SCHEDULE EGR

ECONOMIC GROWTH RIDER

(Effective 10/01/17~~6~~)

PURPOSE

The purpose of this ~~R~~Rider is to facilitate local economic growth and expand the ad valorem tax base of the City ~~of Denton~~.

AVAILABILITY

This ~~R~~Rider is available to the Customers who:

- (1) Receive service from Rate Schedules GSL or TGS; and
- (2) Pay City ~~of Denton~~ ad valorem tax; and
- (3) Receive no electric service discounts other than those specifically defined in the GSL or TGS ~~R~~Rate ~~s~~Schedules.

APPLICATION

This ~~R~~Rider is available to electric service supplied at any one location. It is for firm electric service applicable to new and existing ~~C~~customers as described below, over a five (5) year period. This ~~R~~Rider is available to the following classes of ~~C~~customers:

- (1) New ~~C~~Customers whose electric service represents demand not previously served by the City at any location in the City's service area in the last twelve (12) months, where such metered demand will be in excess of 1,000 kVA and customer load factor must be greater than the Denton Municipal Electric ("DME") system load factor, as estimated and mutually agreed upon by the DME General Manager and the ~~C~~Customer.
- (2) Existing ~~C~~Customers served under Rate Schedules GSL or TGS who increase their prior existing metered demand by 1,000 kVA and customer load factor must be greater than the DME system load factor. This increase shall be verified by sub-metering (at the Customer's expense) the additional load. If sub-metering is not possible, at the discretion of the DME General Manager, the increase may be verified by comparing a three-month rolling average of the new level of demand to the prior demand averaged for corresponding months. During periods in which this verification method cannot be applied, the General Manager and the Customer may develop a mutually agreed-upon formula to estimate the base and additional demand levels.

In light of additional costs associated with the Economic Growth Rider and to mitigate potential risk to ratepayers, any participant in the Economic Growth Rider must be, at the time this ~~R~~Rider is applied for and continuing while such ~~R~~Rider is in effect, a ~~e~~Customer in good standing of all Denton Municipal Utilities, including ~~S~~solid ~~W~~waste services. First Year	50%
Second Year	40%
Third Year	30%
Fourth Year	20%
Fifth Year	10%

CONTRACT PERIOD

The term of the contract will be for five (5) years.

(Effective 10/01/176)

PROGRAM SUMMARY

The objective of the GreenSense Incentive Program (“Program”) is to reduce energy demand and consumption by promoting energy conservation, thereby reducing the utility bills of ~~Denton Municipal Electric (DME) City~~ eCustomers, reducing the peak load of ~~the Denton Municipal Electric’s (“DME”)’s~~ electric system, reducing emissions in the state, and promoting energy conservation. The Program offers incentives, in the form of credits on the electric service bills of ~~DME City~~ retail customers. Cash incentives may be paid to retail customers for the installation of photovoltaic applications.

In light of additional costs associated with the GreenSense Incentive Program and to mitigate potential risk to ratepayers, any participant in the GreenSense Incentive ~~Program~~ must be, at the time this program is applied for and continuing while such program is in effect, a eCustomer in good standing of all Denton Municipal Utilities, including ~~S~~solid ~~W~~waste services. Unless legal review procedures have been invoked in good faith regarding the obligation, a eCustomer in good standing for the purpose of this ~~Rate Rider Program~~ is defined as a eCustomer not owing any unpaid utility or solid waste debt obligation that is over forty-five (45) days past due to the City ~~of Denton, Texas~~ during the previous ~~twelve (12)~~ months.

Program applicants will be able to qualify for multiple incentives simultaneously, unless specified in the individual guidelines. A separate application may be necessary for each incentive. The Program will be in effect each fiscal year beginning on October 1, until the allotted funding is depleted or until cancellation of the program by ~~the City DME~~. At the time the funds are depleted, no additional applications for participation will be accepted until the next fiscal year.

Qualifying applicants must receive electric service from ~~DME the City~~. The ~~P~~program guidelines and payments ~~provisions~~ are subject to change by ~~the City DME~~ without prior notice. ~~The City DME~~ may, at any time, discontinue the Program without prior notice. The current program guidelines may be found in the GreenSense Incentive Program Manual located at www.cityofdentondmepower.com.

During the last month of each fiscal year quarter (December, March, June, and September), the ~~DME~~ General Manager, ~~DME~~, or his/her designee shall calculate the TCRF Balancing Account. The TCRF billed amount will be calculated quarterly and adjusted accordingly by annualizing the PUCT-approved TCOS billing amounts for the current calendar year. The total TCRF Annual Billing shall be allocated to ~~the City's DME's~~ various rate classes based on projected kWh sales for that rate class. SCHEDULE DGR

DISTRIBUTED GENERATION FROM RENEWABLE SOURCES RIDER

(Effective 10/01/176)

APPLICATION

This Rider is available to any retail eCustomer receiving electric service under a City DME electric rate schedule who owns and operates an on-site generating system powered by a renewable resource capable of producing power, and ~~which is~~ interconnects with the Denton Municipal Electric ("DME") electric system. Renewable energy technology is any technology that exclusively relies on an energy source that is naturally regenerated over a short time and derived directly or indirectly from the sun or wind. A renewable energy technology does not rely on energy resources derived from fossil fuels, waste products from fossil fuels, or waste products from inorganic sources. This Rider applies to a Customer-owned generating system that primarily offsets ~~part or all~~ or part of the Customer's electric service provided by the City DME. If the Customer-owned generating ~~system larger than 50kW or if the~~ system's primary purpose is to sell energy to the grid and not offset the Customer's consumption, special arrangements and a contract may be necessary.

In light of additional costs associated with the Distributed Generation From Renewable Sources Rider and to mitigate potential risk to ratepayers, any participant in the Distributed Generation From Renewable Sources Rider must be, at the time this ~~R~~Rider is applied for and continuing while such ~~R~~Rider is in effect, a eCustomer in good standing of all Denton Municipal Utilities, including ~~S~~Solid ~~W~~Waste services. Unless legal review procedures have been invoked in good faith regarding the obligation, a eCustomer in good standing for the purpose of this Rate-Rider is defined as a eCustomer not owing any unpaid utility or solid waste debt obligation that is over forty-five (45) days past due to the City ~~of Denton, Texas~~ during the previous twelve (12) months.

CONDITIONS OF SERVICE

All charges, character of service, and terms and conditions of the electric rate schedule under which the Customer receives service shall apply except as expressly altered by this Rider.

The Customer shall comply with the City's current DME technical requirements for distributed generation interconnection. The Customer shall obtain approval from ~~DME~~the City before the Customer energizes the eCustomer's on-site generating system or interconnects it with the DME electric system. The Customer shall submit to DME a completed interconnection application form and signed ~~Standard~~Agreement for Interconnection and Parallel Operation of Distributed Generation ~~Agreement~~. The minimum term of an Agreement under this Rider is one year, extended automatically unless terminated by either party with sixty (60) days advance written notice.

The Customer is responsible for the costs of interconnecting with the DME electric system, including transformers, service lines, or other equipment determined necessary by ~~DME~~the City for safe installation and operation of the Customer's equipment with the DME electric system.

The Customer is responsible for any costs associated with required inspections and permits.

METERING

Metering under this Rider shall be performed by a single meter capable of registering the flow of electricity in two directions (delivered by the DME electric system to the Customer, and ~~received~~ delivered to the DME electric system by the Customer's system) to determine the Customer's net energy flow.

RATE

Beginning in ~~at the~~ billing period after a Customer receives approval from the City, to interconnect the Customer's on-site generating system ~~from the City of Denton~~; all energy generated by the Customer's system and delivered to the DME electric system will be considered renewable energy. The Customer shall be billed for all energy delivered by the City DME to the Customer under the approved ~~residential~~ rates.

For any generation delivered by the Customer's system to the City's DME system, up to the amount of energy delivered by DME to the Customer, the City shall credit the Customer's account for the energy generated as follows:

$$\text{Generation Credit} = [(\text{kWh delivered from the Customer's approved system}) \times (\text{Customer's base electric service rate})] + [(\text{kWh delivered from the Customer's approved system}) \times (\text{RCA } \textcolor{blue}{R}\text{ate})]$$

For all energy delivered by the Customer's system to the DME system that exceeds the amount of energy delivered by DME to the Customer, the City shall credit the Customer's account for the energy generated as follows:

$$\text{Excess Generation Credit} = (\text{kWh delivered from the } \textcolor{blue}{C}\text{ustomer's system}) \times \text{RCA } \textcolor{blue}{R}\text{ate} \quad (\text{see Schedule RCA}).$$

Any Billing Period Credit shall be applied to the utility charges due from the Customer to the City ~~of Denton~~ for the billing period.

INDEMNIFICATION

The Customer operating the renewable distributed generation system indemnifies the City DME and holds the City DME harmless for all damages and injuries to the City DME, the Customer, or others arising out of Customer's use, ownership or operation of Customer's distributed generation facilities in parallel with the City DME's system. Customer is solely responsible for providing adequate protection for operating in parallel with DME the City's system in such a manner that faults or other disturbances on the City's DME system do not cause damage to the Customer's

distributed generation equipment.

SCHEDULE IWG

INDEPENDENT WHOLESALE GENERATOR

(Effective 10/01/17~~6~~)

APPLICATION

The Independent Wholesale Generator (IWG) ~~Rate~~ is applicable to non-renewable generating installations of ten (10) MW or less interconnected to and operating in parallel with ~~the City~~~~DME~~'s distribution system, for the sole purpose of delivering the net output (gross output minus auxiliary load and step up transformer losses) of said generating installation to the Electric Reliability Council of Texas ("~~ERCOT~~") transmission grid for sale in the ERCOT wholesale power market. ~~DME~~~~The City~~ will interconnect the IWG pursuant to the terms of the ~~DME-standard~~ Agreement for Interconnection and Parallel Operation of Independent Wholesale Generation. Other services or special requirements for interconnection of a specific generating facility not included in the ~~DME-standard~~ Agreement for Interconnection and Parallel Operation of Independent Wholesale Generation, requested by the ~~IWG-Customer~~, or required by ~~the City~~~~DME~~ may be provided pursuant to negotiation and agreement by both the ~~IWG-Customer~~ and ~~the City~~~~DME~~. The provision of said additional services or requirements shall be recorded in the form of an addendum to the ~~DME-standard~~ Agreement for Interconnection and Parallel Operation of Independent Wholesale Generation.

TERMS AND CONDITIONS OF SERVICE

At a minimum, the ~~IWG-Customer~~ shall comply with the ~~City's~~ current ~~DME~~ technical requirements for independent wholesale generation interconnection specified in the ~~DME-standard~~ Agreement for Interconnection and Parallel Operation of Distributed Generation. The ~~IWG~~ Customer may not begin construction of its facilities until an Agreement for Interconnection and Parallel Operation of Distributed Generation has been signed by both the ~~IWG-Customer~~ and the ~~City of Denton~~. The ~~IWG-Customer~~ shall obtain approval from DME before the ~~IWG-Customer~~ begins operation of its generating system or interconnects it with the ~~City's~~~~DME~~ electric system. The ~~IWG-Customer~~ is responsible for any costs associated with required ~~City of Denton and/or DME~~ inspections and permits.

PRE-INTERCONNECTION STUDIES

~~DME~~~~The City~~ may, at its sole discretion perform pre-interconnection studies ~~DME or the City of Denton~~ deems appropriate, which may include, but are not restricted to, a service study, coordination study, emissions impact study, and utility system impact study. In instances where such studies are deemed necessary, the scope of such studies shall be based on the characteristics of the particular IWG generation system to be interconnected, ~~the City~~~~DME~~'s distribution system at the specified proposed location(s), and environmental characteristics of the Denton County area. Such studies will also determine whether the electric interconnection can be made consistent with safe and reliable operation of ~~the City~~~~DME~~'s distribution system. The cost of such analysis will be the responsibility of the ~~IWG-Customer~~. A cost estimate will be provided and agreed to by the

IWG Customer prior to ~~DME~~ or the City performing the studies.

SYSTEM MODIFICATIONS

The ~~IWG~~ Customer will be required to install, operate, and maintain in good order and repair, and without cost to ~~the City~~ ~~DME~~, all facilities required by ~~DME~~ ~~the City~~ for the safe operation of the IWG system in parallel with ~~the City~~ ~~DME~~'s electric system. The ~~IWG~~ Customer's IWG system shall be installed, operated, and maintained by the ~~IWG~~ Customer at all times in conformity with good electrical practice and shall comply with the National Electric Code, the National Electric Safety Code, any applicable local codes and any applicable DME service standards included in the DME Agreement for Interconnection and Parallel Operation of Independent Wholesale Generation

Any modifications or additions to ~~the City~~ ~~DME~~'s electrical system caused by the addition of the Customer's IWG system will be solely at the ~~IWG~~ Customer's expense. However, the ~~IWG~~ Customer will not acquire any ownership in these facilities. The modifications and additions may include, but are not restricted to, the upgrading of transformer insulation levels and lightening arrester ratings, the replacement of circuit breakers due to increased fault current levels, additional protective relaying and any additional metering. Further, DME may require that a communications channel(s) be installed at the ~~IWG~~ Customer's expense as part of the relay protection, remote control, remote metering, SCADA telemetry, and/or direct voice contact between DME and the ~~IWG~~ Customer.

NET MONTHLY RATE

The ~~IWG~~ Customer shall be subject to special contract arrangements and the rates charges to the Customer ~~may~~ shall consist of at a minimum, a monthly Facility Charge plus a monthly ~~d~~ Distribution Delivery eCharge ~~and plus~~ a monthly ~~d~~ Distribution Line Loss eCharge. Additional Service Charges may apply. These charges shall be calculated as follows:

Following the receipt of a 'No Operations' declaration and prior to a service provider being reinstated to legally operate within the City limits of Denton, the service provider must meet with the City staff to update their application and agreement and make payment of all monies owed to the City.
