

Hi Rodney,

I am asking for a public hearing on the proposed adoption of the 2015 IECC and any local amendments.

Hope you and your family are doing well.

Thank you,

Ken Gold

I am writing to request a public hearing of the 2015 Energy Conservation Code.

Thank you.

Sincerely,

Pamela Mia Paul

Dear Mr. Patterson --

This email is my request that a public hearing be held regarding the 2015 International Energy Conservation Code. There are aspects of the code that need to be dealt with in the forum of a public hearing. Thank you.

Dear Mr. Patterson,

I am writing to request a public hearing on the city's adoption of the 2015 International Energy Conservation Code. Denton can and should adapt the code so as to meet a standard beyond the minimum requirements. I believe that Denton can find unique and suitable ways to make cooling, heating, and lighting more energy efficient, as well as equally (or possibly more) affordable for both builders and home & business owners/renters than current methods of construction, while lessening its carbon footprint in new residential and commercial construction. Perhaps Denton's adoption of the code can also provide incentives and/or requirements when retrofitting old construction.

Thank you and best wishes,

Jennifer Lane

Denton, Texas 76205

I would like to request a public hearing on the city's adoption of the 2015 International Energy Conservation Code at the next opportunity. This is clearly a topic that many of us would like to discuss with our council members about perhaps adding new minimum requirements to this energy code in an effort to lower our carbon foot print. Of particular interest to me is getting the city to reach out to home builders in this area to initiate discussions about solar-ready homes.

Sincerely,

Larry Beck

Denton, Tx. 76209

I am respectfully requesting a public hearing on the city's proposed adoption of the 2015 International Energy Conservation Code.

Thank you for making Denton a better place!!

Elida Tamez

Dear Rodney,

Thank you for your presentation at today's work session on the city's adoption of the 2015 International Energy Conservation Code. I am writing to request a public hearing on this topic so that citizens can propose ways in which the city of Denton can feasibly and affordably augment this policy to help Denton lower its carbon footprint and encourage greener and more affordable options in residential and commercial construction beyond the minimum requirements of the 2015 Energy Conservation Code. I see this as a great opportunity to make cooling, heating, and lighting more energy efficient, equally or, ideally, more affordable for both builders and home & business owners/renters, and with a smaller carbon footprint in new residential and commercial construction --possibly even providing incentives (if not requirements) for retrofitting old construction.

Thanks for your consideration, and best regards,

Deborah Armintor

Dear Mr. Patterson,

My wife and I, acting as two residents of Denton, respectfully request that a public hearing be held to discuss the city's proposed adoption of the International Energy Conservation Code.

Thank you.

Sincerely,
Ed and Carol Soph
