CITY OF DENTON, TEXAS

STANDARD AGREEMENT FOR ENGINEERING RELATED PROFESSIONAL SERVICES

This AGREEMENT is between the City of Denton, a Texas home-rule municipality ("CITY"), and **KIMLEY-HORN AND ASSOCIATES, INC.**, with its corporate office at 421 Fayetteville Street, Suite 600, Raleigh, NC 27601 and authorized to do business in Texas, ("ENGINEER"), for a PROJECT generally described as: PCWRP Condition Assessment (the "PROJECT").

SECTION 1 **Scope of Services**

- A. The CITY hereby agrees to retain the ENGINEER, and the ENGINEER hereby agrees to perform, professional engineering services set forth in the Scope of Services attached hereto as Attachment A. These services shall be performed in connection with the PROJECT.
- B. Additional services, if any, will be requested in writing by the CITY. CITY shall not pay for any work performed by ENGINEER or its consultants, subcontractors and/or suppliers that has not been ordered in advance and in writing. It is specifically agreed that ENGINEER shall not be compensated for any additional work resulting from oral orders of any person.

SECTION 2 **Compensation and Term of Agreement**

- A. The ENGINEER shall be compensated for all services provided pursuant to this AGREEMENT in an amount not to exceed \$330,000 in the manner and in accordance with the fee schedule as set forth in Attachment A. Payment shall be considered full compensation for all labor, materials, supplies, and equipment necessary to complete the services described in Attachment A.
- B. Unless otherwise terminated pursuant to Section 6. D. herein, this AGREEMENT shall be for a term beginning upon the effective date, as described below, and shall continue for a period which may reasonably be required for the completion of the PROJECT, until the expiration of the funds, or completion of the PROJECT and acceptance by the CITY, whichever occurs first. ENGINEER shall proceed diligently with the PROJECT to completion as described in the PROJECT schedule as set forth in Attachment A.

SECTION 3 **Terms of Payment**

Payments to the ENGINEER will be made as follows:

A. Invoice and Payment

- (1) The Engineer shall provide the City sufficient documentation, including but not limited to meeting the requirements set forth in the PROJECT schedule as set forth in Attachment A to reasonably substantiate the invoices.
- (2) The ENGINEER will issue monthly invoices for all work performed under this AGREEMENT. Invoices for the uncontested performance of the particular services are due and payable within 30 days of receipt by City.
- (3) Upon completion of services enumerated in Section 1, the final payment of any balance for the uncontested performance of the services will be due within 30 days of receipt of the final invoice.
- (4) In the event of a disputed or contested billing, only that portion so contested will be withheld from payment, and the undisputed portion will be paid. The CITY will exercise reasonableness in contesting any bill or portion thereof. No interest will accrue on any contested portion of the billing until mutually resolved.
- (5) If the CITY fails to make payment in full to ENGINEER for billings contested in good faith within 60 days of the amount due, the ENGINEER may, after giving 7 days' written notice to CITY, suspend services under this AGREEMENT until paid in full. In the event of suspension of services, the ENGINEER shall have no liability to CITY for delays or damages caused the CITY because of such suspension of services.

SECTION 4 Obligations of the Engineer

A. General

The ENGINEER will serve as the CITY's professional engineering representative under this AGREEMENT, providing professional engineering consultation and advice and furnishing customary services incidental thereto.

B. Standard of Care

The ENGINEER shall perform its services:

- (1) with the professional skill and care ordinarily provided by competent engineers practicing in the same or similar locality and under the same or similar circumstances and professional license; and
- (2) as expeditiously as is prudent considering the ordinary professional skill and care of a competent engineer.

C. Subsurface Investigations

- (1) The ENGINEER shall advise the CITY with regard to the necessity for subcontract work such as special surveys, tests, test borings, or other subsurface investigations in connection with design and engineering work to be performed hereunder. The ENGINEER shall also advise the CITY concerning the results of same. Such surveys, tests, and investigations shall be furnished by the CITY, unless otherwise specified in Attachment A.
- (2) In soils, foundation, groundwater, and other subsurface investigations, the actual characteristics may vary significantly between successive test points and sample intervals and at locations other than where observations, exploration, and investigations have been made. Because of the inherent uncertainties in subsurface evaluations, changed or unanticipated underground conditions may occur that could affect the total PROJECT cost and/or execution. These conditions and cost/execution effects are not the responsibility of the ENGINEER.

D. Preparation of Engineering Drawings

The ENGINEER will provide to the CITY the original drawings of all plans in ink on reproducible mylar sheets and electronic files in .pdf format, or as otherwise approved by CITY, which shall become the property of the CITY. CITY may use such drawings in any manner it desires; provided, however, that the ENGINEER shall not be liable for the use of such drawings for any project other than the PROJECT described herein.

E. Engineer's Personnel at Construction Site

- (1) The presence or duties of the ENGINEER's personnel at a construction site, whether as on-site representatives or otherwise, do not make the ENGINEER or its personnel in any way responsible for those duties that belong to the CITY and/or the CITY's construction contractors or other entities, and do not relieve the construction contractors or any other entity of their obligations, duties, and responsibilities, including, but not limited to, all construction methods, means, techniques, sequences, and procedures necessary for coordinating and completing all portions of the construction work in accordance with the AGREEMENT Documents and any health or safety precautions required by such construction work. The ENGINEER and its personnel have no authority to exercise any control over any construction contractor or other entity or their employees in connection with their work or any health or safety precautions.
- (2) Except to the extent of specific site visits expressly detailed and set forth in Attachment A, the ENGINEER or its personnel shall have no obligation or responsibility to visit the construction site to become familiar with the progress or quality of the completed work on the PROJECT or to determine, in general, if

the work on the PROJECT is being performed in a manner indicating that the PROJECT, when completed, will be in accordance with the AGREEMENT Documents, nor shall anything in the AGREEMENT Documents or this AGREEMENT between CITY and ENGINEER be construed as requiring ENGINEER to make exhaustive or continuous on-site inspections to discover latent defects in the work or otherwise check the quality or quantity of the work on the PROJECT. If the ENGINEER makes on-site observation(s) of a deviation from the AGREEMENT Documents, the ENGINEER shall inform the CITY.

- (3) When professional certification of performance or characteristics of materials, systems or equipment is reasonably required to perform the services set forth in the Scope of Services, the ENGINEER shall be entitled to rely upon such certification to establish materials, systems or equipment and performance criteria to be required in the AGREEMENT Documents.

F. Opinions of Probable Cost, Financial Considerations, and Schedules

- (1) The ENGINEER shall provide opinions of probable costs based on the current available information at the time of preparation, in accordance with Attachment A.
- (2) In providing opinions of cost, financial analyses, economic feasibility projections, and schedules for the PROJECT, the ENGINEER has no control over cost or price of labor and materials; unknown or latent conditions of existing equipment or structures that may affect operation or maintenance costs; competitive bidding procedures and market conditions; time or quality of performance by third parties; quality, type, management, or direction of operating personnel; and other economic and operational factors that may materially affect the ultimate PROJECT cost or schedule. Therefore, the ENGINEER makes no warranty that the CITY's actual PROJECT costs, financial aspects, economic feasibility, or schedules will not vary from the ENGINEER's opinions, analyses, projections, or estimates.

G. Construction Progress Payments

Recommendations by the ENGINEER to the CITY for periodic construction progress payments to the construction contractor will be based on the ENGINEER's knowledge, information, and belief from selective sampling and observation that the work has progressed to the point indicated. Such recommendations do not represent that continuous or detailed examinations have been made by the ENGINEER to ascertain that the construction contractor has completed the work in exact accordance with the AGREEMENT Documents; that the final work will be acceptable in all respects; that the ENGINEER has made an examination to ascertain how or for what purpose the construction contractor has used the moneys paid; that title to any of the work, materials, or equipment has passed to the CITY free and clear of liens, claims, security interests, or

encumbrances; or that there are not other matters at issue between the CITY and the construction contractor that affect the amount that should be paid.

H. Record Drawings

Record drawings, if required, will be prepared, in part, on the basis of information compiled and furnished by others, and may not always represent the exact location, type of various components, or exact manner in which the PROJECT was finally constructed. The ENGINEER is not responsible for any errors or omissions in the information from others that is incorporated into the record drawings.

I. Right to Audit

- (1) ENGINEER agrees that the CITY shall, until the expiration of five (5) years after final payment under this AGREEMENT, have access to and the right to examine and photocopy any directly pertinent books, documents, papers and records of the ENGINEER involving transactions relating to this AGREEMENT. ENGINEER agrees that the CITY shall have access during normal working hours to all necessary ENGINEER facilities and shall be provided adequate and appropriate work space in order to conduct audits in compliance with the provisions of this section. The CITY shall give ENGINEER reasonable advance notice of intended audits.
- (2) ENGINEER further agrees to include in all its subconsultant agreements hereunder a provision to the effect that the subconsultant agrees that the CITY shall, until the expiration of five (5) years after final payment under the subcontract, have access to and the right to examine and photocopy any directly pertinent books, documents, papers and records of such subconsultant, involving transactions to the subcontract, and further, that the CITY shall have access during normal working hours to all subconsultant facilities, and shall be provided adequate and appropriate work space, in order to conduct audits in compliance with the provisions of this section together with subsection (3) hereof. CITY shall give subconsultant reasonable advance notice of intended audits.
- (3) ENGINEER and subconsultant agree to photocopy such documents as may be requested by the CITY. The CITY agrees to reimburse ENGINEER for the cost of copies at the rate published in the Texas Administrative Code in effect as of the time copying is performed.

M. Asbestos or Hazardous Substances

- (1) If asbestos or hazardous substances in any form are encountered or suspected, the ENGINEER will stop its own work in the affected portions of the PROJECT to permit testing and evaluation.

N. Permitting Authorities - Design Changes

If permitting authorities require design changes so as to comply with published design criteria and/or current engineering practice standards which the ENGINEER should have been aware of at the time this AGREEMENT was executed, the ENGINEER shall revise plans and specifications, as required, at its own cost and expense. However, if design changes are required due to the changes in the permitting authorities' published design criteria and/or practice standards criteria which are published after the date of this AGREEMENT which the ENGINEER could not have been reasonably aware of, the ENGINEER shall notify the CITY of such changes and an adjustment in compensation will be made through an amendment to this AGREEMENT.

Scope for Engineering Design Related Services for:

PECAN CREEK WATER RECLAMATION PLANT CONDITION ASSESSMENT

The ENGINEER will perform its services pursuant to the requirements delineated below. Services under this attachment include engineering services for the PECAN CREEK WATER RECLAMATION PLANT CONDITION ASSESSMENT project.

Project Understanding

The CITY needs to expand the existing Pecan Creek Water Reclamation Plant (PCWRP) to 26 MGD. Currently, PCWRP is designed and permitted to discharge 21 MGD. An updated discharge permit submitted to the Texas Commission on Environmental Quality (TCEQ) includes two additional phases of 26 MGD and 30 MGD, respectfully. The CITY anticipates receiving an approved TCEQ discharge permit in early 2023.

This project will identify the improvements needed to the existing North and South treatment trains to remain in service for the foreseeable future and work with the Expansion to 26 MGD Improvement Project.

ENGINEER will provide professional services for the following tasks:

- Task 1 – Asset Inventory and Analysis
- Task 2 – Prioritization/Risk Criteria Development
- Task 3 – Condition Assessment
- Task 4 – Risk Analysis and Recommendations Report
- Task 5 – Additional Services

Task 1 – ASSET INVENTORY AND ANALYSIS

A. Asset Database Development

1. Develop asset inventory database
 - a. Develop asset hierarchy
 - b. Organize and compile facility assets based on existing facility records for the following units:
 1. Headworks
 2. Primary Clarifiers
 3. Aeration Basins
 4. Secondary Clarifiers
 5. Filters
 6. UV disinfection
 7. Solids handling
 8. Reclaimed water system
 - c. Identify asset attribute data that will be used to support subsequent risk analyses.

Meetings:

- a. Prepare for and attend (1) project kickoff meeting.
- b. Prepare for and attend (1) database workshop review meeting.
- c. Prepare meeting notes and distribute to the CITY.
- d. Facilitate and attend site visit to existing water reclamation plant.

Deliverables:

- a. Asset Inventory Database in electronic form.

Services/Deliverables provided by the CITY:

- a. Participate in project kickoff meeting and database workshop review meeting.
- b. Attend water reclamation plant site visit.

Task 2 – PRIORITIZATION/RISK CRITERIA DEVELOPMENT

A. Risk Protocol

The ENGINEER will prepare for and conduct the risk protocol development process. This process includes the following items:

1. Determine the probability of failure (POF) for each asset by using an asset's estimated useful life (EUL) as the starting point for this scoring with condition assessment data being used to update/modify the actual score. Using physical and/or

performance condition assessment data will enhance remaining useful life (RUL) scores based on the actual asset operability.

2. Determine the consequence of failure (COF) for each asset by analyzing an asset's criticality using three factors - capacity, compliance, and long-term operability. These factors are defined as follows:
 - a. Capacity – Is the asset capable of supporting future flows associated with the plant expansion or is the asset a bottleneck that hinders plant expansion? Hydraulic modeling will be used to define hydraulic capacity constraints. Biowin modeling will be used to define process capacity constraints.
 - b. Compliance – Are there current or future regulatory considerations that impact the long-term viability of an asset or is the asset compatible with plant expansion? Coordination and analysis with the plant expansion design project will be used to define compliance constraints.
 - c. Long-Term Operability – Does the asset meet level of service goals related to operations and maintenance (O&M) or is there an alternative asset or process that improves O&M? Coordination and analysis with the plant operations team will be used to define long-term operability constraints.

Meetings:

- a. Prepare for and attend (1) risk protocol workshop review meeting.
- b. Facilitate and attend site visit to existing water reclamation plant.

Deliverables:

- a. Risk Protocol Technical Memorandum in .pdf electronic form.
- b. Updated Asset Inventory Database with initial POF and COF scores included in electronic form.

Services/Deliverables provided by the CITY:

- a. Participate in risk protocol workshop review meeting.
- b. Attend water reclamation plant site visit.

Task 3 – CONDITION ASSESSMENT

A. Condition Assessment

1. Conduct up to three (3) site visits to develop the POF for the assets identified in Task 2.
2. The condition assessments are intended to be planning level, non-invasive field observations and are not intended to include performance testing, sampling, or detailed discipline expertise (i.e. structural analysis).
3. Rather, these high-level evaluations document observable general facility and equipment condition observations.

4. Data obtained will be based on assessment of observable normal performance and physical condition, and interviews with operations staff regarding both normal and abnormal operations.
5. Develop minimum COF threshold to determine incompatibility with plant expansion project.

Meetings:

- a. Prepare for and attend a review workshop to discuss initial COF findings.

Deliverables:

- a. Condition assessment inspection reports for each asset in .pdf electronic form.

Services/Deliverables provided by the CITY:
