

# NORTH LAKES TENNIS CENTER SCULPTURE

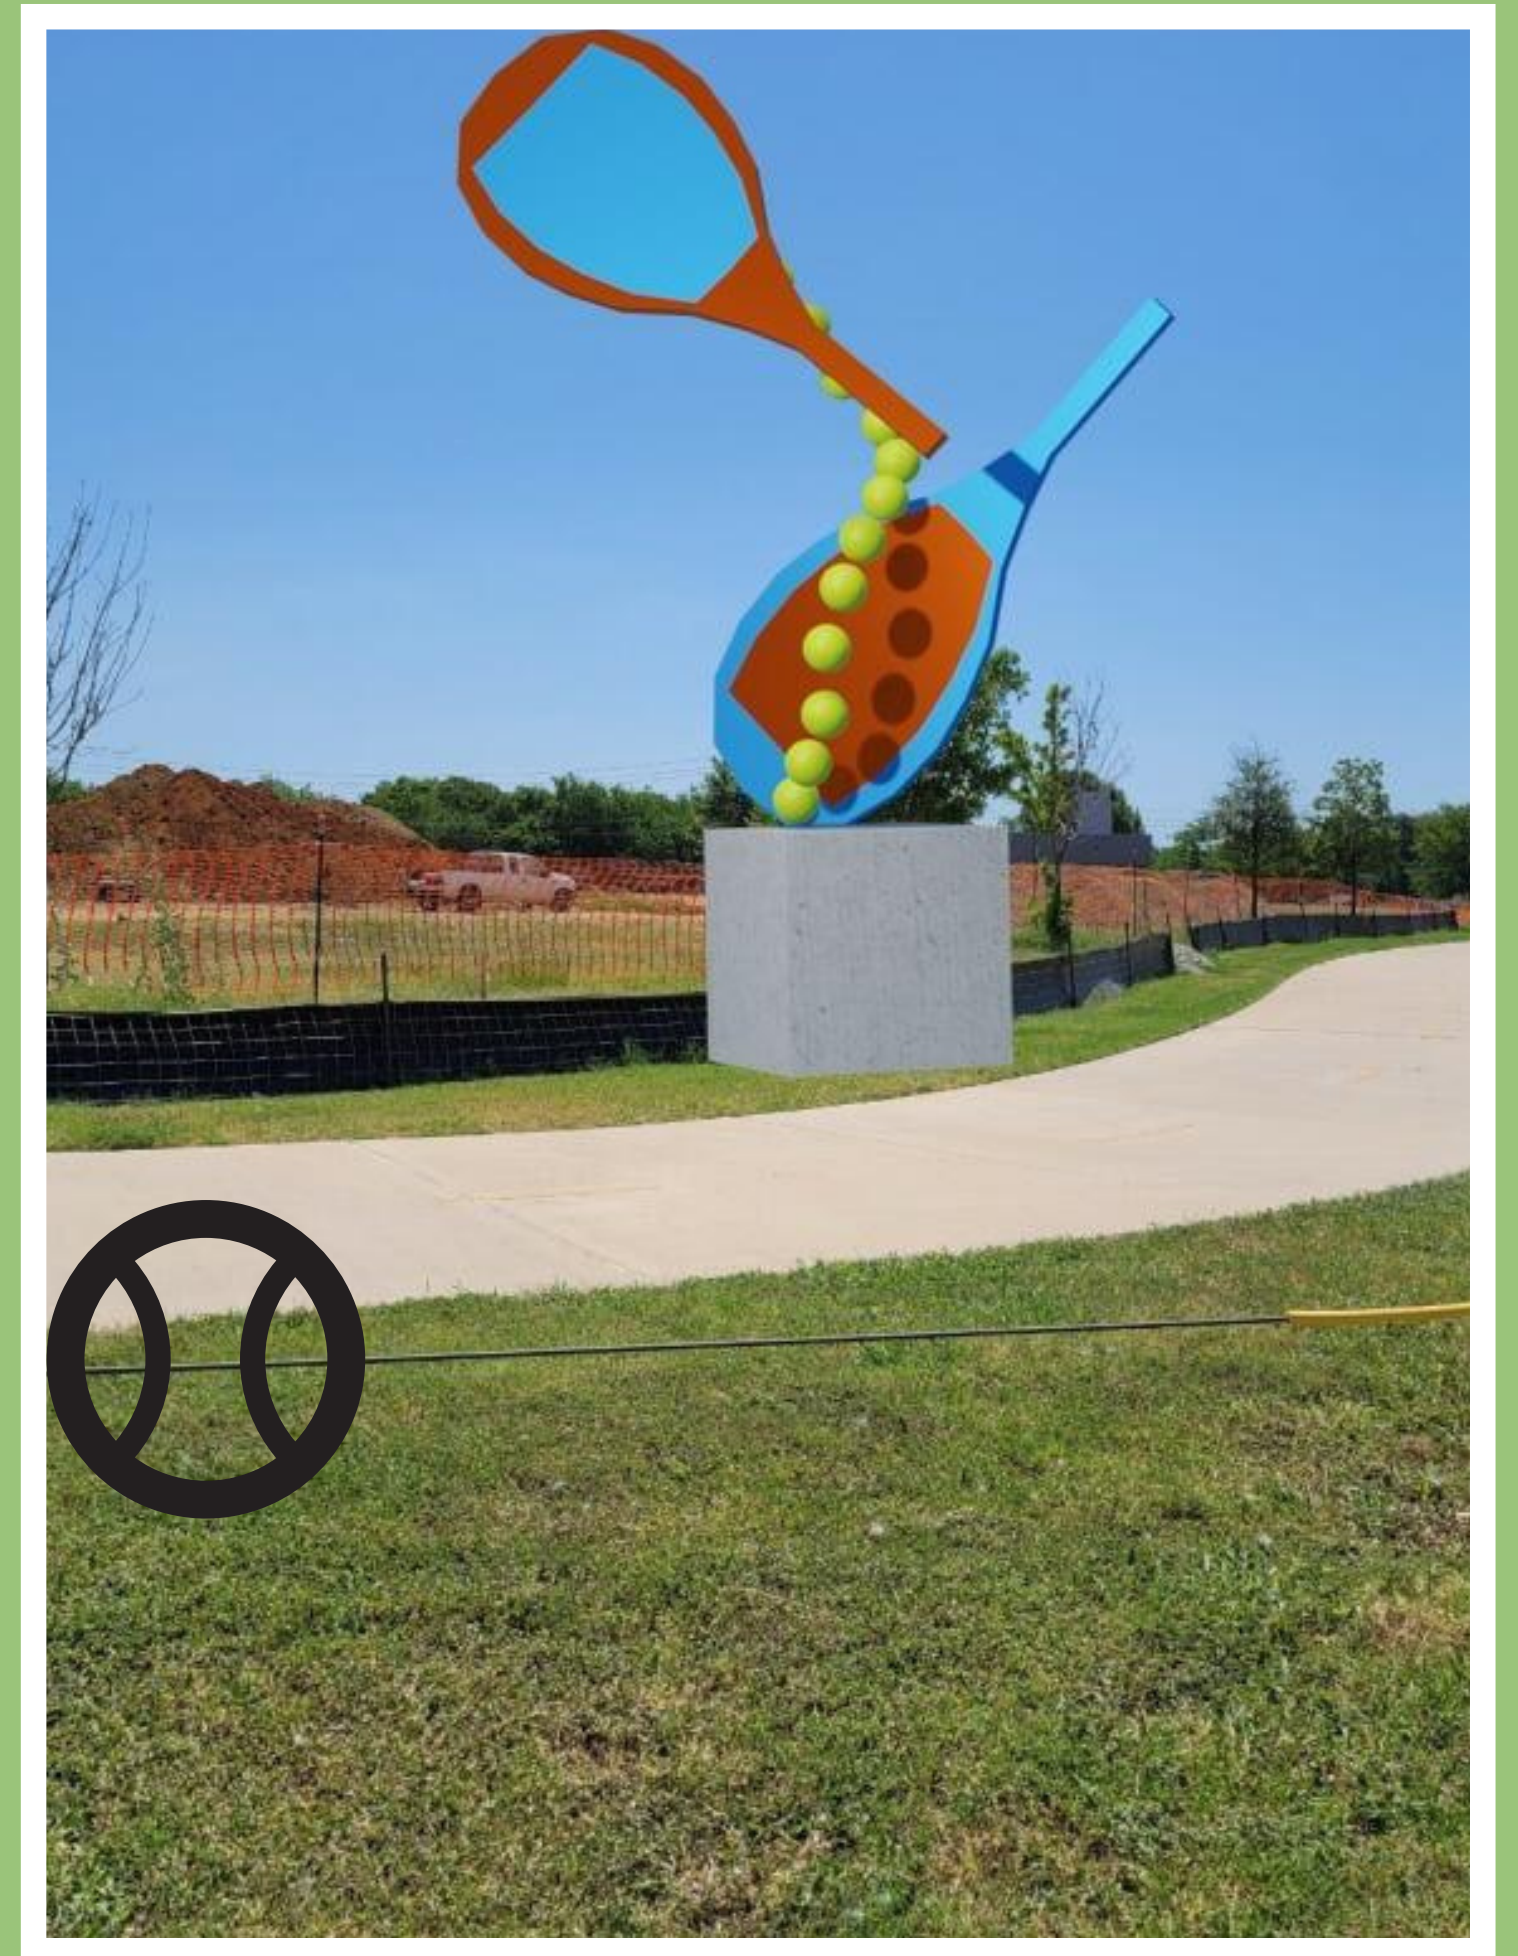

PRESENTED BY CHRISTINE SANDERS

# WHY THIS IS MORE THEN JUST A SCULPTURE

This piece is a collaborative piece. Designed by Christine Sanders, to be welded and assembled by Brandon Taylor and 23 Design Co. that will contain four community mosaics in the center of the rackets. The mosaics will be created by Christine with community members of various ages that live in Denton and have an interest in the park. The desire is to give a sense of ownership and pride in the park with the inspiration of words, color, and scale.

# CHRISTINE SANDERS

My goal is always to bring people together. My dream is to see bright colored mosaics around town that bring people together. I like to help people and I like to teach, this is why I like to involve as many people as I can to share in the joy of the creative process of my ideas. Giving the community members a chance to take ownership in the art that makes their daily life brighter and their home and neighborhood something that brings joy to them and visitors. I love bright colors and building materials. This along with my travels have formed a love for mosaics that I just have to share with my community. A simple task, when shared is a thing of beauty.

counting

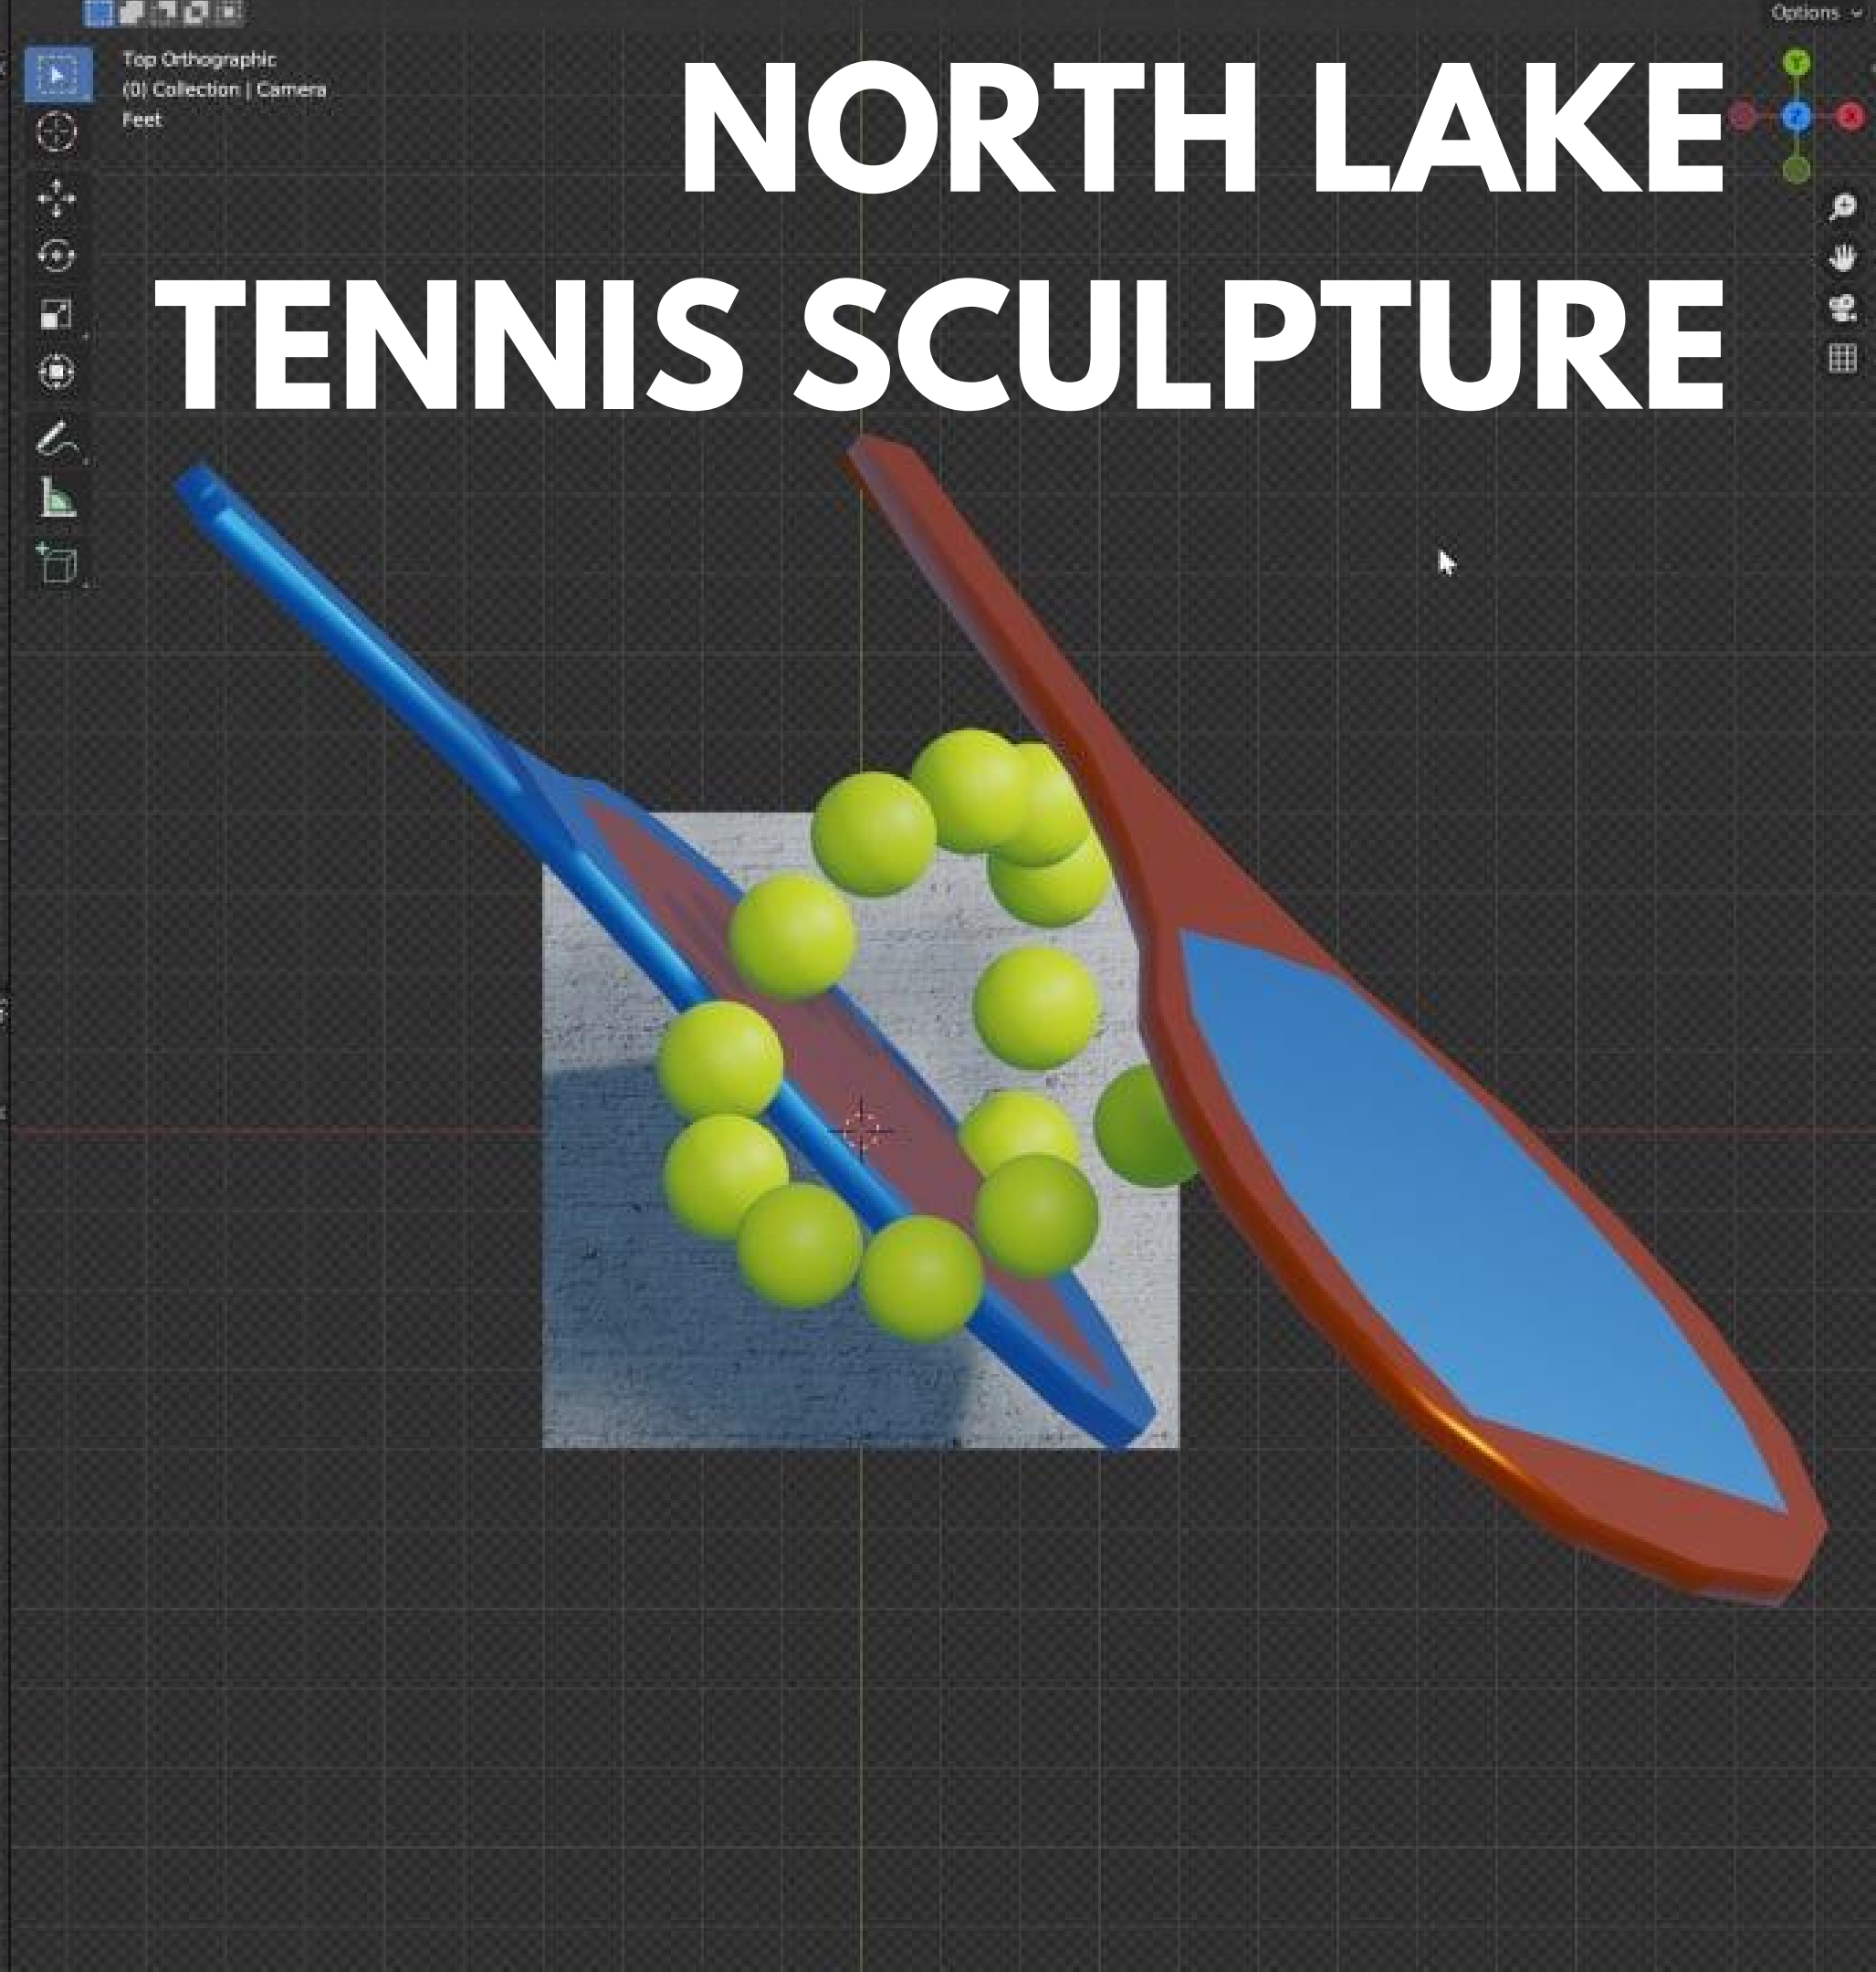

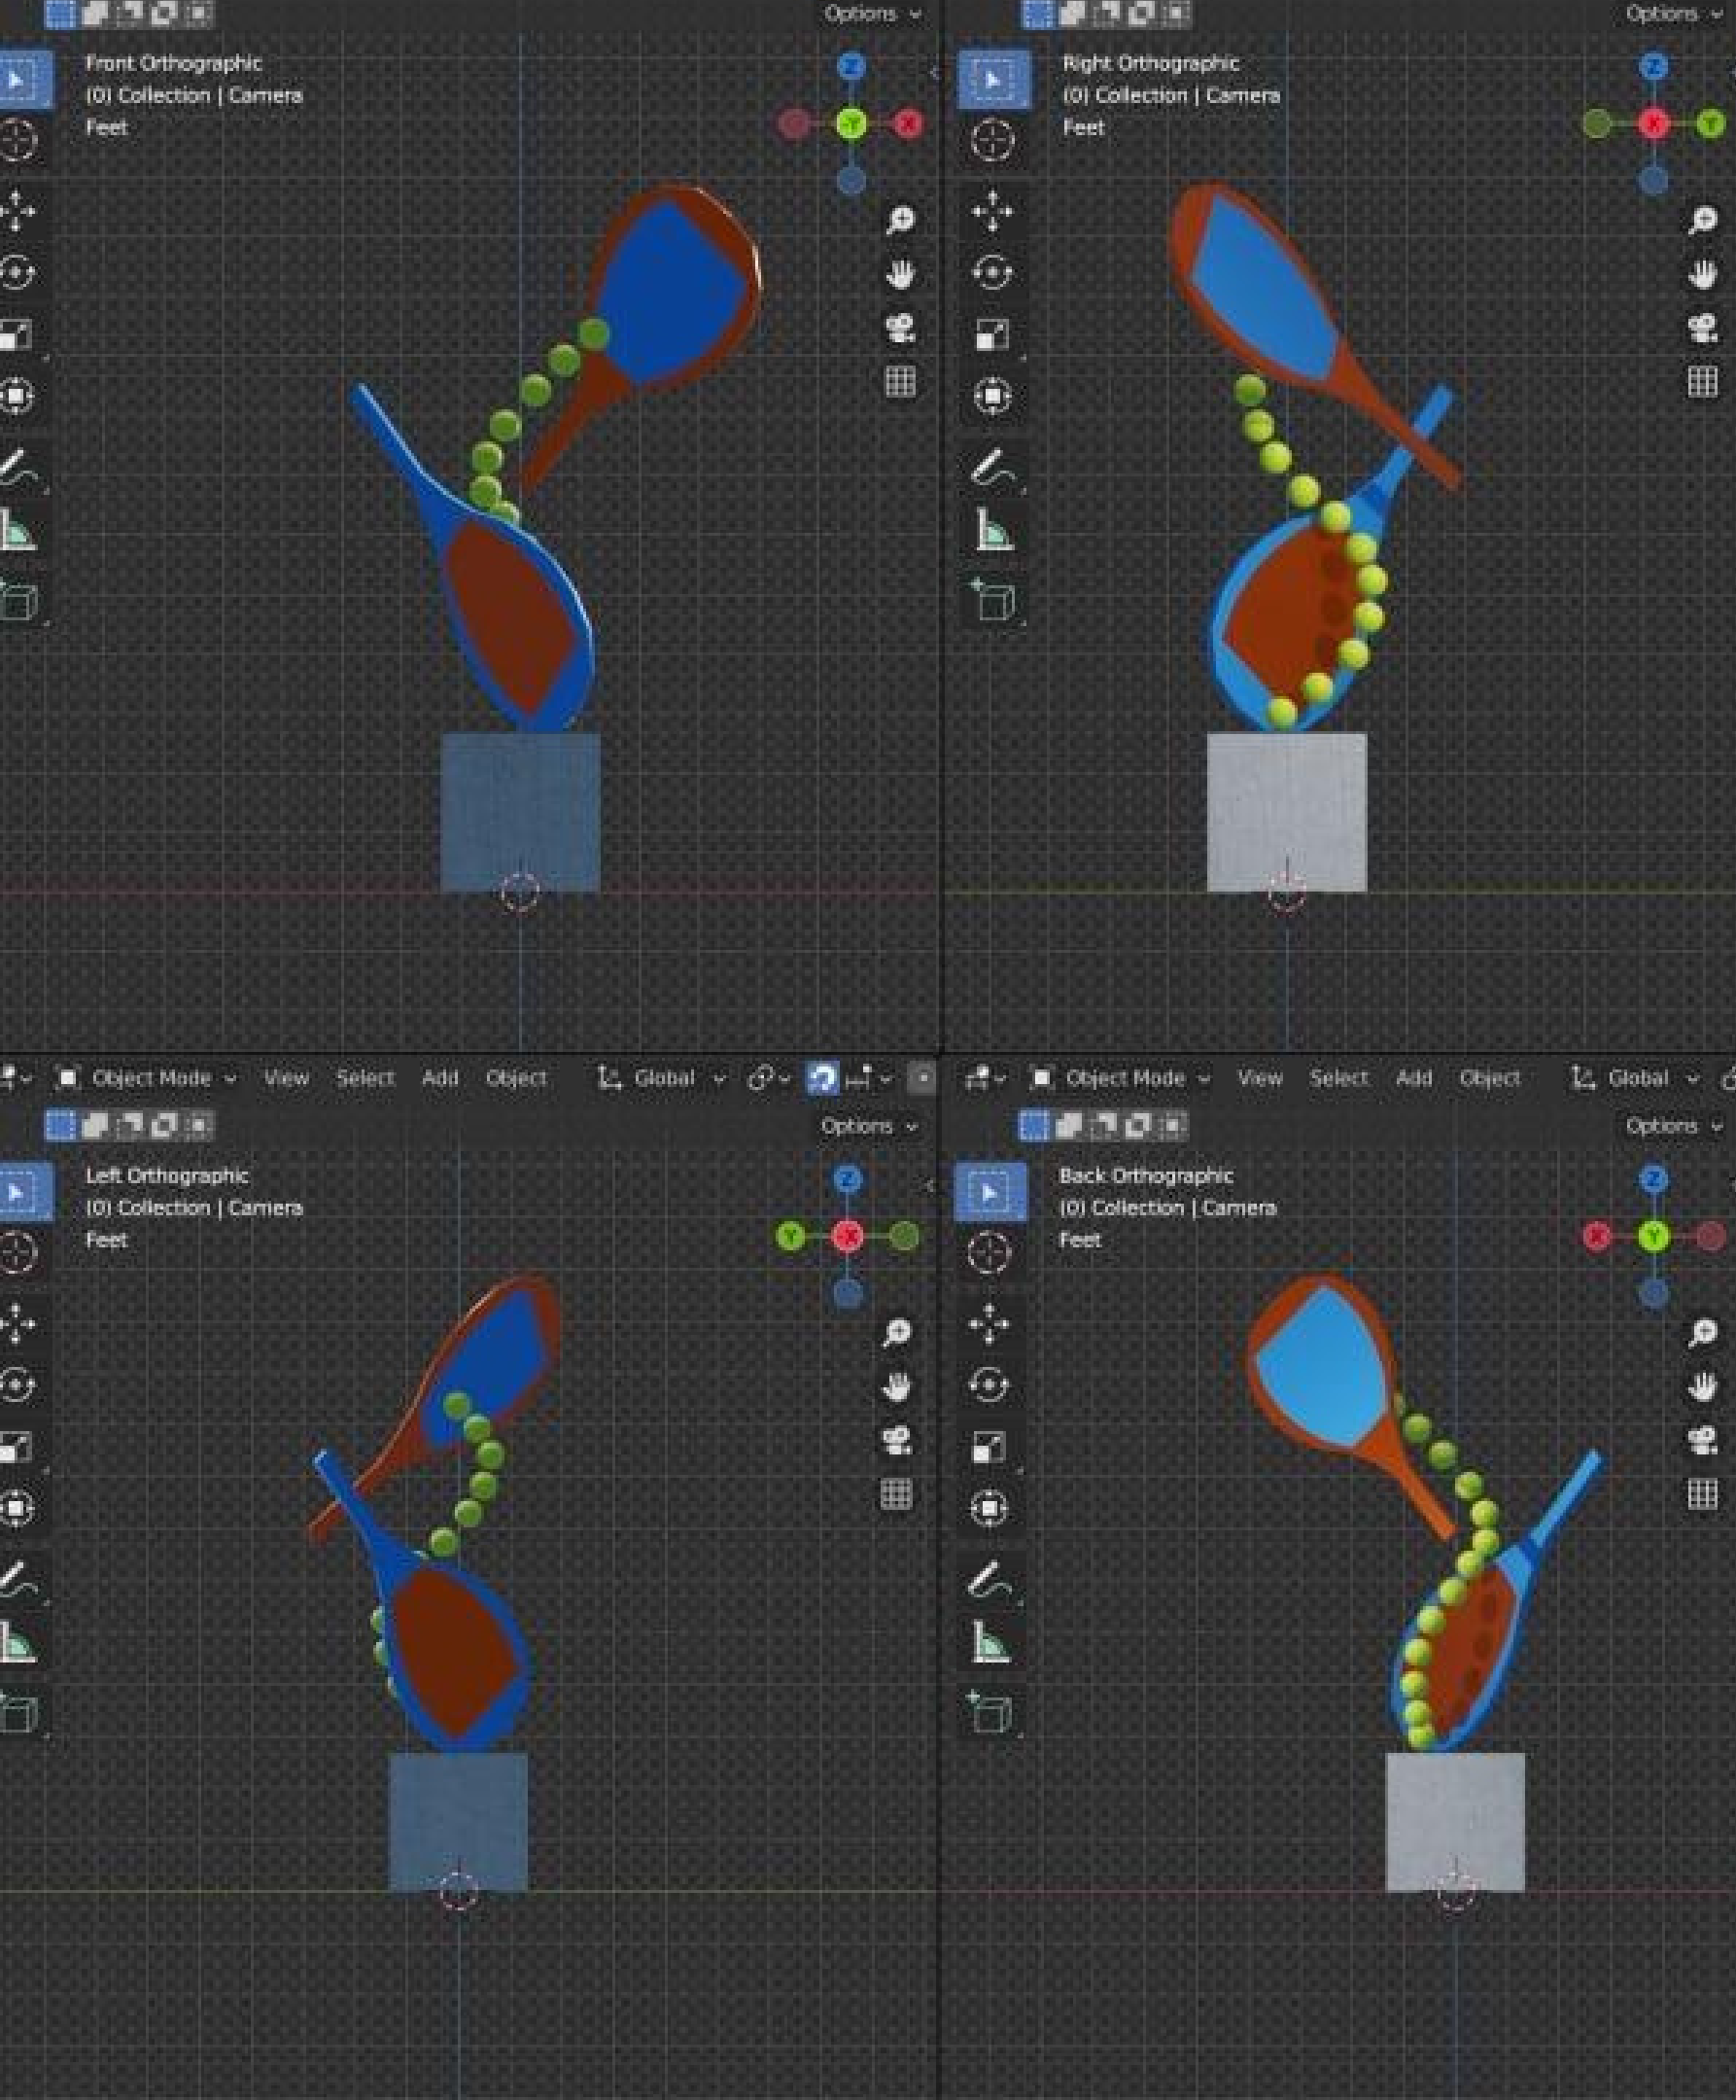

Rackets will be welded metal. The bottom racket will be attached to the base, and the top one will be attached to the line of tennis balls and will appear to be floating from some angles, and overlapping from other views. The rackets will have mosaics that will be by Christine with help from different local community groups and installed in the center of the racket heads on both sides.

# NORTH LAKE TENNIS SCULPTURE

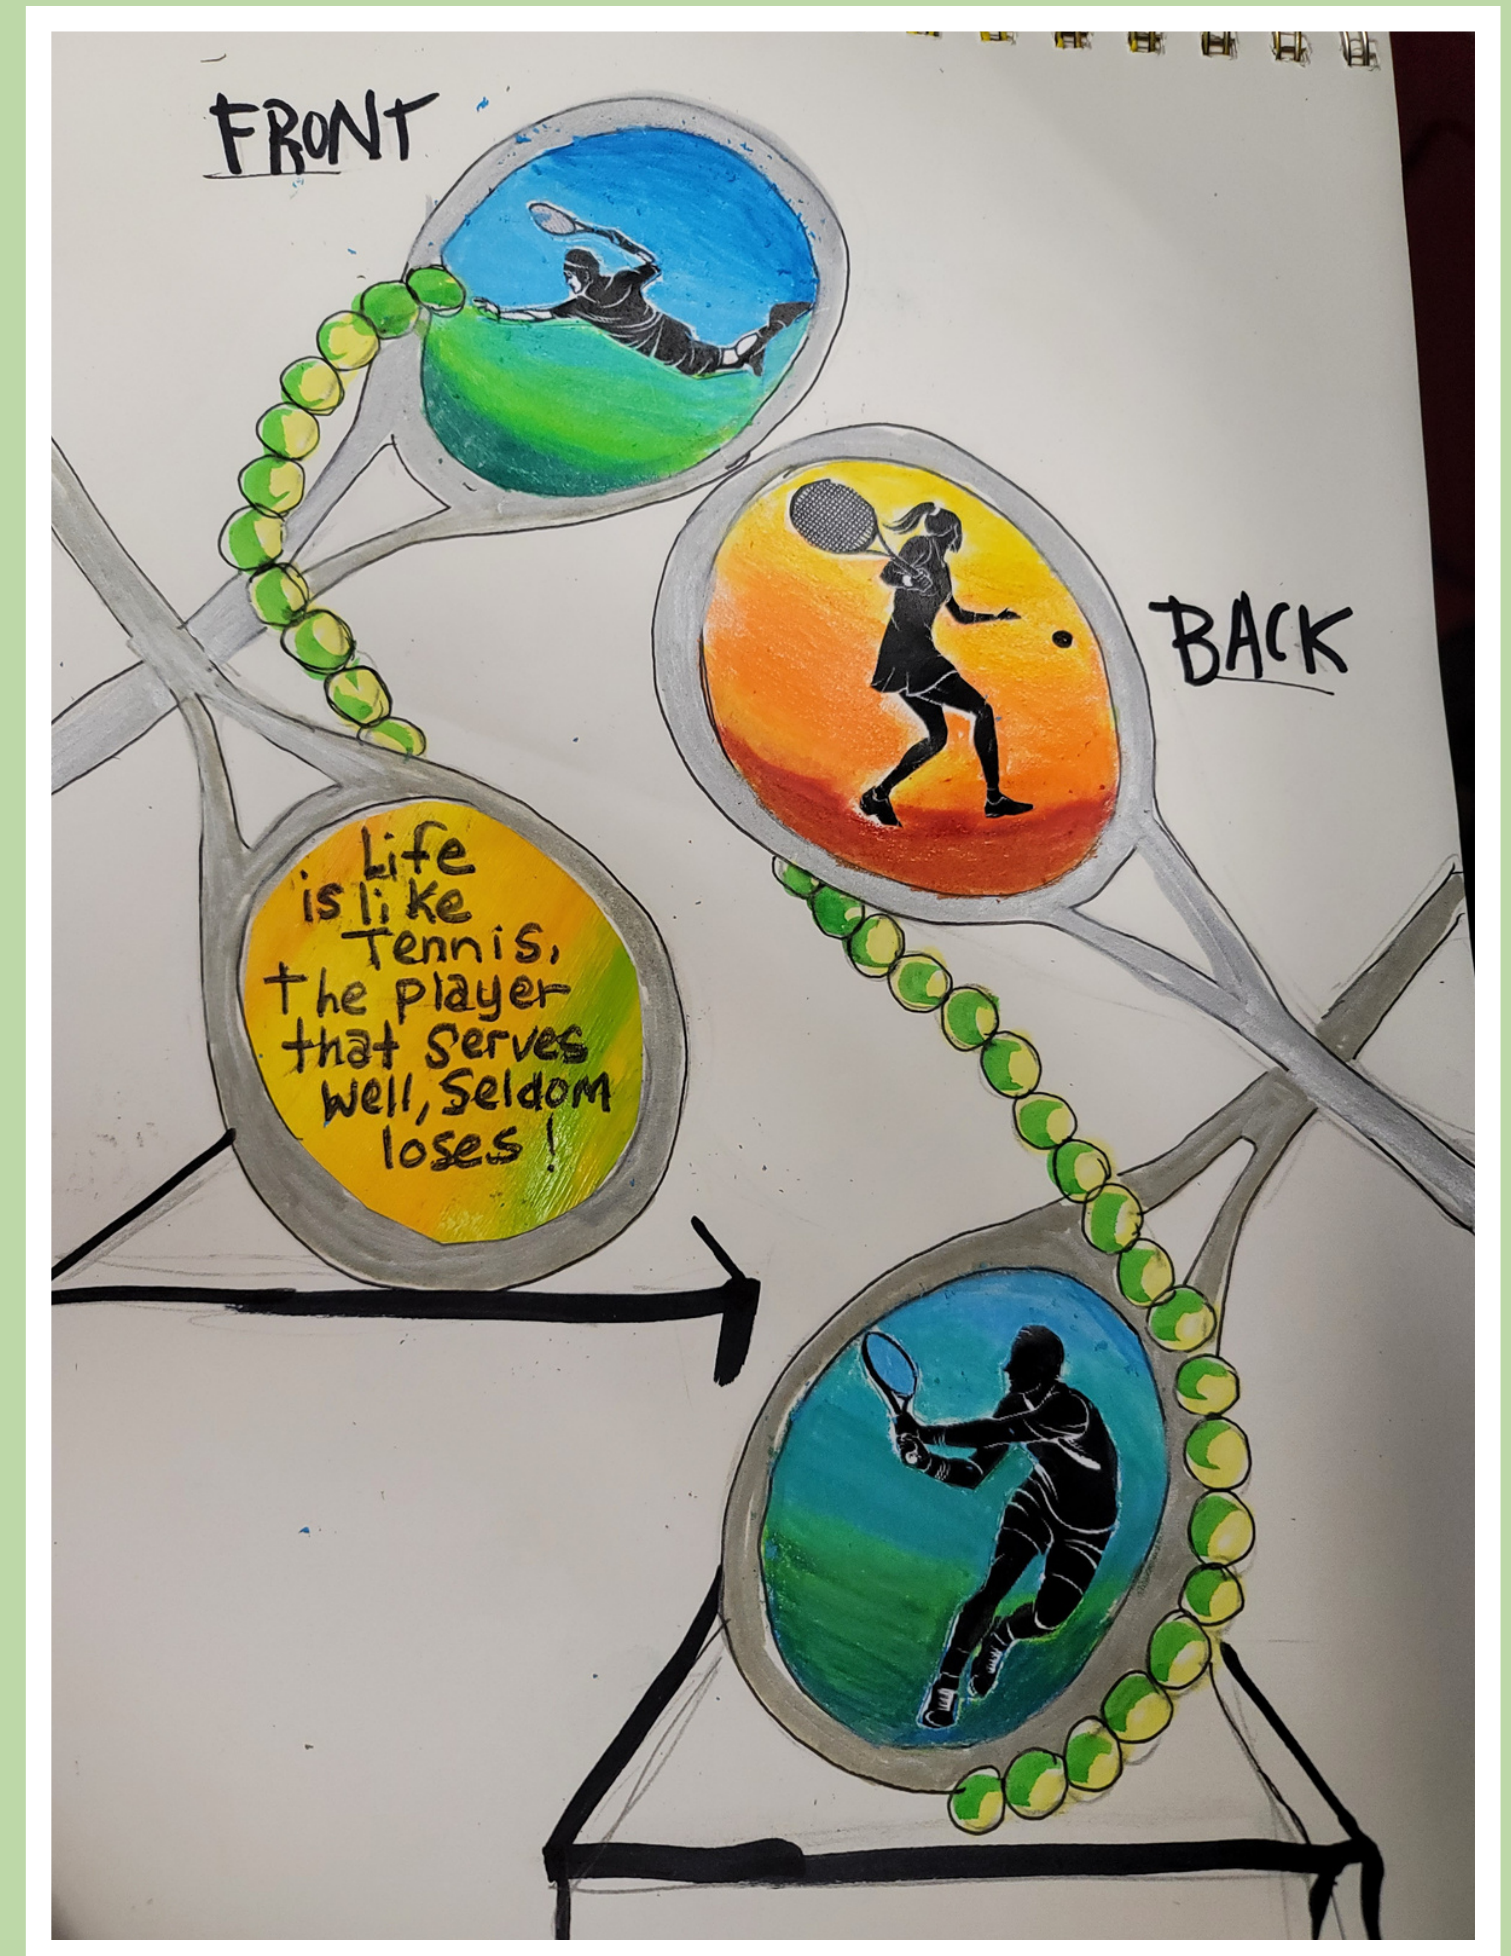

# PROJECT MANUFACTURED IN COLLABORATION BY 23 DESIGN CO.

Total height of the sculpture will be approximately 12' from the top of the 4' concrete base.
