## INSURANCE REQUIREMENTS FOR CONTRACTORS

*Bidder's attention is directed to the insurance requirements below. It is highly recommended that bidders confer with their respective insurance carriers or brokers to determine in advance of Bid submission the availability of insurance certificates and endorsements as prescribed and provided herein. If an apparent low bidder fails to comply strictly with the insurance requirements, that bidder may be disqualified from award of the contract. Upon bid award, all insurance requirements shall become contractual obligations, which the successful bidder shall have a duty to maintain throughout the course of this contract.*

### STANDARD PROVISIONS:

*Without limiting any of the other obligations or liabilities of the Contractor, the Contractor shall provide and maintain until the contracted work has been completed and accepted by the City of Denton, Owner, the minimum insurance coverage as indicated hereinafter.*

*As soon as practicable after notification of bid award, Contractor shall file with the Purchasing Department satisfactory certificates of insurance, containing the bid number and title of the project. If requested by the City, the insurer shall reduce or eliminate such deductibles or self-insured retentions with respect to the City, its officials, agents, employees and volunteers; or, the contractor shall procure a bond guaranteeing payment of losses and related investigations, claim administration and defense expenses.
- Liability policies shall be endorsed to provide the following:
  - Name as additional insured the City of Denton, its Officials, Agents, Employees and volunteers.
  - That such insurance is primary to any other insurance available to the additional insured with respect to claims covered under the policy and that this insurance applies separately to each insured against whom claim is made or

suit is brought. The inclusion of more than one insured shall not operate to increase the insurer's limit of liability.

- Provide a Waiver of Subrogation in favor of the City of Denton, its officials, agents, employees, and volunteers.
- ***Cancellation: City requires 30 day written notice should any of the policies described on the certificate be cancelled before the expiration date.***
- Should any of the required insurance be provided under a claims-made form, Contractor shall maintain such coverage continuously throughout the term of this contract and, without lapse, for a period of three years beyond the contract expiration, such that occurrences arising during the contract term which give rise to claims made after expiration of the contract shall be covered.
- Should any of the required insurance be provided under a form of coverage that includes a general annual aggregate limit providing for claims investigation or legal defense costs to be included in the general annual aggregate limit, the Contractor shall either double the occurrence limits or obtain Owners and Contractors Protective Liability Insurance.
- Should any required insurance lapse during the contract term, requests for payments originating after such lapse shall not be processed until the City receives satisfactory evidence of reinstated coverage as required by this contract, effective as of the lapse date. If insurance is not reinstated, City may, at its sole option, terminate this agreement effective on the date of the lapse.

## WALTER P MOORE

## SCOPE OF TRAFFIC ENGINEERING AND PLANNING SERVICES

**DATE:** Wednesday, November 8, 2017

**TO:** Pritam Deshmukh, P.E.

**FROM:** Rob Rae, AICP  
Kurt Schulte, AICP  
Pamela Alummoottil, P.E.

**SUBJECT:** UNT and UNTS Traffic Study

Walter P. Moore and Associates, Inc. ("WPM") is providing the following scope in response to the request of conducting a Traffic Study for the City of Denton, UNT and the UNT System (UNTS).

**Background**

As the University of North Texas continues to implement its 2013 master plan and its recently completed UNT Parking and Transportation Master Plan (PTMP), the overarching goal is to reduce the number of private vehicles on campus by implementing Traffic Demand Management (TDM) strategies. One recommendation from both the 2013 master plan and the PTMP proposes closure of street segments on Highland Avenue and Avenue C. Additionally, the City is working on preparing a Specific Area Plan (change in land use, zoning, etc.) for regions adjacent to the UNT campus. Before these plans can be implemented, it is prudent to identify the impacts of these proposed changes on the surrounding transportation system and its ability to handle changes in traffic patterns. As such, the City in conjunction with UNT and the UNT System (UNTS) would like to engage the services of a traffic consultant to prepare a Traffic Impact Analysis (TIA) for the proposed changes. The typical tasks included in the overall scope of work are outlined below.

**Scope of Work**

The tentatively proposed study area for this traffic impact analysis includes area bounded by Scripture Street on the north, Bonnie Brae Street on the west, IH-35E on the south, and Carroll Boulevard/Fort Worth Drive on the east, as shown in **Figure 1**.

**Task 1 – Data Collection**

Given that the study area is within and adjacent to the UNT campus, the traffic data will be scheduled in the fall term when classes are in session. The count locations have been identified and confirmed by the City, UNT and UNTS staff, and Walter P Moore as shown in **Figure 1**.

- Walter P Moore will collect 31 24-Hour Bi-Directional Automated Tube Counts for key roadway segments.
- Walter P Moore will collect weekday AM, Mid-day and PM peak period (6 hours total) turning movement vehicle counts and pedestrians and bicycle counts at 50 key intersections.
- Additional 24-Hour Bi-Directional Automated Tube Counts or turning movement vehicle counts will be considered as additional services and are included in a separate budget item.
- Walter P Moore will check all traffic data collected for accuracy once it has been received.

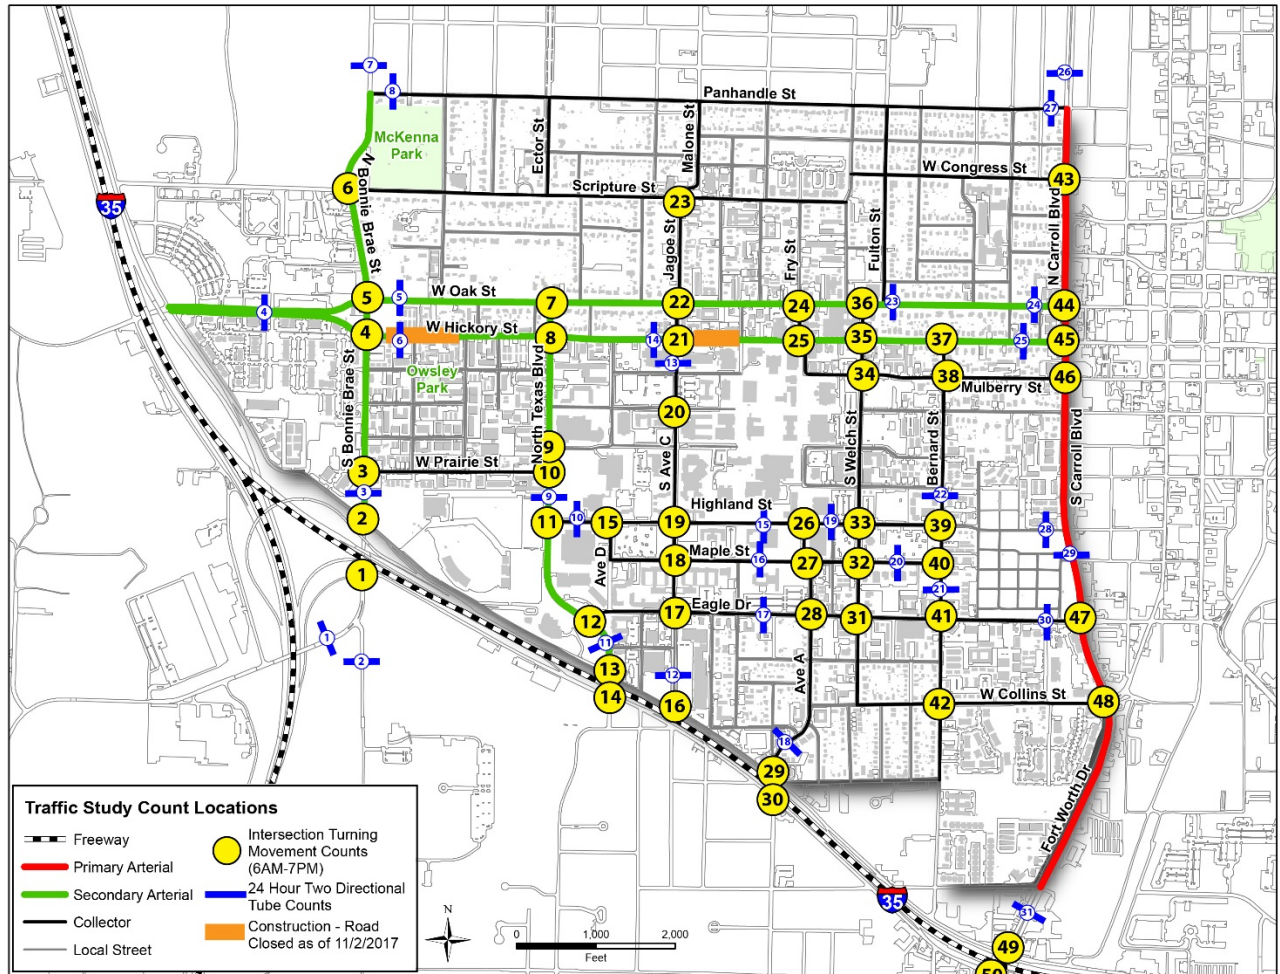

Figure 1. Study Area

Task 2 – Macro Analysis (Travel Demand Model)

Based on mutual agreement between the City of Denton, UNT and UNTS regarding all data related to this scope of work, including existing assumptions and inputs used for the Denton Travel Demand Model, Walter P Moore will enhance the Denton Travel Demand Model by refining the circulation (transportation) network and updating the land use (demographic) data within the study area which encompasses the UNT campus and the surrounding area.

- Walter P Moore will run the base model and review. Data collected in Task 1 will be utilized to calibrate the base year model to 2017. Volumes within +/- 15% are standard thresholds for validation. Although the entire model will be used only the traffic data collected in the study area will be used for validation.
- Walter P Moore will update the traffic analysis zones (TAZs) in the study area to reflect the 2017 land use and demographic conditions. Splitting or redefining may be needed to the roadway network.
- Walter P Moore will run the base year travel demand model to evaluate the volumes, level of service, and percent change of volumes in the surrounding network for each of the 5 network alternatives listed below.

- Closure of portions of Avenue C within the UNT boundaries
  - Closure of portions of Highland Street within the UNT boundaries
  - Closure of portions of Avenue C and Highland Street within the UNT boundaries
  - Closure of portions of Maple Street within the UNT boundaries
  - Perform select link analysis for various links in the scenarios
- Walter P Moore will utilize select link analysis to test each of the alternative links before they are removed from the network.

Task 3 – Intersection Level Micro Analysis

Key intersection within the study area will be analyzed in Synchro during existing year (2017) and future year (2040).

- Walter P Moore identify the locations of existing and proposed parking lots/garages and develop trip generation nodes from these locations that will be capable of distributing trips throughout the network.
- Walter P Moore will develop the Synchro model for the existing network within the study area utilizing the 50 collected turning movement counts in Task 1, for the City's use.
- Walter P Moore will request and utilize available traffic signal timings provided from the City of Denton to simulate existing conditions in Synchro.
- Walter P Moore will utilize the travel demand model data developed in Task 2 to estimate the traffic annual growth rate to be applied to the future year analysis. The results from this analysis will help to determine 25 key (mostly impacted) intersections.
- Walter P Moore will conduct existing condition capacity analysis for a maximum of 25 key intersections during the AM, Mid-day, and PM peak hours and report measures of effectiveness (MOEs), including but not limited to level of service and delay.
- Walter P Moore will conduct future condition capacity analysis for the same 25 key intersections during the AM, Mid-day, and PM peak hours and report measures of effectiveness (MOEs), including but not limited to level of service and delay.
- Walter P Moore will analyze the 5 scenarios listed below utilizing future year conditions.
  - Closure of portions of Avenue C within the UNT boundaries
  - Closure of portions of Highland Street within the UNT boundaries
  - Closure of portions of Maple Street within the UNT boundaries
  - Closure of portions of Avenue C and Highland Street or Maple Street within the UNT boundaries
  - Closure of portions of Avenue C, Maple Street and Highland Street within the UNT boundaries
- Walter P Moore will analyze key roadway segments and estimate capacity usage during the existing year and future year.

*Task 4 – Assess Impacts and Develop Mitigation Measures*

Key intersections and roadway segments will be assessed by comparing the existing and future conditions for all alternatives.

- Walter P Moore will analyze impacts and develop mitigation measures for all 25 key intersections and key roadway segments identified in Task 3. Both the existing and future conditions will be analyzed and mitigated. We will analyze and mitigate for all peak periods being studied.
- Mitigation measures will be developed base on their feasibility and in coordination with City, UNT and UNTS staff, and Walter P Moore staff.
- Walter P Moore will categorize mitigation measures and improvement recommendations by short-, medium-, and long-term improvements.

*Task 5 – Future Buildout 2040 Analysis*

In order to assess the future impacts of the closure of street segments within the UNT campus a future buildout analysis will be conducted.

- Walter P Moore will utilize the forecast year travel demand model to evaluate future year conditions. The current forecast year land use assumptions in the Denton travel demand model will change as a result of the planning efforts for the Denton Sector 1 South planning study. It is recommended that we use the preferred scenario developed for the planning study for the forecast year land use and demographic inputs.
- Walter P Moore will utilize the forecast year model analysis to test 5 network alternatives. Each of the 5 network alternatives identified in Task 2 will be tested using the forecast year travel demand model to evaluate the volumes, level of service, and percent change of volumes in the surrounding network.
- Walter P Moore will utilize the results of the forecast year model for the future year intersection and roadway segment analysis.

*Task 6 – Study Report*

Based on mutual agreement between the City, UNT and UNTS, Walter P Moore will summarize in a report and submit to the City, UNT, and UNTS for review.

- Walter P Moore will provide results of Task 1 through Task 5 in a study report that will include the project background, methodology, and recommendations. The study report will include graphics and tables that describe the process and results in a manner that easily relays technical data to stakeholders and decision-makers in the study area.
- Walter P Moore will emphasize improvement recommendations that can be completed in a low-cost and short-term timeframe in the report.
- Walter P Moore will submit a draft report, with the final report being developed following a round of comments by the City, UNT, and UNTS staff.

Task 7 – Meetings

Meetings will be scheduled with the City, UNT, and UNTS staff throughout the project.

- Walter P Moore staff members will attend up to four (4) meetings. Proposed project meetings may include the following: project kickoff meeting, existing conditions status update, recommendations meeting, and a potential committee meeting (possible city council or transportation committee meeting).

The work effort, in this proposal, is expected to be completed within 7 months of the Notice to Proceed.
