FEE

A breakdown of the 10-year recoverable costs and the associated impact fee per service unit by service area is as follows:

Table 2.7 Service Area 1A - 10-Year Recoverable Cost Breakdown

Recoverable Impact Fee CIP Costs	\$2,454,148
Financing Costs	\$1,106,314
Interest Earnings	(\$604,035)
Pre Credit Recoverable Cost for Impact Fee	\$2,956,427
Credit for Utility Revenues	(\$15,105)
Maximum Recoverable Cost for Impact Fee	\$2,941,322

(1) Per NewGen Strategies and Solutions, LLC financial analysis, See Appendix A.

$$\text{Impact fee per service units} = \frac{\text{10-year recoverable costs}}{\text{10-year additional service units}}$$

$$\text{Impact fee per service units} = \frac{\$2,941,322}{1,616}$$

$$\text{Impact fee per service units} = \$1,820$$

Therefore, the maximum assessable water impact fee for Service Area 1A is **\$1,820**.

Table 2.8 Service Area 1B - 10-Year Recoverable Cost Breakdown

Recoverable Impact Fee CIP Costs	\$292,309,445
Financing Costs	\$129,102,582
Interest Earnings	(\$81,750,244)
Pre Credit Recoverable Cost for Impact Fee	\$339,661,783
Credit for Utility Revenues	(\$23,479,052)
Maximum Recoverable Cost for Impact Fee	\$316,182,731

(1) Per NewGen Strategies and Solutions, LLC financial analysis, See Appendix A.

$$\text{Impact fee per service units} = \frac{\text{10-year recoverable costs}}{\text{10-year additional service units}}$$

$$\text{Impact fee per service units} = \frac{\$316,182,731}{29,427}$$

$$\text{Impact fee per service units} = \$10,745$$

Therefore, the maximum assessable water impact fee for Service Area 1B is **\$10,745**.

Table 2.9 Service Area 2 - 10-Year Recoverable Cost Breakdown

Recoverable Impact Fee CIP Costs	\$240,510,198
Financing Costs	\$106,564,481
Interest Earnings	(\$68,197,039)
Pre Credit Recoverable Cost for Impact Fee	\$278,877,640
Credit for Utility Revenues	(\$15,078,415)
Maximum Recoverable Cost for Impact Fee	\$263,799,224

(1) Per Newgen Strategies and Solutions, LLC financial analysis, See Appendix A.

$$\text{Impact fee per service units} = \frac{\text{10-year recoverable costs}}{\text{10-year additional service units}}$$

$$\text{Impact fee per service units} = \frac{\$263,799,224}{21,731}$$

$$\text{Impact fee per service units} = \$12,139$$

Therefore, the maximum assessable water impact fee for Service Area 2 is **\$12,139**.

For a development that requires a different size meter, a service unit equivalent is established at a multiplier based on its capacity with respect to the 5/8-inch x 3/4-inch meter. The maximum impact fee that could be assessed for other meter sizes is based on the Equivalency Table (**Table 2.10**).

Table 2.10 Maximum Assessable Water Impact Fee by Service Area and Meter Size

Meter Size	Service Unit Equivalent	Service Area 1A Maximum Assessable Water Impact Fee	Service Area 1B Maximum Assessable Water Impact Fee	Service Area 2 Maximum Assessable Water Impact Fee
5/8"x3/4"	1	\$1,820	\$10,745	\$12,139
1"	2.5	\$4,550	\$26,863	\$30,348
1-1/2"	5	\$9,100	\$53,725	\$60,695
2"	8	\$14,560	\$85,960	\$97,112
3"	22.5	\$40,950	\$241,763	\$273,128
4"	50	\$91,000	\$537,250	\$606,950
6"	100	\$182,000	\$1,074,500	\$1,213,900
8"	200	\$364,000	\$2,149,000	\$2,427,800
10"	325	\$591,500	\$3,492,125	\$3,945,175

CHAPTER

3

WASTEWATER IMPACT FEE STUDY

3.1 INTRODUCTION

The City of Denton retained the services of Kimley-Horn and Associates, Inc., for the purpose of updating the Impact Fees for wastewater system improvements required to serve new development.

The purpose of this report is to satisfy the requirements of the law and provide the City with an impact fee capital improvements plan and associated Impact Fees.

For convenience and reference, the following is excerpted from Chapter 395 of the code:

- (b) The political subdivision shall use qualified professionals to prepare the capital improvements plan and to calculate the impact fee. The capital improvements plan must contain specific enumeration of the following items:*
- (1) a description of the existing capital improvements within the service area and the costs to upgrade, update, improve, expand, or replace the improvements to meet existing needs and usage and stricter safety, efficiency, environmental, or regulatory standards, which shall be prepared by a qualified professional engineer licensed to perform such professional engineering services in this state;*
 - (2) an analysis of the total capacity, the level of current usage, and commitments for usage of capacity of the existing capital improvements, which shall be prepared by a qualified professional engineer licensed to perform such professional engineering services in this state;*
 - (3) a description of all or the parts of the capital improvements or facility expansions and their costs necessitated by and attributable to new development in the service area based on the approved land use assumptions, which shall be prepared by a qualified professional engineer licensed to perform such professional engineering services in this state;*
 - (4) a definitive table establishing the specific level or quantity of use, consumption, generation, or discharge of a service unit for each category of capital improvements or facility expansions and an equivalency or conversion table establishing the ratio of a service unit to various types of land uses, including but not limited to residential, commercial, and industrial;*
 - (5) the total number of projected service units necessitated by and attributable to new development within the service area based on the approved land use assumptions and calculated in accordance with generally accepted engineering or planning criteria;*
 - (6) the projected demand for capital improvements or facility expansions required by new service units projected over a reasonable period of time, not to exceed 10 years; and*
 - (7) plan for awarding:*

- (A) a credit for the portion of ad valorem tax and utility service revenues generated by new service units during the program period that is used for the payment of improvements, including the payment of debt, that are included in the capital improvements plan; or
- (B) in the alternative, a credit equal to 50 percent of the total project cost of implementing the capital improvements plan.

The impact fee study includes information from the 2023 Wastewater System Master Plan being completed at this time. The Impact Fees are based on recommended capital improvements outlined in the Wastewater Master Plan, input from City Staff, and the growth projections shown in the Land Use Assumptions Chapter of this report.

The study process was comprised of four tasks:

LAND USE ASSUMPTIONS

The land use assumptions used for this report were created by Kimley-Horn with input provided by the City of Denton and the Denton 2040 Comprehensive Plan. The development of land use assumptions included the following:

- Establishing impact fee service areas.
- Collection/determination of service units service area; and
- Projection of the ten-year service units by service area.

A detailed discussion is outlined in the Land Use Assumptions Chapter of this report.

EVALUATION OF WASTEWATER SYSTEM MASTER PLAN

This task involved reviewing the 2023 Wastewater Master Plan and its growth projection compatibility with the Land Use Assumptions. The wastewater flow projections were then used to determine the additional service units.

IMPACT FEE CAPITAL IMPROVEMENTS PLAN

This task involved reviewing the impact fee water capital improvements plan outlined in 2019 Impact Fee Study and the 2023 Wastewater Master Plan. Discussions were also held with City Utility staff to identify projects that will be constructed in the 10-year planning window and meet the design criteria.

IMPACT FEE ANALYSIS AND REPORT

This task included calculating the additional service units, and credit reduction. These values were then used to determine the impact fee per service unit and the maximum assessable water impact fee by meter size.

3.2 DESIGN CRITERIA

In accordance with the Chapter 217 of the Texas Administrative Code (Design Criteria for Domestic Wastewater Systems) and the design criteria in the 2023 Wastewater Master Plan the following design criteria is followed when planning for future wastewater infrastructure.

COLLECTION LINES (INTERCEPTORS)

The design criteria for collection lines or interceptors is based on the TCEQ requirements that meet peak wet weather design flows and not exceed 80% of the pipe capacity.

LIFT STATIONS PUMPING CAPACITY

The design criteria for lift station pumping shall be to provide firm pumping capacity to meet 125% of the peak wet weather design flows. The firm pumping capacity is defined as the available total pumping capacity with the largest pump out of service.

LIFT STATION WET WELL CAPACITY

The design criteria for lift station wet wells are to provide adequate volumes to limit pump cycling to once every 10 minutes. Based on this criterion, the required operating volume for each pump can be calculated as

- V = $tQ/4$ where,
- t = Maximum pump cycling time = 10 minutes
- Q = Lead pump discharge rate in gallons per minute (gpm)
- V = Required wet well volume between pump start and stop elevation

FORCE MAINS

The design criteria recommended for force mains is to meet the required pumping capacity of the lift station at a velocity less than 7 feet per second and a maximum discharge pressure of 100 psi and to allow a minimum of 3 feet per second scouring velocity during a single pump operation.

3.3 IMPACT FEE CAPITAL IMPROVEMENTS PLAN

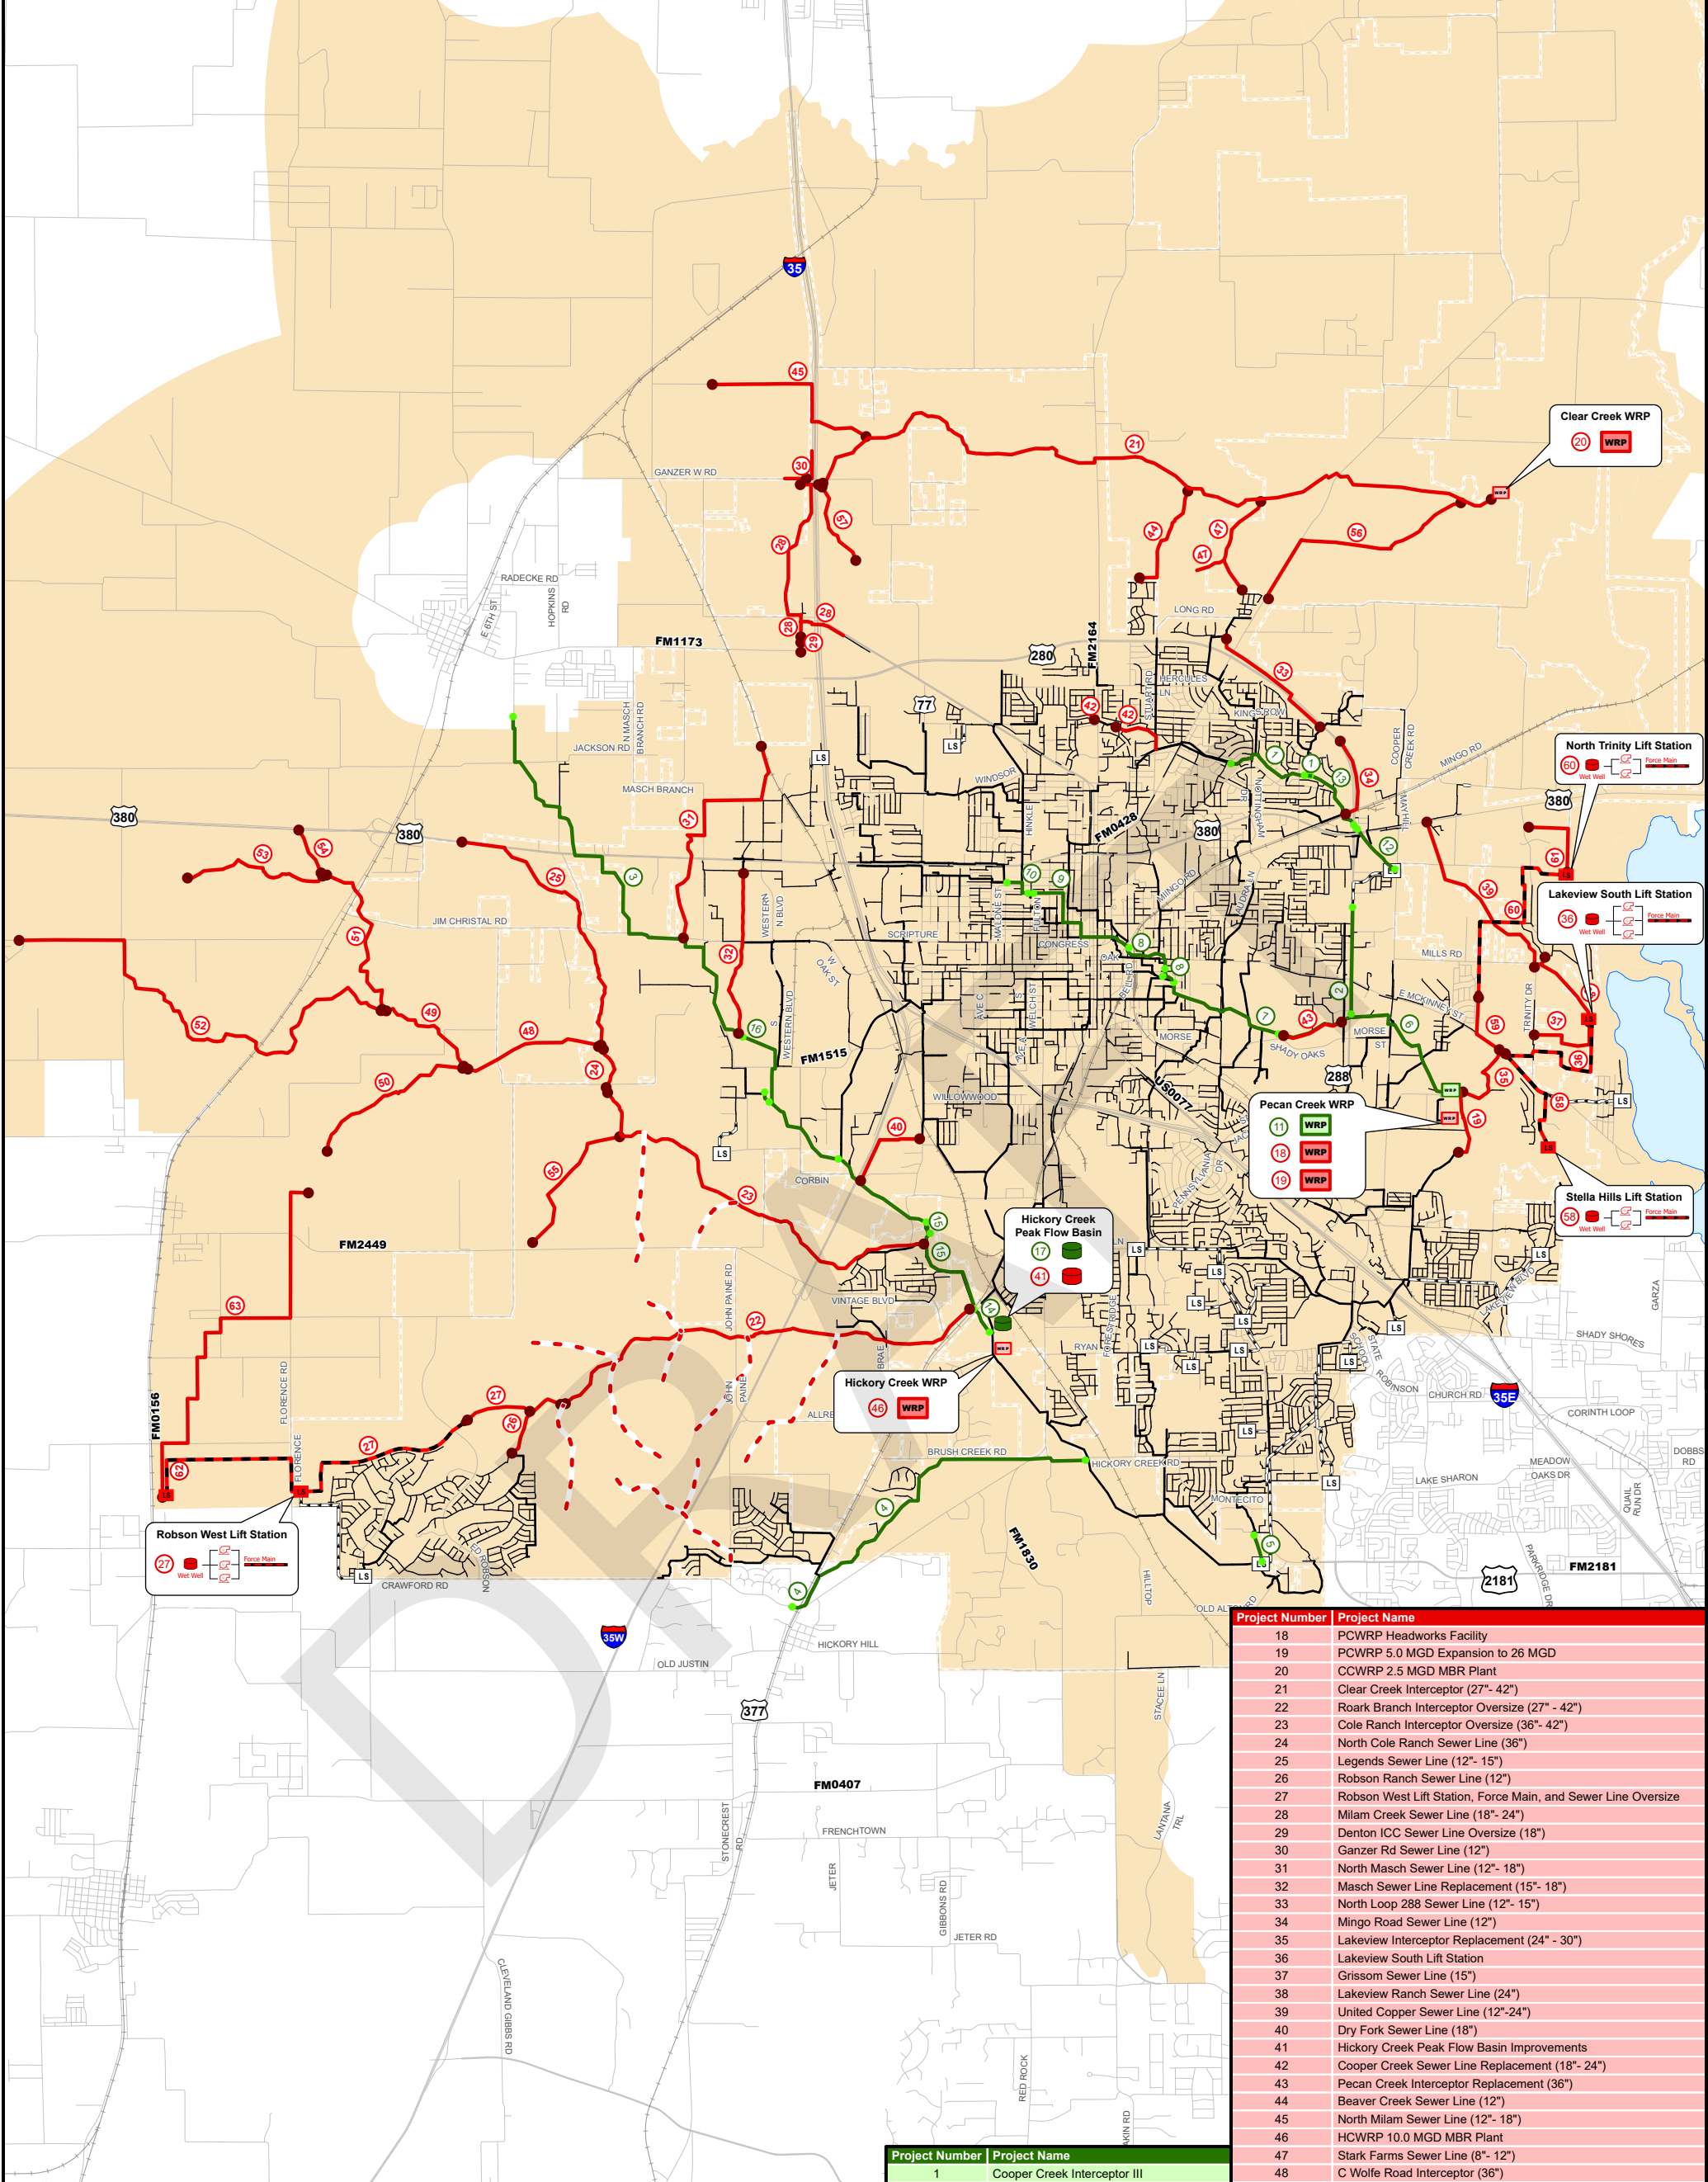

The purpose of the wastewater master plan is to provide the City with a logical strategy for upgrading and expanding its wastewater collection system to accommodate future growth and for addressing existing system deficiencies. The Wastewater Master Plan and the recommended system improvements are developed to accommodate growth through the 25-year planning period. The impact fee capital improvements plan is developed using projects identified during the master planning process and through discussions with utility staff. State law only allows cost recovery associated with eligible projects in a ten (10) year planning window from the time of the impact fee study. The following details the projects and the eligible recoverable cost.

Seventeen (17) existing projects, forty-seven (47) proposed projects, and the Wastewater Impact Fee Study are determined eligible for recoverable cost through Impact Fees over the next 10 years. The total cost of these projects is **\$1,222,435,449**. The projected total recoverable through Impact Fees is **\$686,981,671**. After debt service costs are added and the credit reduction calculation is complete, **\$760,659,142** is recoverable through Impact Fees serving the 10-year system needs. These impact fee capital improvements are shown in **Table 3.1** and illustrated in **Exhibit 3.1**.

**Table 3.1 Wastewater Impact Fee Capital Improvements
Project Cost and 10-Year Recoverable Cost**

Project #	Description	2023 Required Capacity (Percent Utilization)	2033 Required Capacity (Percent Utilization)	2023-2033 Required Capacity (Percent Utilization)	2033 Projected Recoverable Cost	Total Project Cost
EXISTING						
1	Cooper Creek Interceptor III	52%	54%	2%	\$26,887	\$1,277,970

3.4 WASTEWATER IMPACT FEE CALCULATION

SERVICE UNITS

Chapter 395 of the Local Government Code defines a service unit as follows, “Service Unit means a standardized measure of consumption attributable to an individual unit of development calculated in accordance with generally accepted engineering or planning standards and based on historical data and trends applicable to the political subdivision in which the individual unit of development is located during the previous 10 years.”

SERVICE UNIT CALCULATION

A single service unit for Denton’s water Impact Fees is the 5/8-inch x 3/4-inch meter. A service unit is the wastewater flow associated with water demand of accommodated by a 5/8-inch x 3/4-inch meter, which is typically used by a single-family residence. All meters greater than 5/8-inch x 3/4-inch have a service unit multiplier determined by the ratio of each larger meter’s capacity to the capacity of the 5/8-inch x 3/4-inch meter. The current service unit multipliers (service units/meter) are shown in **Table 3.2**.

Table 3.2 Meter Capacity Ratios

Meter Size	Service Units/ Meter ¹
5/8"x3/4"	1
1"	2.5
1-1/2"	5
2"	8
3"	22.5
4"	50
6"	100
8"	200
10"	325

Based on the City’s 10-year growth projections and the resulting wastewater flow in relation to water demand projections, wastewater service will be required for an additional **52,276** Service Units by the year 2034 as shown in **Table 3.3**.

The City’s existing wastewater system is a single service area because it treats wastewater at a single treatment facility. Over the next 10-years the City will construct two additional treatment facilities to accommodate growth and will therefore divide into three service areas (Pecan Creek, Hickory Creek, Clear Creek as indicated in the Land Use Assumptions chapter). The calculated 10-year additional services units has been distributed across the three services areas based on projected growth and its associated wastewater flow projections as shown in **Table 3.3**.

Table 3.3 10-year Additional Service Units by Service Area

Year		Pecan Creek	Hickory Creek	Clear Creek	Total
2024	Service Units	59,597	21,283	1,216	82,096
2034	Service Units	67,213	56,695	10,464	134,372
10-Year Service Units		7,616	35,412	9,248	52,276

3.5 PLAN FOR AWARDED IMPACT FEE CREDIT

Impact fee law allows for a credit calculation to credit back the utility revenues or ad valorem taxes that are allocated for paying a portion of future capital improvements. The intent of this credit is to prevent the City from double charging development for future capital improvements via Impact Fees and utility rates. If the City chooses not to do a financial analysis to determine the credit value, they are required by law to reduce the recoverable cost by 50 percent. The City chose to perform a financial analysis.

MAXIMUM ASSESSABLE IMPACT FEE DETERMINATION

The impact fee determination method employed by NewGen Strategies and Solutions, LLC is developed through a financial based model that recognizes the requirements of Chapter 395, including the recognition of cash and/or debt financing, interest earnings, fund balances, and applicable credits associated with the use of utility revenues. In developing the components of the financial model, assumptions must be made that include the following:

- Financing
 - Method of financing (i.e. cash or debt financing)
 - The level of financing (e.g. 100% debt)
 - Cost of financing
 - Debt repayment structure

- Timing and Level of Expenditures and Revenues
- Interest Earnings
- Annual Service Unit Growth
- Portion of Utility Revenue Used to Fund Impact Fee Water Improvements

While the assumptions employed in determining the maximum assessable impact fee are a reasonable basis for forecasting, these assumptions may not reflect actual future conditions. To address this, Chapter 395 requires the monitoring of Impact Fees through the Capital Improvement Advisory Committee (CIAC) who can then update or revise Impact Fees to reflect the actual implementation of the impact fee program.

FINANCING

Once the cost of capacity added that is attributable to growth is determined, a City must decide how the cost will be financed: cash and/or debt. Actual costs of capital for any previously funded projects, whether partially or fully funded, are also included.

Based on discussions with City staff, it is assumed that the City will debt finance the future project costs. For debt financing, the cost of financing is based on the City's Financial Advisor's estimates of future debt costs for bonds issued with 30-year terms as shown in the Water Financial Analysis Appendix of this report. Debt service payments for each future debt issue are assumed to remain constant over the issue's term.

TIMING AND LEVEL OF EXPENDITURES AND REVENUES

The exact timing and annual level of cash capital expenditures over the forecast period is currently indeterminate, therefore it is assumed that capital expenditures will occur in amounts over the 10-year program period. It is also assumed that the City will expand debt proceeds over a 2-year timeframe for debt-financed capital projects. For the calculation of the maximum assessable impact fee, debt is assumed to be issued in equal amounts for each year. In order to recognize the full amount of debt to be issued for the cost of capacity added that is attributable to growth during the 10-year period, a portion of years eight, nine, and ten are assumed to be spend in the final three years.

INTEREST EARNINGS

While debt is issued over 30-year terms and Impact Fees developed are to be charged over a 10-year period, a sufficient fund balance must be generated to meet the future debt service obligations. Fund balances were identified for each service area as a potential source for the current Impact Fee CIP. Because of the generation of the fund balance, excess monies will be available for interest earnings.

Chapter 395 states that interest earnings are funds of the impact fee account and are to be held to the same restrictions as impact fee revenues. In order to recognize that interest earnings are used to fund only impact fee eligible improvements, interest earnings are credited against the costs recoverable through Impact Fees. Chapter 395 does not require the upfront recognition of interest earnings in the impact fee

determination. To acknowledge the time value of the impact fee payer's monies, interest earnings have been credited. For this analysis, interest is assumed to be earned at an annual rate of 1.89% per 10-year historical average.

ANNUAL SERVICE UNIT GROWTH

The timing and annual level of service unit growth over the 10-year program period is currently indeterminate, therefore it is assumed that service unit growth will be consistent over the 10-year forecast.

PORTION OF UTILITY REVENUE USED TO FUND IMPACT FEE WATER IMPROVEMENTS

Credit for the portion of ad valorem tax and/or utility service revenues generated by new service units during the program period are used for payment of the improvements included in the Wastewater Impact Fee CIP. The credit is not a determination to recognize the total utility revenue generated by new service units but is a credit for the portion of utility revenue that is used for payment of the improvements included in the Water Impact Fee CIP. Theoretically, the credit determination could be zero (\$0) if the City does not utilize any of the new service unit utility revenue to fund improvements that are included in the Wastewater Impact Fee CIP.

To be conservative and recognize potential cash flow issues that can occur with the funding of major capital improvement projects, it is assumed that the debt-funded projects (100% of the improvement costs included in the Water Impact Fee CIP but not otherwise funded) could potentially be funded by utility revenue.

When an impact fee program is in place, payments made through utility revenue will consist of revenue generated by new service units in the defined service area and existing service units throughout the City; therefore, the portion attributable to the new service units in the defined service area must be isolated. The credit calculation illustrating how the credit is isolated is shown in the Wastewater Financial Analysis Appendix of this report.

3.6 MAXIMUM ASSESSABLE IMPACT FEE

A breakdown of the 10-year recoverable costs and the associated impact fee per service unit by service area is as follows:

Table 3.4 Pecan Creek Service - 10-Year Recoverable Cost Breakdown

Recoverable Impact Fee CIP Costs	\$69,883,844
Financing Costs	\$34,160,000
Interest Earnings	(\$13,234,573)
Pre Credit Recoverable Cost for Impact Fee	\$90,809,271
Credit for Utility Revenues	(\$2,347,057)
Maximum Recoverable Cost for Impact Fee	\$88,462,214

(1) Per NewGen Strategies and Solutions, LLC financial analysis, See Appendix A.

$$\text{Impact fee per service units} = \frac{\text{10-year recoverable costs}}{\text{10-year additional service units}}$$

$$\text{Impact fee per service units} = \frac{\$88,462,214}{7,616}$$

$$\text{Impact fee per service units} = \$11,615$$

Therefore, the maximum assessable water impact fee for Pecan Creek Service Area is **\$11,615**.

Table 3.5 Hickory Creek Service Area - 10-Year Recoverable Cost Breakdown

Recoverable Impact Fee CIP Costs	\$477,843,160
Financing Costs	\$212,931,397
Interest Earnings	(\$140,094,955)
Pre Credit Recoverable Cost for Impact Fee	\$550,679,602
Credit for Utility Revenues	(\$43,436,450)
Maximum Recoverable Cost for Impact Fee	\$507,243,152

(1) Per NewGen Strategies and Solutions, LLC financial analysis, See Appendix A.

$$\text{Impact fee per service units} = \frac{\text{10-year recoverable costs}}{\text{10-year additional service units}}$$

$$\text{Impact fee per service units} = \frac{\$507,243,152}{35,412}$$

$$\text{Impact fee per service units} = \$14,324$$

Therefore, the maximum assessable water impact fee for Hickory Creek Service Area is **\$14,324**.

Table 3.6 Clear Creek Service Area - 10-Year Recoverable Cost Breakdown

Recoverable Impact Fee CIP Costs	\$139,254,667
Financing Costs	\$46,901,957
Interest Earnings	(\$17,287,316)
Pre Credit Recoverable Cost for Impact Fee	\$168,869,308
Credit for Utility Revenues	(\$3,915,532)
Maximum Recoverable Cost for Impact Fee	\$164,953,776

(1) Per NewGen Strategies and Solutions, LLC financial analysis, See Appendix A.

$$\text{Impact fee per service units} = \frac{\text{10-year recoverable costs}}{\text{10-year additional service units}}$$

$$\text{Impact fee per service units} = \frac{\$164,953,776}{9,248}$$

$$\text{Impact fee per service units} = \$17,837$$

Therefore, the maximum assessable water impact fee for Clear Creek is **\$17,837**.

For a development that requires a different size meter, a service unit equivalent is established at a multiplier based on its capacity with respect to the 5/8-inch x 3/4-inch meter. The maximum impact fee that could be assessed for other meter sizes is based on the Equivalency Table (**Table 2.10**).

Table 3.7 Maximum Assessable Wastewater Impact Fee by Service Area and Meter Size

Meter Size	Service Unit Equivalent	Pecan Creek Maximum Assessable Water Impact Fee	Hickory Creek Maximum Assessable Water Impact Fee	Clear Creek Maximum Assessable Water Impact Fee
5/8"x3/4"	1	\$11,615	\$13,935	\$17,837
1"	2.5	\$29,038	\$34,838	\$44,593
1-1/2"	5	\$58,075	\$69,675	\$89,185
2"	8	\$92,920	\$111,480	\$142,696
3"	22.5	\$261,338	\$313,538	\$401,333
4"	50	\$580,750	\$696,750	\$891,850
6"	100	\$1,161,500	\$1,393,500	\$1,783,700
8"	200	\$2,323,000	\$2,787,000	\$3,567,400
10"	325	\$3,774,875	\$4,528,875	\$5,797,025

APPENDIX

WATER FINANCIAL ANALYSIS

DRAFT

City of Denton - 2024 Water Impact Fee Update
 Capital Improvement Plan for Impact Fees
 Impact Fee Calculation Assumptions
 Water Service Area Zone 1A

0	Existing Fund Balance	\$ -
1	Existing Number of Service Units Over Entire City	82,096
2	Additional Service Units Added During Planning Period In the Service Area	1,616
3	Total Cost of the Water Impact Fee CIP	\$ 10,654,473
4	Recoverable Cost for Impact Fee Planning Period	\$ 2,454,148
5	Percent Recoverable for Water Impact Fee Planning Period (Line 4 / Line 3)	23.03%
6	Financing Costs (From Financial Analysis)	\$ 1,106,314
7	Interest Earnings (From Financial Analysis)	\$ (604,035)
8	Recoverable Cost of Water Impact Fee and Financing Costs Less Balance (Line 5 + Line 7 + Line 8 - Line 0)	\$ 2,956,427
9	Pre-Credit Maximum Fee (Line 8 / Line 2)	\$ 1,830
10	Credit for Utility Revenues (From Financial Analysis)	\$ (15,105)
11	Recoverable Cost of Water Impact Fee and Financing (Line 8 + Line 10)	\$ 2,941,322
12	Maximum Assessable Fee (Line 11 / Line 2)	\$ 1,820

SUMMARY OF WATER IMPACT FEE DETERMINATION

Water Service Area Zone 1A

Recoverable Impact Fee CIP Costs	\$ 2,454,148	Table 2.1
Financing Cost	1,106,314	See Detail Below
Existing Fund Balance	-	Water Appendices - page 1
Interest Earnings	(604,035)	Water Appendices - page 3
Pre Credit Recoverable Cost for Impact Fee	\$ 2,956,427	Sum of Above
Credit for Utility Revenues	(15,105)	Water Appendices - page 6
Maximum Recoverable Cost for Impact Fee	\$ 2,941,322	

Recoverable Impact Fee CIP Costs:

Represents the portion of capital improvement costs that are eligible for funding through impact fees.
Reference is Table 2.1 Water Impact Fee Capital Improvements Project Cost and 10-Year Recoverable Cost

Financing Costs:

Represents the interest costs associated with debt financing the new impact fee project costs. Interest costs are derived from existing debt issues and forecasted debt issues.

New Annual Debt Service	\$	2,231,971	Water Appendices - page 2
Existing Annual Debt Service		1,269,285	Water Appendices - page 2
Principal Component (New and Existing Debt)		(2,394,943)	Water Appendices - page 1
Financing Costs	\$	1,106,314	

Existing Fund Balance:

Represents impact fee revenue collected but not yet expended. Some projects that are included in the 2018 Impact Fee Update were also included in prior Impact Fee Updates.

To avoid charging twice for the same project, the impact fee revenues collected but yet to be expended (i.e. fund balance) are credited against the recoverable costs. Reference is page 1 of Water Appendices.

Interest Earnings

Represents the interest earned on cash flows and assumes a 1.89% annual interest rate.

The Impact Fee Statute states that interest earnings are funds of the impact fee account and are held to the same restrictions as impact fee revenues. Therefore in order to recognize that interest earnings are used to fund capital improvements, interest earnings are credited against the recoverable costs.

Reference is the sum of Accumulated Interest on page 3 of Water Appendices.

Pre Credit Recoverable Cost for Impact Fee

Represents Recoverable Impact Fee CIP Costs plus Financing Costs less Existing Fund Balance and Interest Earnings.

Credit for Utility Revenues

In 2001, the Impact Fee Statute was amended to include a credit for ad valorem and utility revenues generated by new service units during the ten-year timeframe that are used to fund impact fee eligible projects for which the new service units were charged an impact fee. The intent of this amendment is to avoid double-charging the new service units for impact fee capital improvements. The credit recognizes utility revenues used to fund the debt service of debt financed impact fee eligible projects. Reference is page 6 of Water Appendices.

Maximum Recoverable Cost for Impact Fee:

Represents Pre Credit Recoverable Cost for Impact Fee less Credit for Utility Revenues.

This is the maximum cost that can be recovered through impact fees.

Capital Improvement Plan for Impact Fees
Impact Fee Calculation Assumptions
Water Service Area Zone 1A

I. General Assumptions

Annual Interest Rate on Deposits ⁽¹⁾	2.50%
Annual Service Unit Growth ⁽²⁾	162
Existing Fund Balance ⁽³⁾	\$ -
Portion of Projects Funded by Existing Debt ⁽⁴⁾	\$ 850,650
Non-debt Funded Project Cost ⁽⁵⁾	59,206
New Project Cost Funded Through New Debt ⁽⁶⁾	1,544,292
Total Recoverable Project Cost ⁽⁷⁾	\$ 2,454,148

II. New Debt Issues Assumptions

<u>Year</u>	<u>Principal⁽⁸⁾</u>	<u>Interest⁽⁹⁾</u>	<u>Term</u>
1	\$ 154,429	3.80%	20
2	154,429	3.80%	20
3	154,429	3.80%	20
4	154,429	3.80%	20
5	154,429	3.80%	20
6	154,429	3.80%	20
7	154,429	3.80%	20
8	154,429	3.80%	20
9	154,429	3.80%	20
10	154,429	3.80%	20
Total	\$ 1,544,292		

III. Capital Expenditure Assumptions

<u>Year</u>	<u>Annual Capital Expenditures⁽¹⁰⁾</u>
1	\$ 83,135
2	160,350
3	160,350
4	160,350
5	160,350
6	160,350
7	160,350
8	160,350
9	160,350
10	237,564
Total	\$ 1,603,498

- (1) Per discussions with City Staff
- (2) Derived from Table 2.6 10-year Additional SFE Water Zone Distribution
- (3) Balance from 03/30/2024 provided by City Staff
- (4) Per discussions with City Staff and City files
- (5) From allocation per City Staff; assumes 0% of new project costs funded through sources other than debt
- (6) This assumes 100% of new project costs funded through new debt issues
- (7) Table 2.1 Water Impact Fee Capital Improvements Project Cost and 10-Year Recoverable Cost
- (8) Assumes new debt issued in equal annual amounts
- (9) Estimated interest on future debt per discussions with City Staff
- (10) Assumes new debt proceeds expended over a 2-year timeframe.

Non-debt funded capital expenditures allocated in equal annual amounts

SUMMARY OF WATER IMPACT FEE DETERMINATION

Water Service Area Zone 1B

Recoverable Impact Fee CIP Costs	\$ 292,309,445	Table 2.1
Financing Cost	129,102,582	See Detail Below
Existing Fund Balance	-	Water Appendices - page 1
Interest Earnings	(81,750,244)	Water Appendices - page 3
Pre Credit Recoverable Cost for Impact Fee	\$ 339,661,784	Sum of Above
Credit for Utility Revenues	(23,479,052)	Water Appendices - page 6
Maximum Recoverable Cost for Impact Fee	\$ 316,182,731	Total Cost of the Water Impact Fee CIP

Recoverable Impact Fee CIP Costs:

Represents the portion of capital improvement costs that are eligible for funding through impact fees.
Reference is Table 2.1 Water Impact Fee Capital Improvements Project Cost and 10-Year Recoverable Cost

Financing Costs:

Represents the interest costs associated with debt financing the new impact fee project costs. Interest costs are derived one-half of the new impact fee project costs will be funded through new debt issues (Page 7 of Appendix E -). Interest costs are derived from forecasted debt issues.
from existing debt issues and forecasted debt issues.

New Annual Debt Service	\$ 376,804,966	Water Appendices - page 2
Existing Annual Debt Service	39,438,370	Water Appendices - page 2
Principal Component (New and Existing Debt)	(287,140,753)	Water Appendices - page 1
Financing Costs	\$ 129,102,582	

Existing Fund Balance:

Represents impact fee revenue collected but not yet expended. Some projects that are included in the 2018 Impact Fee Update were also included in prior Impact Fee Updates.
To avoid charging twice for the same project, the impact fee revenues collected but yet to be expended (i.e. fund balance) are credited against the recoverable costs. Reference is page 1 of Water Appendices.

Interest Earnings

Represents the interest earned on cash flows and assumes a 1.89% annual interest rate.
The Impact Fee Statute states that interest earnings are funds of the impact fee account and are held to the same restrictions as impact fee revenues. Therefore in order to recognize that interest earnings are used to fund capital improvements, interest earnings are credited against the recoverable costs.
Reference is the sum of Accumulated Interest on page 3 of Water Appendices.

Pre Credit Recoverable Cost for Impact Fee

Represents Recoverable Impact Fee CIP Costs plus Financing Costs less Existing Fund Balance and Interest Earnings.

Credit for Utility Revenues

In 2001, the Impact Fee Statute was amended to include a credit for ad valorem and utility revenues generated by new service units during the ten-year timeframe that are used to fund impact fee eligible projects for which the new service units were charged an impact fee. The intent of this amendment is to avoid double-charging the new service units for impact fee capital improvements. The credit recognizes utility revenues used to fund the debt service of debt financed impact fee eligible projects. Reference is page 6 of Water Appendices.

Maximum Recoverable Cost for Impact Fee:

Represents Pre Credit Recoverable Cost for Impact Fee less Credit for Utility Revenues.
This is the maximum cost that can be recovered through impact fees.

SUMMARY OF WATER IMPACT FEE DETERMINATION

Water Service Area Zone 2

Recoverable Impact Fee CIP Costs	\$ 240,510,198	Table 2.1
Financing Cost	106,564,481	See Detail Below
Existing Fund Balance	-	Water Appendices - page 1
Interest Earnings	(68,197,039)	Water Appendices - page 3
Pre Credit Recoverable Cost for Impact Fee	\$ 278,877,639	Sum of Above
Credit for Utility Revenues	(15,078,415)	Water Appendices - page 6
Maximum Recoverable Cost for Impact Fee	\$ 263,799,224	

Recoverable Impact Fee CIP Costs:

Represents the portion of capital improvement costs that are eligible for funding through impact fees.
Reference is Table 2.1 Water Impact Fee Capital Improvements Project Cost and 10-Year Recoverable Cost

Financing Costs:

Represents the interest costs associated with debt financing the new impact fee project costs. Interest costs are derived from existing debt issues and forecasted debt issues.

New Annual Debt Service	\$ 315,826,720	Water Appendices - page 2
Existing Annual Debt Service	28,067,078	Water Appendices - page 2
Principal Component (New and Existing Debt)	<u>(237,329,318)</u>	Water Appendices - page 1
Financing Costs	\$ 106,564,481	

Existing Fund Balance:

Represents impact fee revenue collected but not yet expended. Some projects that are included in the 2018 Impact Fee Update were also included in prior Impact Fee Updates.
To avoid charging twice for the same project, the impact fee revenues collected but yet to be expended (i.e. fund balance) are credited against the recoverable costs. Reference is page 1 of Water Appendices.

Interest Earnings

Represents the interest earned on cash flows and assumes a 1.89% annual interest rate.
The Impact Fee Statute states that interest earnings are funds of the impact fee account and are held to the same restrictions as impact fee revenues. Therefore in order to recognize that interest earnings are used to fund capital improvements, interest earnings are credited against the recoverable costs.
Reference is the sum of Accumulated Interest on page 3 of Water Appendices.

Pre Credit Recoverable Cost for Impact Fee

Represents Recoverable Impact Fee CIP Costs plus Financing Costs less Existing Fund Balance and Interest Earnings.

Credit for Utility Revenues

In 2001, the Impact Fee Statute was amended to include a credit for ad valorem and utility revenues generated by new service units during the ten-year timeframe that are used to fund impact fee eligible projects for which the new service units were charged an impact fee. The intent of this amendment is to avoid double-charging the new service units for impact fee capital improvements. The credit recognizes utility revenues used to fund the debt service of debt financed impact fee eligible projects. Reference is page 6 of Water Appendices.

Maximum Recoverable Cost for Impact Fee:

Represents Pre Credit Recoverable Cost for Impact Fee less Credit for Utility Revenues.
This is the maximum cost that can be recovered through impact fees.

City of Denton - 2024 Water Impact Fee Update
Capital Improvement Plan for Impact Fees
Impact Fee Calculation Assumptions
Water Service Area Zone 2

I. General Assumptions

Annual Interest Rate on Deposits ⁽¹⁾	2.50%
Annual Service Unit Growth ⁽²⁾	2,173
Existing Fund Balance ⁽³⁾	\$ -
Portion of Projects Funded by Existing Debt ⁽⁴⁾	\$ 18,810,013
Non-debt Funded Project Cost ⁽⁵⁾	3,180,880
New Project Cost Funded Through New Debt ⁽⁶⁾	218,519,305
Total Recoverable Project Cost ⁽⁷⁾	\$ 240,510,198

II. New Debt Issues Assumptions

<u>Year</u>	<u>Principal⁽⁸⁾</u>	<u>Interest⁽⁹⁾</u>	<u>Term</u>

WASTEWATER FINANCIAL ANALYSIS

City of Denton - 2024 Wastewater Impact Fee Update
 Capital Improvement Plan for Impact Fees
 Impact Fee Calculation Assumptions
 Wastewater Service Area Pecan Creek

0	Existing Fund Balance	\$ -
1	Existing Number of Service Units Over Entire City	82,096
2	Additional Service Units Added During Planning Period In the Service Area	7,616
3	Total Cost of the Wastewater Impact Fee CIP	\$ 294,802,074
4	Recoverable Cost for Impact Fee Planning Period	\$ 69,883,844
5	Percent Recoverable for Wastewater Impact Fee Planning Period (Line 4 / Line 3)	23.71%
6	Financing Costs (From Financial Analysis)	\$ 34,160,000
7	Interest Earnings (From Financial Analysis)	\$ (13,234,573)
8	Recoverable Cost of Wastewater Impact Fee and Financing Costs Less Balance (Line 5 + Line 7 + Line 8 - Line 0)	\$ 90,809,272
9	Pre-Credit Maximum Fee (Line 8 / Line 2)	\$ 11,923
10	Credit for Utility Revenues (From Financial Analysis)	\$ (2,347,057)
11	Recoverable Cost of Wastewater Impact Fee and Financing (Line 8 + Line 10)	\$ 88,462,214
12	Maximum Assessable Fee (Line 11 / Line 2)	\$ 11,615

SUMMARY OF WASTEWATER IMPACT FEE DETERMINATION

Wastewater Service Area: Pecan Creek

Recoverable Impact Fee CIP Costs	\$ 69,883,844	Table 3.1
Financing Cost	34,160,000	See Detail Below
Existing Fund Balance	-	Wastewater Appendices - page 1
Interest Earnings	(13,234,573)	Wastewater Appendices - page 3
Pre Credit Recoverable Cost for Impact Fee	\$ 90,809,271	Sum of Above
Credit for Utility Revenues	(2,347,057)	Wastewater Appendices - page 6
Maximum Recoverable Cost for Impact Fee	\$ 88,462,214	

Recoverable Impact Fee CIP Costs:

Represents the portion of capital improvement costs that are eligible for funding through impact fees.
Reference is Table 3.1 Wastewater Impact Fee Capital Improvements Project Cost and 10-Year Recoverable Cost

Financing Costs:

Represents the interest costs associated with debt financing the new impact fee project costs. Interest costs are derived from existing debt issues and forecasted debt issues.

New Annual Debt Service	\$ 19,678,504	Wastewater Appendices - page 2
Existing Annual Debt Service	84,255,782	Wastewater Appendices - page 2
Principal Component (New and Existing Debt)	<u>(69,774,285)</u>	Wastewater Appendices - page 1
Financing Costs	<u>\$ 34,160,000</u>	

Existing Fund Balance:

Represents impact fee revenue collected but not yet expended. Some projects that are included in the 2018 Impact Fee Update were also included in prior Impact Fee Updates.
To avoid charging twice for the same project, the impact fee revenues collected but yet to be expended (i.e. fund balance) are credited against the recoverable costs. Reference is page 1 of Wastewater Appendices.

Interest Earnings

Represents the interest earned on cash flows and assumes a 1.89% annual interest rate.
The Impact Fee Statute states that interest earnings are funds of the impact fee account and are held to the same restrictions as impact fee revenues. Therefore in order to recognize that interest earnings are used to fund capital improvements, interest earnings are credited against the recoverable costs.
Reference is the sum of Accumulated Interest on page 3 of Wastewater Appendices.

Pre Credit Recoverable Cost for Impact Fee

Represents Recoverable Impact Fee CIP Costs plus Financing Costs less Existing Fund Balance and Interest Earnings.

Credit for Utility Revenues

In 2001, the Impact Fee Statute was amended to include a credit for ad valorem and utility revenues generated by new service units during the ten-year timeframe that are used to fund impact fee eligible projects for which the new service units were charged an impact fee. The intent of this amendment is to avoid double-charging the new service units for impact fee capital improvements. The credit recognizes utility revenues used to fund the debt service of debt financed impact fee eligible projects. Reference is page 6 of Wastewater Appendices.

Maximum Recoverable Cost for Impact Fee:

Represents Pre Credit Recoverable Cost for Impact Fee less Credit for Utility Revenues.
This is the maximum cost that can be recovered through impact fees.

City of Denton - 2024 Wastewater Impact Fee Update
Capital Improvement Plan for Impact Fees
Impact Fee Calculation Assumptions
Wastewater Service Area: Pecan Creek

I. General Assumptions

Annual Interest Rate on Deposits ⁽¹⁾	2.50%
Annual Service Unit Growth ⁽²⁾	762
Existing Fund Balance ⁽³⁾	\$ -

Portion of Projects Funded by Existing Debt ⁽⁴⁾	\$ 56,158,803
Non-debt Funded Project Cost ⁽⁵⁾	109,559
New Project Cost Funded Through New Debt ⁽⁶⁾	13,615,482
Total Recoverable Project Cost ⁽⁷⁾	\$ 69,883,844

II. New Debt Issues Assumptions

<u>Year</u>	<u>Principal⁽⁸⁾</u>	<u>Interest⁽⁹⁾</u>	<u>Term</u>
1	\$ 1,361,548	3.80%	20
2	1,361,548	3.80%	20
3	1,361,548	3.80%	20
4	1,361,548	3.80%	20
5	1,361,548	3.80%	20
6	1,361,548	3.80%	20
7	1,361,548	3.80%	20
8	1,361,548	3.80%	20
9	1,361,548	3.80%	20
10	1,361,548	3.80%	20
Total	\$ 13,615,482		

III. Capital Expenditure Assumptions

<u>Year</u>	<u>Annual Capital Expenditures⁽¹⁰⁾</u>
1	\$ 691,730
2	1,372,504
3	1,372,504
4	1,372,504
5	1,372,504
6	1,372,504
7	1,372,504
8	1,372,504
9	1,372,504
10	2,053,278
Total	\$ 13,725,041

- (1) Per discussions with City Staff
- (2) Derived from Table 3.3 10-year Additional Single-Family Equivalent Calculation
- (3) Balance from 03/30/2024 provided by City Staff
- (4) Per discussions with City Staff and City files
- (5) From allocation per City Staff; assumes 0% of new project costs funded through sources other than debt
- (6) This assumes 100% of new project costs funded through new debt issues
- (7) Table 3.1 Wastewater Impact Fee Capital Improvements Project Cost and 10-Year Recoverable Cost
- (8) Assumes new debt issued in equal annual amounts
- (9) Estimated interest on future debt per discussions with City Staff
- (10) Assumes new debt proceeds expended over a 2-year timeframe.
 Non-debt funded capital expenditures allocated in equal annual amounts

SUMMARY OF WASTEWATER IMPACT FEE DETERMINATION

Wastewater Service Area: Hickory Creek

Recoverable Impact Fee CIP Costs	\$ 477,843,160	Table 3.1
Financing Cost	212,931,397	See Detail Below
Existing Fund Balance	-	Wastewater Appendices - page 1
Interest Earnings	(140,094,955)	Wastewater Appendices - page 3
Pre Credit Recoverable Cost for Impact Fee	\$ 550,679,602	Sum of Above
Credit for Utility Revenues	(43,436,450)	Wastewater Appendices - page 6
Maximum Recoverable Cost for Impact Fee	\$ 507,243,151	

Recoverable Impact Fee CIP Costs:

Represents the portion of capital improvement costs that are eligible for funding through impact fees.
Reference is Table 3.1 Wastewater Impact Fee Capital Improvements Project Cost and 10-Year Recoverable Cost

Financing Costs:

Represents the interest costs associated with debt financing the new impact fee project costs. Interest costs are derived from existing debt issues and forecasted debt issues.

New Annual Debt Service	\$ 674,051,068	Wastewater Appendices - page 2
Existing Annual Debt Service	15,754,514	Wastewater Appendices - page 2
Principal Component (New and Existing Debt)	<u>(476,874,185)</u>	Wastewater Appendices - page 1
Financing Costs	\$ 212,931,397	

Existing Fund Balance:

Represents impact fee revenue collected but not yet expended. Some projects that are included in the 2018 Impact Fee Update were also included in prior Impact Fee Updates.
To avoid charging twice for the same project, the impact fee revenues collected but yet to be expended (i.e. fund balance) are credited against the recoverable costs. Reference is page 1 of Wastewater Appendices.

Interest Earnings

Represents the interest earned on cash flows and assumes a 1.89% annual interest rate.
The Impact Fee Statute states that interest earnings are funds of the impact fee account and are held to the same restrictions as impact fee revenues. Therefore in order to recognize that interest earnings are used to fund capital improvements, interest earnings are credited against the recoverable costs.
Reference is the sum of Accumulated Interest on page 3 of Wastewater Appendices.

Pre Credit Recoverable Cost for Impact Fee

Represents Recoverable Impact Fee CIP Costs plus Financing Costs less Existing Fund Balance and Interest Earnings.

Credit for Utility Revenues

In 2001, the Impact Fee Statute was amended to include a credit for ad valorem and utility revenues generated by new service units during the ten-year timeframe that are used to fund impact fee eligible projects for which the new service units were charged an impact fee. The intent of this amendment is to avoid double-charging the new service units for impact fee capital improvements. The credit recognizes utility revenues used to fund the debt service of debt financed impact fee eligible projects. Reference is page 6 of Wastewater Appendices.

Maximum Recoverable Cost for Impact Fee:

Represents Pre Credit Recoverable Cost for Impact Fee less Credit for Utility Revenues.
This is the maximum cost that can be recovered through impact fees.

City of Denton - 2024 Wastewater Impact Fee Update
Capital Improvement Plan for Impact Fees
Impact Fee Calculation Assumptions
Wastewater Service Area: Hickory Creek

I. General Assumptions

Annual Interest Rate on Deposits ⁽¹⁾	2.50%
Annual Service Unit Growth ⁽²⁾	3,541
Existing Fund Balance ⁽³⁾	\$ -

Portion of Projects Funded by Existing Debt ⁽⁴⁾	\$ 10,500,818
Non-debt Funded Project Cost ⁽⁵⁾	968,975
New Project Cost Funded Through New Debt ⁽⁶⁾	466,373,367
Total Recoverable Project Cost ⁽⁷⁾	\$ 477,843,160

II. New Debt Issues Assumptions

<u>Year</u>	<u>Principal⁽⁸⁾</u>	<u>Interest⁽⁹⁾</u>	<u>Term</u>
1	\$ 46,637,337	3.80%	20
2	46,637,337	3.80%	20
3	46,637,337	3.80%	20
4	46,637,337	3.80%	20
5	46,637,337	3.80%	20
6	46,637,337	3.80%	20
7	46,637,337	3.80%	20
8	46,637,337	3.80%	20
9	46,637,337	3.80%	20
10	46,637,337	3.80%	20
Total	\$ 466,373,367		

III. Capital Expenditure Assumptions

<u>Year</u>	<u>Annual Capital Expenditures⁽¹⁰⁾</u>
1	\$ 23,415,566
2	46,734,234
3	46,734,234
4	46,734,234
5	46,734,234
6	46,734,234
7	46,734,234
8	46,734,234
9	46,734,234
10	70,052,903
Total	\$ 467,342,342

- (1) Per discussions with City Staff
- (2) Derived from Table 3.3 10-year Additional Single-Family Equivalent Calculation
- (3) Balance from 03/30/2024 provided by City Staff
- (4) Per discussions with City Staff and City files
- (5) From allocation per City Staff; assumes 0% of new project costs funded through sources other than debt
- (6) This assumes 100% of new project costs funded through new debt issues
- (7) Table 3.1 Wastewater Impact Fee Capital Improvements Project Cost and 10-Year Recoverable Cost
- (8) Assumes new debt issued in equal annual amounts
- (9) Estimated interest on future debt per discussions with City Staff
- (10) Assumes new debt proceeds expended over a 2-year timeframe.
 Non-debt funded capital expenditures allocated in equal annual amounts

SUMMARY OF WASTEWATER IMPACT FEE DETERMINATION

Wastewater Service Area: Pecan Creek

Recoverable Impact Fee CIP Costs	\$ 139,254,667	Table 3.1
Financing Cost	46,901,957	See Detail Below
Existing Fund Balance	-	Wastewater Appendices - page 1
Interest Earnings	(17,287,316)	Wastewater Appendices - page 3
Pre Credit Recoverable Cost for Impact Fee	\$ 168,869,308	Sum of Above
Credit for Utility Revenues	(3,915,532)	Wastewater Appendices - page 6
Maximum Recoverable Cost for Impact Fee	\$ 164,953,776	

Recoverable Impact Fee CIP Costs:

Represents the portion of capital improvement costs that are eligible for funding through impact fees.
Reference is Table 3.1 Wastewater Impact Fee Capital Improvements Project Cost and 10-Year Recoverable Cost

Financing Costs:

Represents the interest costs associated with debt financing the new impact fee project costs. Interest costs are derived from existing debt issues and forecasted debt issues.

New Annual Debt Service	\$ 19,016,052	Wastewater Appendices - page 2
Existing Annual Debt Service	123,077,765	Wastewater Appendices - page 2
Principal Component (New and Existing Debt)	<u>(95,191,861)</u>	Wastewater Appendices - page 1
Financing Costs	<u>\$ 46,901,957</u>	

Existing Fund Balance:

Represents impact fee revenue collected but not yet expended. Some projects that are included in the 2018 Impact Fee Update were also included in prior Impact Fee Updates.
To avoid charging twice for the same project, the impact fee revenues collected but yet to be expended (i.e. fund balance) are credited against the recoverable costs. Reference is page 1 of Wastewater Appendices.

Interest Earnings

Represents the interest earned on cash flows and assumes a 1.89% annual interest rate.
The Impact Fee Statute states that interest earnings are funds of the impact fee account and are held to the same restrictions as impact fee revenues. Therefore in order to recognize that interest earnings are used to fund capital improvements, interest earnings are credited against the recoverable costs.
Reference is the sum of Accumulated Interest on page 3 of Wastewater Appendices.

Pre Credit Recoverable Cost for Impact Fee

Represents Recoverable Impact Fee CIP Costs plus Financing Costs less Existing Fund Balance and Interest Earnings.

Credit for Utility Revenues

In 2001, the Impact Fee Statute was amended to include a credit for ad valorem and utility revenues generated by new service units during the ten-year timeframe that are used to fund impact fee eligible projects for which the new service units were charged an impact fee. The intent of this amendment is to avoid double-charging the new service units for impact fee capital improvements. The credit recognizes utility revenues used to fund the debt service of debt financed impact fee eligible projects. Reference is page 6 of Wastewater Appendices.

Maximum Recoverable Cost for Impact Fee:

Represents Pre Credit Recoverable Cost for Impact Fee less Credit for Utility Revenues.
This is the maximum cost that can be recovered through impact fees.

City of Denton - 2024 Wastewater Impact Fee Update
Capital Improvement Plan for Impact Fees
Impact Fee Calculation Assumptions
Wastewater Service Area: Pecan Creek

I. General Assumptions

Annual Interest Rate on Deposits ⁽¹⁾	2.50%
Annual Service Unit Growth ⁽²⁾	925
Existing Fund Balance ⁽³⁾	\$ -

Portion of Projects Funded by Existing Debt ⁽⁴⁾	\$ 82,034,726
Non-debt Funded Project Cost ⁽⁵⁾	44,062,806
New Project Cost Funded Through New Debt ⁽⁶⁾	13,157,134
Total Recoverable Project Cost ⁽⁷⁾	\$ 139,254,667

II. New Debt Issues Assumptions

<u>Year</u>	<u>Principal⁽⁸⁾</u>	<u>Interest⁽⁹⁾</u>	<u>Term</u>
