MONTHLY CONSTRUCTION REPORT August 2022

The following provides a status update on the capital improvement projects that are in progress at the Airport:

Air Traffic Control Tower Upgrades (Status Updated)

Staff put out an RFP for upgrades in the control tower. These upgrades include, a new voice switch, new backup radios, and several console modifications. The bids have come in and a contract has been approved by council. The equipment install has been substantially completed, with a few punch list items still in the works. These items are expected to be resolved by the end of August.
