MONTHLY CONSTRUCTION REPORT November 2024

The following provides a status update on the capital improvement projects that are in progress at the Airport:

RWY 18L-36R Reconstruction (Updated)

The project has now reached substantial completion. The final walk-through was completed on Tuesday, October 29th. The flight check for the PAPIs has been completed along with the striping and miscellaneous electrical work. The contractor will be spreading more fertilizer and grass seed in the coming weeks to assist in the vegetation growth between the runways and taxiways. All of this work will be completed without requiring any additional runway closures, and we anticipate it to be complete sometime in mid-November.
